**John Hiden**

## **German Foreign Policy From Bismarck To Adenauer The Limits Of Statecraft:**

German Foreign Policy from Bismarck to Adenauer Klaus Hildebrand, 1989 These studies of the history of international politics in the 19th and 20th centuries offer an interpretation of the relationship between statesmanship and state systems by a leading German historian The book is divided chronologically to cover the European order between the unification of Germany and World War I the revolution in international order before and during World War II and the Federal Republic of Germany and its policies towards the West and the East in the 1960s It explores the possibilities and dangers inherent in the decisions and conduct of statesmen which crucially affect the life of states and nations as well as of societies and individuals

**German Foreign Policy from Bismarck to Adenauer** Klaus Hildebrand, 2013-09-13 First Published in 1989 Tackling the problem of Germany's role in the history of world politics in the nineteenth and twentieth centuries is one of the most interesting tasks of historiography Furthermore the relationship between Britain and Germany is of central significance in understanding this role *German Diplomatic Relations 1871-1945* William Young, 2006-09-04 The continuity issue has been a theme in German historiography for half a century Historians have examined the foreign policy of Wilhelmine and Nazi Germany that led to two world wars Dr William Young examines the continuity of German Foreign Office influence in the formulation of foreign policy under the leadership of Otto von Bismarck 1862-1890 Kaiser William II 1888-1918 the Weimar Republic 1919-1933 and Adolf Hitler 1933-1945 He stresses the role and influence of strong German leaders in the making of policy and the conduct of foreign relations *German Diplomatic Relations 1871-1945* will be of value to individuals interested in the history of Germany Modern Europe and International Relations *Is the West in Decline?* Benjamin M. Rowland, 2015-10-30 *Is the West in Decline* is a collection of ten essays by prominent scholars of international relations and current history many of them associated with the European Studies program of the Johns Hopkins School of Advanced International Studies The essays explore the question of decline from several perspectives theoretical historical counterfactual and contemporary Thomas Row's essay uses alternative history to show how an unfallen Habsburg Empire might have evolved into a state system resembling the European Union Benjamin Rowland's essay on Oswald Spengler considers how the German historian's theory of decline could be applied to the West today Several of the essays are country studies Not all conclude that countries or state systems are in decline or that the condition if present is irreversible Writing about Germany Stephen Szabo notes that only fifteen years ago this currently robust country could have been seen as a clear exemplar of decline Dana Allin's essay on the U.S. asks whether a course change including retrenchment and overseas rebalancing might reverse decline or eliminate it altogether David Calleo's essay among other things looks at America's reserve currency status as a principal sustainer of American exceptionalism and asks what might happen should the U.S. lose its exorbitant privilege as reserve currency provider to the international system *The Hidden Power of the American Dream* Giovanna Dell'Orto, 2007-12-30 On the day after the tragic terrorist attacks of 9/11 newspapers across Europe

proclaimed We Are All Americans in many different languages crystallizing the solidarity that so many people around the world felt at that time But in the years since that beautiful friendship between Americans and Europeans evaporated leaving in its place a growing resentment so deep that Americans traveled overseas with Canadian flags stitched to their backpacks while Europeans held candlelight vigils for the removal of President George W Bush Dell Orto argues persuasively that the answer to the question of where do we go from here lies in whether non Americans keep believing in the American dream Only if that dream continues to be the root of America s power as this book shows it has been since the United States first stepped onto the international stage can America not go the way of all other superpowers in history down and out Through analysis of thousands of Western European media articles and government publications about the United States this book for the first time shows what the essence of America is to non Americans and why that matters to Americans in a very practical way because it sets limits to what the nation can accomplish Dell Orto argues persuasively that Europe s United States is the revered concept America the exceptional dream that the land of plenty of opportunity can really exist that the experiment in democracy can really work for all those who choose to become Americans This is a great U S asset since it makes America uniquely powerful in Europe s eyes infinitely mightier than the march of Marines and McDonald s alone would warrant Herein lie the uniqueness and the urgency of this book European public opinion shape s Europe s reaction at least as much as U S actions do

**The Ambivalent Alliance** Ronald J. Granieri, 2004 The opening of various personal and party archives over the past few years has now made the entire Adenauer era accessible for historians Using this material to re examine existing conventional wisdom about the period the text traces the roles of Adenauer and the CDU CSU is shaping the Westbindung

