*Germany and the Transnational Building Blocks for Post-National Community* Donald Phillips, 2000-08-30 Phillips assesses prospects for post national social coherence transcending the traditional nation state with a focus on events in Germany European institutional integration has been seen as a stabilizing alternative to the nation state system a system that resulted in two devastating world wars However economic interests appear to have been more effective instruments of transnational integration in Europe Further until 1989 part of this alternative vision was a divided Germany He explicitly links a focus upon the Federal Republic central to post Cold War Europe s future with a study of private business perhaps the most indispensable agent of Germany s post 1945 rehabilitation Business support has been imperative to European integration Nonetheless if the European Union is attractive to members or potential members only for economic reasons then no matter how wealthy its constituent parts may be potential harmful effects of interstate competition will continue to pose a threat to social coherence of the EU the Continent and the world beyond With the aid of analysis of companies largely perceived as being German but which are increasingly transnational Phillips shows how interdependent business needs may overcome nationalist and institutional conceptions in the transnational integration processes For scholars researchers and policy makers involved with European integration international relations and German Studies

*Germany and the Transnational Building Blocks for Post-National Community* Donald Phillips, 2000-08-30 This work assesses the economic prospects for post national social coherence transcending the traditional nation state with a focus on events in Germany European institutional integration has been seen as a stabilizing alternative to the nation state system a system that resulted in two devastating world wars However economic interests appear to have been more effective instruments of transnational integration in Europe Further until 1989 part of this alternative vision was a divided Germany The book explicitly links a focus upon the Federal Republic central to post Cold War Europe s future with a study of private business perhaps the most indispensable agent of Germany s post 1945 rehabilitation Business support has been imperative to European integration Nonetheless if the European Union Phillips argues is attractive to members or potential members only for economic reasons then no matter how wealthy its constituent parts may be potential harmful effects of interstate competition which the European movement sought to circumvent will continue to pose a threat to social coherence of the EU in particular the Continent in general and the world beyond still founded on nation state structures With the aid of analysis of companies largely perceived as being German but which are increasingly transnational Phillips shows how interdependent business needs may overcome nationalist and institutional conceptions in the transnational integration processes

*Post-National Patriotism and the Feasibility of Post-National Community in United Germany* Donald Phillips, 2000-09-30 Outlines the necessity and feasibility of a concept of post national patriotism

*Annuaire Europeen 2000/European Yearbook 2000* Francis Rosensteel, 2001-07-01 The year 2000 s most significant international event was almost certainly neither political nor

military but scientific the announcement in June that the human genome had been almost totally decoded Future generations may well see this as a major turning point opening the way to radical changes in diagnosis prognosis and medical treatment Often compared with the space programme this vast enterprise still generates misgivings this new power which human beings now have to modify the genetic heritage of living creatures raises fundamentally new ethical questions and society as a whole will have to find the answers In fact the accelerating pace of scientific and technical progress seems to be reviving atavistic anxieties some rational others less so Recent public health crises including the mad cow disease scare which lasted into 2000 have fuelled these fears The public s rejection of GMOs Genetically Modified Organisms verging on a crusade in some countries tells its own story As regards conflict 2000 saw the Middle East peace process grind to a halt and the Intifada resume In Europe the situation in Kosovo and Chechnya both the scenes of fighting in 1999 stayed precarious Peace and democracy did score some successes however particularly in Europe the centre left s victory in Croatia sweeping former President Tudjman s party off the scene the democratic party s triumph in Bosnia and the fall of the Milosevic regime in Serbia

**The British National Bibliography** Arthur James Wells,2002 American Book Publishing Record ,2000-07 **International Affairs** ,2001 **Global standards : building blocks for the future.** Congress of the United States. Office of Technology Assessment,1992 Soldered states: nation-building in Germany and Vietnam Claire Sutherland,2018-04-30 The book examines the power of nationalism to solder nation states back together rather than break them apart In this innovative cross continental comparison of nation building

in Germany and Vietnam the focus is on their shared experience of division communism and regional integration offering original insights into how governments go about maintaining nation state legitimacy in the twenty first century Neither German nor Vietnamese governments have succeeded in effacing national division for a host of historical economic psychological sociological and even climatic reasons Yet their efforts tell us a great deal about how national identity is negotiated today The study offers a fresh perspective on nationalist ideology which will be of interest to specialists and students in comparative politics European and Southeast Asian studies as well as nationalism studies For the general reader it provides a fascinating introduction to contemporary nation building in a unique combination of cases across two continents
