Sarah Justina Eyerly, 2020-05-05 In *Moravian Soundscapes* Sarah Eyerly contends that the study of sound is integral to understanding the interactions between German Moravian missionaries and Native communities in early Pennsylvania. In the mid 18th century when the frontier between settler and Native communities was a shifting spatial and cultural borderland, sound mattered. People listened carefully to each other and the world around them. In Moravian communities, cultures of hearing and listening encompassed and also superseded musical traditions such as song and hymnody. Complex biophonic, geophonic, and anthrophonic acoustic environments or soundscapes characterized daily life in Moravian settlements such as Bethlehem, Nain, Gnadenhütten, and Friedenshütten. Through detailed analyses and historically informed recreations of Moravian communal, environmental, and religious soundscapes and their attendant hymn traditions, *Moravian Soundscapes* explores how sounds, musical and nonmusical, human and nonhuman, shaped the Moravians' religious culture. Combined with access to an interactive website that immerses the reader in mid 18th century Pennsylvania and framed with an autobiographical narrative, *Moravian Soundscapes* recovers the roles of sound and music in Moravian communities and provides a road map for similar studies of other places and religious traditions in the future.

Advanced Techniques for Maintenance Modeling and Reliability Analysis of Repairable Systems Garima Sharma, Rajiv Nandan Rai, 2023-10-31

ADVANCED TECHNIQUES FOR MAINTENANCE MODELING AND RELIABILITY ANALYSIS OF REPAIRABLE SYSTEMS This book covers advanced models and methodologies for reliability analysis of large, complex, and critical repairable systems that undergo imperfect maintenance actions in industries having MRO facilities and also covers real life examples from the field of aviation. The content presented in this book is inspired by the existing limitations of the generalized renewal process (GRP) model and the problems confronted by the maintenance repair and operations (MRO) facilities in industries dealing with large and complex repairable systems. Through this book, the authors have attempted to equip the MRO facilities with more advanced scientific tools and techniques by addressing various limitations related to the reliability analysis of repairable systems. The book is dedicated to various imperfect maintenance based virtual age models and methodologies to bridge various research gaps present in the available literature. A summary of deliverables is as follows:

- Presents the basic concepts of maintenance and provides a virtual age model that can accommodate all maintenance.
- Provides the basic concepts of censoring in repairable systems along with the concept of black box and failure modes.
- Also highlighted is how the proposed work will be useful for industries conducting failure modes and effect analysis (FMEA) and estimating the mean residual life (MRL) of repairable systems.
- Presents methodology that applies risk based threshold on intensity function and provides a threshold to declare the system component as high failure rate components (HFRCs).
- Identifying a system as HFRCs is an important task, but for an industry dealing with critical systems, preventing the system from being HFRC is more important since the risk involved in such systems would be very high. Thus, the book presents a progressive maintenance policy (PMP) for repairable systems.
- Focusses on qualitative analysis of repair

quality Assuming repair quality as a subjective variable the authors have presented various factors that affect the repair quality most and modeled their interdependency using Bayesian networks BN Audience Professional reliability engineers reliability administrators consultants managers and post graduate students in engineering schools The book belongs to any engineering technical and academic institution concerned with manufacturing production aviation defense and software industries **Web Information Systems and Technologies** Joaquim Filipe, José Cordeiro, Vitor Pedrosa, 2007-08-07 The refereed post proceedings of the 1st and 2nd International Conferences on Web Information Systems and Technologies are presented in this volume The papers present the state of the science addressing all relevant aspects of web information systems technologies and applications They are grouped into four parts covering internet technology web interfaces and applications society e business and e government and e learning German Shorthaired Pointer Calendar 2018 Avonside Publishing Ltd, 2017 2024 German Shorthaired Pointers Wall Calendar , 2023 Just German Shorthaired Pointers 2021 Wall Calendar (Dog Breed Calendar).