*Republican and Fascist Germany* John Hiden, 2020-10-28 This important addition to modern German studies treats the Weimar Republic and the Third Reich as a continuum exploring its themes through the 1920s and 1930s without artificial breaks John Hiden looks at key issues in political social and economic history and in international relations He highlights Germany s potentially constructive role in Europe before Hitler analyses the country s structural problems considers the importance of personalities and personal responsibility in the period and examines the legacy of the Third Reich to postwar Germany Filled with energy and ideas the book has an intellectual substance far beyond its relatively modest length

**The Weimar Republic** John Hiden, 2014-09-25 It is often assumed that the Weimar Republic was bound to fail due to the harsh terms of the Versailles Settlement Professor Hiden dispels this simplistic view and shows that it was a complex set of factors which finally brought Hitler to power This clear and balanced study is now fully revised for the first time since its publication in 1974 to take account of the latest research

[The Routledge Companion to Nazi Germany](#) Roderick Stackelberg, 2007-12-12 The Routledge Companion to Nazi Germany combines a concise narrative overview with chronological bibliographical and tabular information to cover all major aspects of Nazi Germany This user friendly guide provides a comprehensive survey of key topics such as the origins and consolidation of the Nazi regime the Nazi dictatorship

in action Nazi foreign policy the Second World War the Holocaust the opposition to the regime and the legacy of Nazism Features include detailed chronologies a discussion of Nazi ideology succinct historiographical overview with more detailed information on more than sixty major historians of Nazism biographies of 150 leading figures of Nazi Germany a glossary of terms concepts and acronyms maps and tables a concise thematic bibliography of works on the Third Reich This indispensable reference guide to the history and historiography of Nazi Germany will appeal to students teachers and general readers alike

**Imperialism at Sea** Rolf Hobson,2021-10-01 Was Grand Admiral Alfred von Tirpitz plan for naval expansion and the development of a risk fleet as a way to position Wilhelmine Germany as a world power to rival Britain so unique This comparative study of the modern naval strategy of Germany Britain France and the United States seeks to answer that question First Hobson is the only naval scholar to simultaneously compare the Tirpitz Plan with plans of the other leading nations of that time Second Hobson also interacts with how other scholars have assessed the complex interplay between naval history both in and outside Germany maritime law and naval strategy Hobson offers a unique interpretation of the causes and objectives of the German Imperial Navy at the end of the nineteenth century forces that ultimately led to the First World War

**Germany and Europe 1919-1939** John Hiden,2014-09-25 This is the only short study in English to survey Germany s foreign policy from a German viewpoint across the entire inter war period The approach which sets Germany in her full European context is not narrowly diplomatic and it gives as much attention to the Weimar years of the 1920s as it gives to the more familiar story of Germany s international relations under the Third Reich John Hiden has now thoroughly revised his text to take account of new scholarship since the book first appeared in 1977

On the Origins of War Donald Kagan,1996-01-01 A brilliant and vitally important history of why states go to war by the acclaimed award winning author of The Peloponnesian War War has been a fact of life for centuries By lucidly revealing the common threads that connect the ancient confrontations between Athens and Sparta and between Rome and Carthage with the two calamitous World Wars of the twentieth century renowned historian Donald Kagan reveals new and surprising insights into the nature of war and peace Vivid incisive and accessible Kagan s powerful narrative warns against complacency and urgently reminds us of the importance of preparedness in times of peace

**Soldier and Politics Transformed** Donald Abenheim,2007-07-10 The present volume puts forward two propositions First the altered face of armed conflict in the early twenty first century remains political in the sense that Clausewitz suggested to his readers in the early nineteenth century amid the nationalization of war and the eclipse of the old regimes of dynastic absolutist Europe Second this book reflects the author s conviction that the men and women at arms of NATO and the European Union must know and understand one another within the respective national experiences of war and peace especially as the soldier and politics evolve in and among the twenty six NATO allies Such knowledge forms the basis for sound policy and efficacious strategy in an age of proliferating conflict

*Term Paper Resource Guide to Nineteenth-Century World History* William T. Walker,2009-07-08

