German Secret Weapons Blueprint For Mars:

German Secret Weapons Brian John Ford,1970 *German Secret Weapons* Brian J. Ford,1969 At Peenemunde the conditions and pay were excellent morale was high and the results were widely acclaimed The set up was ideal for the furtherance of secret work and the German secret weapon programme pressed steadily ahead with incredible and in some cases devastating results Secret Weapons Brian J Ford,2013-09-20 Deep in the bunkers of Nazi Germany many of the world's top scientists worked to create a new generation of war winning super weapons A few of these such as jet aircraft and the V2 rocket became realities at the end of the war others never made it off the drawing board Written by noted research scientist Brian Ford this exciting book charts the history of secret weapons development by all the major powers during the war from British radar to Japanese ray guns and explains the impact that these developments eventually had on the outcome of World War II Ford also takes a look at the weapons that never made it to development stage as well as the more radical plans such as the idea of turning Hitler into a woman with hormone treatment **V Weapons Hunt** Roy M. Stanley,2010-08-19 The V 1 and much larger V 2 rockets added a terrifying extra dimension to the Second World War Once launched there was little that could stop the V 1s and nothing to prevent the V 2s from reaching their targets Both were indiscriminate and struck with little or no warning Their destructive power was awesome but it was their psychological impact on the defenseless civil population that posed such a threat to morale This remarkable book tells through words and images the story of the Allied discovery understanding and campaign against the Vengeance weapons Written by a trained intelligence analyst and aerial photo interpreter V Weapons Hunt picks out the air photographs that found the breakthrough in this vital campaign The reader sees the first sighting of a V 1 flying bomb at the Peenemunde research facility weapon launch sites production facilities as well as the damage caused by Allied raids This is a scholarly and authoritative work which lifts the lid on how Allied intelligence provided the information to defeat this insidious threat before it caused not only massive destruction but the delay of the Normandy invasion Code Name Caesar Jerome Preisler,Kenneth Sewell,2013-07-02 In the waning days of World War II a little known battle took place under the frozen seas off the coast of Norway and changed the course of the war In February of 1944 Germany and Japan devised a desperate plan to escape defeat The Germans would send Japan a submarine boat U 864 packed with their most advanced rocket and jet aircraft technology Japan could then reestablish air superiority in the Pacific drawing the attention of Allied forces long enough for Germany to regroup Meanwhile British code breakers working with the Norwegian underground had discovered the plan But even though they were unable to stop the submarine from embarking the British submarine HMS Venturer was waiting for it at sea In a cat and mouse battle beneath the waves they hunted one another each waiting to strike The Venturer won the game becoming the only submarine in history to sink another sub in underwater combat This is the dramatic action packed account of one of the greatest unsung victories in military history and of a historical moment in the annals of naval warfare
