Tsvetkova,2013-06-17 In Failure of American and Soviet Cultural Imperialism in German Universities 1945 1990 Natalia Tsvetkova describes the American and Soviet policies in German universities during the Cold War In both parts of divided Germany the conservative professorate resisted both the American and Soviet policies of reforms in universities Whether these policies can be considered cases of cultural imperialism will be discussed in this book As well as how and why both American and Soviet policies of the transformation of German universities eventually failed Higher Schools and Universities in Germany Matthew Arnold,1874 *The German Universities and University Study* Friedrich Paulsen,1906 German Schools and Pedagogy Henry Barnard,1861 **Contributions to the History and Improvement of the German Universities** Karl von Raumer,2025-08-27 Reprint of the original first published in 1859 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage Universities: American, English, German Abraham Flexner,1968 *Germany* Olaf Kühne,Florian Weber,2022-03-02 This book addresses the highly differentiated spatial social cultural and demographic structure s of Germany with a particular focus on the reciprocal relations between different levels of spatial development The historical development of Germany serves as a background in order to provide context for the development of spatially relevant ideas and ideals whether in relation to politics landscape or culture In this regard questions of divergence and convergence become highly salient The book makes the complexity of spatial and social developments in Germany comprehensible The neopragmatic approach adopted here allows bringing together different theoretical strands while providing a basis for independent regional geographic research at the same time Beginning with an overview of the physical structures of Germany which provides the material point of departure for the societal development of Germany key aspects of the German history are discussed Particular attention is paid to the reciprocal influence between material substrate and notions of landscape Here specific German trajectories of aesthetic and normative conceptions of landscape become clear A common theme throughout the book are questions of divergence and of efforts towards convergence which become evident when considering past and present economic political and demographic developments Efforts to tackle current challenges such as adapting to climate change and mitigating it or securing raw materials also become apparent The complexity of spatial processes in Germany is illustrated in case study regions dealing with the challenges of structural change in traditional industrial regions such as the Ruhr area or e g efforts of Berlin to position and find itself as the capital of a unified Germany Overall the book shows how theory driven regional geographic research can make spatiotemporal complexities tangible and comprehensible *German University Education, Or The Professors and Students of Germany* Walter Copland Perry,1845 Schools and Schooling in Late Medieval Germany David Sheffler,2008-06-30 Historians have traditionally studied late medieval education backward through the eyes of religious and political reformers critical of that which preceded them This has led to significant distortions Histories written from this perspective tend to overemphasize the

novelty of early modern educational reforms at the expense of evident continuities and focus on conflict between ecclesiastical and lay authorities rather than cooperation This book focuses instead on the medieval experience of education through a detailed reconstruction of the educational landscape of late medieval Regensburg The resulting picture provides new insights into the relationship between civic authorities and ecclesiastical institutions the role of education in social and economic mobility and the connections between local communities and broader European educational structures

**German Universities Past and Future** Mitchell G. Ash,1997 Eight contributions examine the discrepancies between the traditional ideals and the present reality of West German universities and their impact on the universities of a unified Germany The first half of the text describes universities in 19th and 20th century Germany and the influence of Wilhelm Von Humboldt The second half addresses the future and the relationship between education and the politics of its time
