Reuben, 2014-05-01 **Geriatrics at Your Fingertips** , **Geriatric Anesthesiology** J. G. Reves, Sheila Ryan Barnett, Julie R. McSwain, G. Alec Rooke, 2017-10-27 Surgical and anesthetic techniques have evolved

to allow a growing number of older adults to undergo surgery and current estimates are that 50% of Americans over the age of 65 years old will have an operation. However, as the knowledge regarding perioperative care of the elderly surgical patient grows, so do the questions. In this edition, each chapter includes a section entitled Gaps in Our Knowledge meant to highlight areas in which research is needed, as well as hopefully inspire readers to begin solving some of these questions themselves. Building upon the strong foundation of the first two editions, *Geriatric Anesthesiology* 3rd edition also assembles the most up-to-date information in geriatric anesthesia and provides anesthesiologists with important new developments. Topics covered include several new chapters that reflect the evolution of multidisciplinary geriatric care throughout the perioperative continuum, as well as the growing body of literature related to prehabilitation. In addition, discussion of the surgeon's perspective and geriatrician's perspective on surgery in the geriatric population is covered, as well as the systematic physiologic changes associated with aging and the pharmacologic considerations for the geriatric patient undergoing procedures. Finally, the last section discusses postoperative care specific to the geriatric population, including acute pain management, ICU management, recent evidence, and up-to-date practice regarding delirium and postoperative cognitive dysfunction and palliative care.

Geriatrics At Your Fingertips 2002 Edition David B. Reuben, Keela Herr, James T. Pacala, Bruce Pollock, Jane Potter, Todd P. Semla, 2002-03-22. The fourth edition of *Geriatrics at Your Fingertips* is a portable, practical, and economical tool for professionals who provide primary care to older persons. Content focuses on the evaluation and management of the diseases and disorders that most commonly affect older persons in various healthcare settings. GAYF minimizes the time clinicians spend searching for the information that they need to make patient care decisions. Many of the care strategies are derived from guidelines published by organizations such as the Agency for Health Care Policy and Research, the American Heart Association, and the American Diabetes Association, among others. GAYF describes assessment instruments, recommended diagnostic tests, and management strategies that include non-pharmacologic and pharmacologic therapy. The design of the tables and lists of drugs facilitates appropriate prescribing. Generic and trade names are provided, as well as information on dosages, how the drugs are metabolized or excreted, and how each drug is supplied, with special emphasis on impact in older patients. Body system disorders such as respiratory diseases, symptoms like pain, and life style issues such as alcohol and tobacco abuse are covered in separate chapters. At the end of the book are lists of telephone numbers and Web sites that serve as additional resources for specific information on general aging, end of life, legal issues, and elder abuse, and specific health problems.
