The Anthropology of Western Religions Murray J. Leaf, 2014-05-21 The world's great religions depend on traditions of serious scholarship dedicated to preserving their key texts but also to understanding them and therefore to debating what understanding itself is and how best to do it They also have important public missions of many kinds and their ideas and organizations influence many other important institutions including government law education and kinship The Anthropology of Western Religions Ideas Organizations and Constituencies is a comparative survey of the world's major religious traditions as professional enterprises and often as social movements Documenting the principle ideas behind Western religious traditions from an anthropological perspective Murray J Leaf demonstrates how these ideas have been used in building internal organizations that mobilize or fail to mobilize external support

My Words Are Spirit and Life James Regan, 2006-02-16 Darwin set out to sea with his voyage on the Beagle he was not quite sure what he would discover but he had an idea When Christopher Columbus set out to sea he had a plan to discover a new trade route but he found a new land When Martin Luther King set out on his journey to discover He said I have a dream Each of them made the decision to leave the comfort of where they were and had the courage to venture out in order to discover This book is a book of discovery It is a book of truth It will take you down to the core of you This book will allow you to take a personal safari of self discovery and you should find your place in the midst of things Yet it is not the journey that is the most difficult part no in each case it was the decision to begin that proved to be the greatest obstacle Do you think you can muster up the courage for a journey of this kind The original pilgrims and the settlers of this country thought America to be worth the fight They decided to go through whatever they had to go through to obtain the benefits of their journey The things that you obtain in return for your willingness to proceed may prove to be quite priceless Are you worth the fight Typical topics that are found in the book 1 That life did not necessarily start out in the sea 2 DNA doesn't intend to leave things to chance 3 Green plants and red blood are interconnected 4 Chemical reactions prefer the number 8 5 Seven lines of proof showing that plants were here before the animals 6 What clues about our origins are embedded in the art patterns that are found in nature 7 What truth does camouflage reveal beyond its protective abilities A few references for you from those who have already enjoyed the book Recommended reading for anybody who wants to review fairly the evidence in nature for a Supreme Being