With this guide major help for nineteenth century World History term papers has arrived to enrich and stimulate students in challenging and enjoyable ways Show students an exciting and easy path to a deep learning experience through original term paper suggestions in standard and alternative formats including recommended books websites and multimedia Students from high school age to undergraduate can get a jumpstart on assignments with the hundreds of term paper suggestions and research information offered here in an easy to use format Users can quickly choose from the 100 important events spanning the period from the Haitian Revolution that ended in 1804 to the Boer War of 1899 1902 With this book the research experience is transformed and elevated Term Paper Resource Guide to Nineteenth Century World History is a superb source with which to motivate and educate students who have a wide range of interests and talents Coverage includes key wars and revolts independence movements and theories that continue to have tremendous impact *Modern Prussian History:*

*1830-1947* Philip G. Dwyer, 2014-06-11 The rise of Prussia and subsequent unification of Germany under Prussia was one of the most important events in modern European history However the fact that this unification was brought about as a result of the Prussian military has led to many misconceptions about the nature of Prussia and consequently of Germany which persist to this day This collection sets out to correct them Beginning in 1830 and finishing with the official dissolution of Prussia by the Allies in 1947 the book takes a broad approach chapters cover the conservatives and the monarchy industrialisation the transformation of the rural and urban environment the labour movement the tensions between Catholics and Protestants within the state and the debate about the links between Prussian militarism and the final tragedy of Nazi Germany By focusing on the social religious and political tensions that helped define the course of Prussian history the book also throws light on the development of modern German history *Fighting for the Soul of Germany* Rebecca Ayako

Bennette, 2012-06-15 Historians have long believed that Catholics were late and ambivalent supporters of the German nation Rebecca Ayako Bennette s bold new interpretation demonstrates definitively that from the beginning in 1871 when Wilhelm I was proclaimed Kaiser of a unified Germany Catholics were actively promoting a German national identity for the new Reich

**Hitler and His Allies in World War Two** Jonathan Adelman, 2020-03-25 In an area where in depth studies of Hitler s relations with Nazi Germany s allies and the failure of Nazi Germany to make more effective use of them during the war are scant this is a survey that looks at the Soviet Union Japan France Italy Spain Romania and Hungary and their relationship to Nazi Germany Using a comparative approach seven case studies examine themes such as co operation and resistance military and economic aid treatment of Jews relations with the enemies and the popular sentiment towards Germany Jonathan Adelman has provided students of the Second World War with a welcome mine of information and a unique perspective on a much studied topic **From Versailles to Pearl Harbor** Margaret Lamb, Nicholas Tarling, 2017-03-14 In

1941 the European war became a world war This book tackles that process in its economic political and ideological dimensions Margaret Lamb and Nicholas Tarling explore the significance of the Asian factor and the importance of East Asia

in the making of the war in Europe and the transformation of the European war of 1939 into the world war of 1941 This Asian factor has often been neglected but the policies of all the major powers were affected by their world wide interests France had its possessions in North Africa and Asia Nazi Germany chose to become involved in China and to make an agreement with Japan Britain's action in Europe and the Mediterranean were conditioned by its commitments elsewhere in the world and the United States and the Soviet Union were both involved in Europe and Asia In particular the threat that Japan presented to the status quo in East Asia made it difficult for the war in Europe in turn affected the position in East Asia The US built a two ocean navy and encouraged the British to continue their struggle by keeping the resources of South East Asia available and these steps led to a clash with the Japanese Lamb and Tarling's global approach throws valuable new light on the origins of the Second World War      **German Anglophobia and the Great War, 1914-1918** Matthew

Stibbe, 2006-06-22 This volume focuses on the extremity of anti English feeling in Germany in the early years of the Great War and on the attempt by writers propagandists and cartoonists to redefine Britain as the chief enemy of the people and their cultural heritage      Unequal Partners Julius W. Friend, 2001-11-30 The reconciliation of France and Germany is a landmark in the history of the 20th century Between 1870 and 1950 they fought three wars Then as founders of the European Community they became linked by increasingly close economic political and cultural ties Friend asserts that it is no exaggeration to say that the French German relationship has been central to the history of Western Europe in the second half of the 20th century Friend provides a largely chronological account of the bilateral relation from the turbulence of unification through the years when an enlarged EU sought new institutions of governance He then examines the basis of the Franco German relationship today and looks to future changes As Germany has become the economic giant of Europe particularly after the reunification of West and East Germany the relationship has changed and Friend explores how this unequal but unavoidable partnership has adapted An important guide for policy makers as well as scholars and students involved with contemporary European Studies
