James represents an intensive rethinking and restructuring of the Tudor art world based on a broad detailed survey of women's diverse creative roles within that world. Through an extensive analysis of original documents James examines and clarifies many of the misperceptions upon which modern discussions of Tudor art are based. The new evidence she lays out allows for a fresh investigation of the economics of art production particularly in the images of Elizabeth I of strategies for influencing political situations by carefully planned programs of portraiture of the seminal importance of extended clans of immigrant Flemish artists and of careers of artists Susanna Horenbout and Lievine Teerlinc and their impact on the development of the portrait miniature. Drawn principally from primary sources this book presents important new research which examines the contributions of Tudor women in the formation distribution and popularization of the visual arts particularly portraiture and the portrait miniature. James highlights the involvement of women as patrons consumers and creators of art in sixteenth century England and their use of the painted image as a statement of cultural worth. She explores and analyzes the amount of time money effort and ingenuity which women across all social classes invested in the development of art in the uses they found for it and the surprising and unexpected ways in which they exploited it.

Cromwell has been the subject of close and continuous attention for the last half century with positive appraisal of his work and achievements as the scholarly norm. In this classroom biography the first in a generation and the only one now in print that judgment is largely accepted though it is combined with earlier and more critical assessments that view Cromwell as a disciple of Machiavelli.
