German Jet Genesis David Masters,1982 **German Jet Genesis** Outlet,Outlet Book Company Staff,Random House Value Publishing Staff,1987-02-01 **Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945** Dan Sharp,2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen They proposed rotating wing ramjet fighters arrowhead shaped rammers rocket firing bat winged gun platforms sleek speed machines tailless flying wings tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors **Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945** by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs illustrations and period documentation from archives around the world

Area 51 - Black Jets Bill Yenne,2018-03-06 In **Area 51 Black Jets** author and military historian Bill Yenne reveals Area 51 for what it truly is a clandestine arena for the United States most cutting edge technological innovators in military aviation **The Jet Race and the Second World War** S. Mike Pavelec,2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged

throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec's analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport **Jet Web** Dietrich Eckardt, 2023-02-03 The present book describes the development history of turbojet engines mainly in the web type triangle Great Britain USA Germany Switzerland from early beginnings in the 1920s up to the first practical usage in the 1950s before the still unbroken grand impact of aero propulsion technology on global air traffic started interconnections are highlighted including the considerable impact of axial flow compressor design know how of the Swiss German company BBC Brown Boveri Cie on both sides The author reveals significant undercurrents which led to a considerable exchange and thus change in understanding of the technical historical perspective especially in the decisive years before WWII and thus closes gaps in the unilateral views of this ground breaking technical advancement The old Whittle vs von Ohain Saga is not repeated in full but addressed in sufficient detail to understand the considerably enlarged narrative scope **German Jet Genesis** David Masters, 1982 *The Hunt for Zero Point* Nick Cook, 2007-12-18 This riveting work of investigative reporting and history exposes classified government projects to build gravity defying aircraft which have an uncanny resemblance to flying saucers The atomic bomb was not the only project to occupy government scientists in the 1940s Antigravity technology originally spearheaded by scientists in Nazi Germany was another high priority one that still may be in effect today Now for the first time a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A bomb The Hunt for Zero Point explores the scientific speculation that a zero point of gravity exists in the universe and can be replicated here on Earth The pressure to be the first nation to harness gravity is immense as it means having the ability to build military planes of unlimited speed and range along with the most deadly weaponry the world has ever seen The ideal shape for a gravity defying vehicle happens to be a perfect disk making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years Chronicling the origins of antigravity research in the world's most advanced research facility which was operated by the Third Reich during World War II The Hunt for Zero Point traces U S involvement in the project beginning with the recruitment of former Nazi scientists after the war Drawn from interviews with those involved with the research and who visited labs in Europe and the United States The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena **Hitler's Suppressed and Still-Secret Weapons** Henry Stevens, 2011-08-11 Now we know what spooked the Allies in the closing months of the war and why they were in such a panic to win quickly The Allies assembled intelligence reports of supermetals electric guns and ray weapons able to stop the engines of Allied aircraft in addition to their worst fears of x ray and laser weaponry Then there were the bombs Contained in this book are reports of structured bombs of nipolit N stoff bombs cold bombs oxygen bombs which destroyed all life atomic bombs and rumors of the mysterious molecular bomb The true history of the fuel air bomb is revealed by our own military There is even a probability

that the SS black alchemists of the 3rd Reich were experimenting with red mercury bomb technology This book documents very large mystery rockets under development in Germany far beyond the V 2 Technological history is also examined Guess who invented the computer magnetic tape and computer programs How about refining crude oil using sound waves or producing gasoline for 11 cents per gallon or the synthetic penicillin substitute 3065 Very exotic technologies are also discussed including German experiments in time sustained fusion reactions zero point energy and travel in deep space Chapters include The Kammler Group German Flying Disc Update Witness to a German Flying Disc The Electromagnetic Vampire Liquid Air Synthetic Blood German Free Energy Research German Atomic Tests Project Hexenkessel The Fuel Air Bomb Supermetals Red Mercury Means To Stop Engines Magnetic Wave Motorstoppmittel Death Rays Distillation of Crude Oil Using Sound Waves What is Happening in Antarctica Large German Mystery Rockets Experiments in Time tons more

Man-Made UFOs, 1944-94 Renato Vesco, David Hatcher Childress, 1994 A comprehensive and in depth look at the early flying saucer technology of Nazi Germany and the genesis of early man made UFOs From captured German scientists escaped battalions of German soldiers secret communities in South America and Antarctica to today's state of the art Dreamland flying machines the astonishing book blows the lid off the Government UFO Conspiracy Examined in detail are secret underground airfields and factories German secret weapons suction aircraft the origin of NASA gyroscopic stabilisers and engines the secret Marconi aircraft factory in South America and other secret societies both ancient and modern that have kept this craft a secret and much more *Nazi UFOs* S.D. Tucker, 2022-10-24 *Nazi UFOs* tells the strange tale of how following the first alleged flying saucer sightings made in the USA in 1947 a series of fantasists and neo fascists came forward to create a media myth that the Nazis may have invented these incredible craft as a means for winning the Second World War a plan which was tantalisingly close to completion before the Allies conquered Berlin in 1945 Today the fantasy of Nazi UFOs has grown into an entire mythology in books on TV and online Did Germany back engineer anti gravity craft and even a full blown time machine by stripping technology from a crashed alien saucer Did the SS secretly invent Green technology for use in their star ship engines and was this planet saving discovery later suppressed at the behest of a sinister Big Oil conspiracy Did Himmler try to develop lightning weapons for use in aerial combat By contrasting the fake military industrial pseudo histories of Nazi UFO theorists with details of real life Nazi aerospace achievements the author demonstrates both how this modern day mythology came about and how it cannot possibly be more than fractionally true For the first time this fake alternative military history is laid out in full This book features an appealing cast of con men and spies complete madmen real life Nazis and completely made up ones operating right across the globe from South America to wartime Europe and Japan A good example may be the mad professor Viktor Schauberger who actually genuinely did manage to gain a personal audience with Adolf Hitler in order to try and convince him that he had discovered and then exploited some amazing new source of natural free energy which could make objects such as saucers in the opinion of some float Hitler

dismissed his plan but it does nonetheless show how close some bizarre schemes came to being implemented in Nazi Germany
