In Defense of Post-Keynesian and Heterodox Economics Frederic S. Lee, Marc Lavoie, 2012 This text makes it clear that post Keynesian heterodox economics is in spite of internal problems a viable and important approach to economics and that it should resist the attempts of the critics to bury it

The Endless Crisis John Bellamy Foster, Robert W. McChesney, 2017-05-01 The days of boom and bubble are over and the time has come to understand the long term economic reality Although the Great Recession officially ended in June 2009 hopes for a new phase of rapid economic expansion were quickly dashed Instead growth has been slow unemployment has remained high wages and benefits have seen little improvement poverty has increased and the trend toward more inequality of incomes and wealth has continued It appears that the Great Recession has given way to a period of long term anemic growth which Foster and McChesney aptly term the Great Stagnation This incisive and timely book traces the origins of economic stagnation and explains what it means for a clear understanding of our current situation The authors point out that increasing monopolization of the economy when a handful of large firms dominate one or several industries leads to an over abundance of capital and too few profitable investment opportunities with economic stagnation as the result Absent powerful stimuli to investment such as historic innovations like the automobile or major government spending modern capitalist economies have become increasingly dependent on the financial sector to realize profits And while financialization may have provided a temporary respite from stagnation it is a solution that cannot last indefinitely as instability in financial markets over the last half decade has made clear

Advancing the Frontiers of Heterodox Economics Tae-Hee Jo, Zdravka Todorova, 2015-07-30 This collection of essays honors the life and work of one of the most prominent and fervent heterodox economists Frederic S Lee who has been at the heart of the heterodox economics movements for the past three decades Authors in this book demonstrate that heterodox economic has transcended the criticism of mainstream economics and more importantly that constructive developments are in the making by way of cross communications among various heterodox economics traditions Frederic S Lee s contributions to heterodox economics are centered on three themes the making of a history and identity of heterodox economics heterodox microeconomics and the heterodox analysis of social provisioning Part I addresses the importance of history theory research methods and institutions in the making of the identity of heterodox economics as an alternative to mainstream economics Part II delves into heterodox microeconomic theories in particular investment pricing competition markets and market governance as foundations of heterodox macroeconomic analyses Part III

expands the analysis of the capitalist social provisioning process with an emphasis on its subsystems and their relationships over historical time Part IV encapsulates the life and work of Frederic S Lee Throughout his intellectual life Frederic S Lee has shown to many that the development of heterodox economics is rendered possible by unselfish and ceaseless efforts to build both theory and institutions Essays in this book attest that establishing an alternative critical theory to the status quo is not only possible but also serviceable to the majority of the population

Philosophy after Marx Christoph Henning, 2014-04-17 Christoph Henning writes a concise history of misreadings of Marx in the 20th century Focussing on German philosophy from Heidegger to Habermas he also addresses the influence of Rawls and Neopragmatism subsequently scrutinizing a previous history of Marx interpretations that had served as the premises upon which these later works were based Henning sketches a historical trajectory in which a theory

of socialist politics enters the fields of economics sociology critical theory and theology before finally overloaded with intellectually dead freight entering into philosophy In so doing he takes a hermeneutic approach to how misreadings in a specific field proliferate into further misreadings across a variety of fields leading to an accumulation of questionable preconceptions With the recent resurgence of interest in Marx Henning s historical recursions make evident where and how academic Anti Marxism had previously got it wrong English translation of Philosophie nach Marx 100 Jahre Marxrezeption und die normative Sozialphilosophie der Gegenwart in der Kritik Transcript Verlag Bielefeld 2005

Ontology and Economics Edward Fullbrook,2008-10-27 Tony Lawson has become a major figure of intellectual controversy on the back of juxtaposing two relatively simple and seemingly innocuous ideas He has argued firstly that success in science depends on finding and using methods including modes of reasoning appropriate to the nature of the phenomena being studied and also that there are important differences between the nature of the objects of study of natural sciences and those of social science This original book brings together some of the world s leading critics of economics orthodoxy to debate Lawson s contribution to the economics literature The debate centres on ontology which means enquiry into the nature of what exists and in this collection scholars such as Bruce Caldwell John B Davis and Geoffrey M Hodgson present their thoughtful criticisms of Lawson s work

Lawson himself presents his reactions to these criticisms with full chapter replies to each of the scholars included. This book is particularly useful for students and researchers concerned primarily with methodology and future development of economics. It is also relevant to the concerns of philosophers of science and to all social scientists interested in methodological issues.

The Routledge Handbook of Heterodox Economics Tae-Hee Jo, Lynne Chester, Carlo D'Ippoliti, 2017-07-28

The Routledge Handbook of Heterodox Economics presents a comprehensive overview of the latest work on economic theory and policy from a pluralistic heterodox perspective. Contributions throughout the Handbook explore different theoretical perspectives including Marxian radical political economics, Post Keynesian, Sraffian economics, institutionalist, evolutionary economics, feminist economics, social economics, Regulation theory, the Social Structure of Accumulation approach, and ecological economics. They explain the structural properties and dynamics of capitalism as well as propose economic and social policies for the benefit of the majority of the population. This book aims firstly to provide realistic and coherent theoretical frameworks to understand the capitalist economy in a constructive and forward looking manner. Secondly, it delineates the future directions as well as the current state of heterodox economics and then provides both heat and light on controversial issues, drawing out the commonalities and differences among different heterodox economic approaches. The volume also envisions transformative economic and social policies for the majority of the population and explains why economics is and should be treated as a social science. This Handbook will be of compelling interest to those including students who wish to learn about alternative economic theories and policies that are rarely found in conventional economics textbooks or discussed in the mainstream media, and to critical economists and other social scientists who are concerned with analyzing pressing socio-economic issues.
