Ecology of Communication David L. Altheide, 1995 *An Ecology of Communication* David L. Altheide, 1995-06-01

Ecology of Communication David L. Altheide, 2020-03-11 Altheide's new book advances the argument set in motion some years ago with *Media Logic* and continued in *Media Worlds in the Postjournalism Era* that in our age information technology and the communication environments it posits have affected the private and the social spheres of all our power relationships redefining the ground rules for social life and concepts such as freedom and justice. Articulated through an interactionist and non-deterministic focus, *An Ecology of Communication* offers a distinctive perspective for understanding the impact of information technology, communication formats and social activities in the new electronic environment. **The**

Gerbaudo, 2012-10-05 What should we make of the culture of the protest movements of the 21st century? From the Arab Spring to the indignados protests in Spain and the Occupy movement, Paolo Gerbaudo examines the relationship between the rise of social media and the emergence of new forms of protest. Gerbaudo argues that activists' use of Twitter and Facebook does not fit with the image of a cyberspace detached from physical reality. Instead, social media is used as part of a project of re-appropriation of public space which involves the assembling of different groups around occupied places such as Cairo's Tahrir Square or New York's Zuccotti Park. An exciting and invigorating journey through the new politics of dissent, *Tweets and the Streets* points both to the creative possibilities and to the risks of political evanescence which new media brings to the contemporary protest experience. **Media Worlds in the Postjournalism Era** David Altheide, 2019-01-08 The concept

of media logic a theoretical framework for explaining the relationship between mass media and culture was first introduced in Altheide and Snow's influential work *Media Logic In Media Worlds* in the Postjournalism Era the authors expand their analysis of how organizational considerations promote a distinctive media logic which in turn is conducive to a media culture They trace the ethnography of that media culture including the knowledge techniques and assumptions that encourage media professionals to acquire particular cognitive and evaluative criteria and thereby present events primarily for the media's own ends

Tangled Routes Deborah Barndt, 2008 Now in a thoroughly revised and updated edition *Tangled Routes* offers a vivid interdisciplinary examination of the global food system through the journey of a corporate tomato Through case studies in the three NAFTA countries Mexico the United States and Canada Deborah Barndt examines the dynamic relationships between production and consumption work and technology biodiversity and cultural diversity and health and environment The compelling stories of women workers along the tomato trail humanize her analysis of globalization taking into account the intersections of gender race class family status and north south relations
