Economic Policy Issues for the Next Decade Karl Aiginger, G. detailed analysis and debate of issues central to the nation's future. Written by distinguished scholars in their respective fields, the three main sections give reviews from three contrasting traditions: mainstream industrial relations, industrial sociology and management, and labour economics. These accounts are highly complementary in the ways in which, in each and every case, issues of collective bargaining, managerial strategy and union response, and the behaviour of governments are all set against a broad backdrop of economic, political and social changes. The authors see the ultimate outcome as depending greatly on the policies and types of action of organised labour, managements and governments, and possibly of wider social movements as well. This book will be an essential read for scholars and researchers of labour economics, industrial sociology, economics and public policy.

Policy Concertation and Social Partnership in Western Europe Stefan Berger, Hugh Compston, 2002-02. Policy concertation, the determination of public policy by means of agreements struck between governments, employers and trade unions, continues to thrive in Western Europe despite the impact of liberalizing trends that were expected to lead to its demise. This volume brings together a team of 23 experts with the aim to undertake paired historical and political studies of policy concertation in ten West European countries which were then subjected to systematic comparative analysis. It shows that overall the incidence of broad policy concertation in Western Europe can be explained by the changing configurations of just three variables.
