Ecology And History The Greening Of The West Since 1880:

The Green Encyclopedia Irene M. Franck, David M. Brownstone, 1992 Presents information on a variety of environmental concerns and solutions The New Politics of Class Prof Klaus Eder, 1993-06-10 Are contemporary societies organized by class In recent years the apparent fragmentation of established class structures and the emergence of new social movements in particular the women s movement and environmentalism have altered the traditional expressions of class in society At the same time these changes have posed fundamental questions for the concept of class in sociology and political science In this major reassessment Klaus Eder offers a new perspective on the status of class in modernity Drawing on a critique of Bourdieu Touraine and Habermas he outlines a cultural conception of class as the basis for understanding contemporary societies His model reevaluates the role of the middle classes traditionally the crux of class analysis and links class to social theories of power and cultural capital The result is a cultural theory of class which incorporates the changing forms of collective action and the new social movements of contemporary societies **The Greening of London,**

1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities *The Reader's Adviser* Marion Sader, 1994 Heartily recommended Since not even a reference librarian par excellence can come close to knowing the best in any given discipline no library should be without access to this set for its patrons Booklist impressively meets a quite formidable task providing basic material on many subjects for the nonspecialist student librarian Choice From age old classics to the writings of today The Reader s Adviser 14th Edition helps you and your patrons select and appreciate the world s greatest books This monumental work features hundreds of authors and thousands of works new to this edition plus updated entries and revised material in every chapter updated critical and biographical profiles reflecting the latest understanding and scholarship more women writers and more culturally diverse writers from around the world title name subject indexes in every volume Order the complete 6 volume set for only 500 00 a savings of 160 00 if you purchased each volume separately **Books in Print Supplement** , 1988 **The Blue and the Green** Jack Stauder, 2016-03-22 In The Blue and the Green anthropologist Jack Stauder analyzes how large

scale political social and environmental processes have transformed ranching and rural life in the West Focusing on the community of Blue Arizona Stauder details how the problems of overgrazing erosion and environmental stresses on the open range in the early twentieth century coincided with a push by the newly created US Forest Service to develop fenced grazing allotments on federal lands Later in the twentieth century with the enactment of the Endangered Species Act and other laws the growing power of urban based environmental groups resulted in the reduction of federal grazing leases throughout the West The author combines historical research with oral interviews to explore the impact of these transformations on the ranchers residing in the Blue River Valley of eastern Arizona Stauder gives voice to these ranchers along with Forest Service personnel environmental activists scientists and others involved with issues on the Blue shedding light on how the ranchers rural way of life has changed dramatically over the course of the past century This is a fascinating case study of the effects of increasing government regulations and the influence of outsiders on ranching communities in the American West
