---

Federalism is a system of government that divides power between a central government and smaller units of government, such as states or provinces. This division of power is typically enshrined in a constitution or other legal document, and it specifies the powers of each level of government and the relationship between them. In this article, we will explore the division of powers in federalism, emergency provisions, and the Fifth and Sixth Schedules of the Indian Constitution.

## **Division of Powers**

In a federal system, the powers of the central government and the smaller units of government are divided into three categories: exclusive, concurrent, and residuary. Exclusive powers are those that are reserved for the central government, such as defense, foreign policy, and interstate commerce. Concurrent powers are those that are shared between the central government and the smaller units of government, such as taxation, healthcare, and education. Residuary powers are those that are not explicitly mentioned in the constitution and are left to the discretion of the central government.

The division of powers is a critical feature of federalism because it helps to ensure that decisions are made at the most appropriate level. For example, decisions about national defense and foreign policy are best made at the central government level, while decisions about healthcare and education are best made

therefore worth engaging with its complex nature and dynamic The second objective is to bring into closer focus the  
contested concepts about the meaning and operation of federalism that are at the root of the divide between English Canada  
and Quebec in particular The third objective is to give recognition to the trajectory of Canada s Indigenous peoples in the  
context of Canadian federalism from years of abusive neglect to belated efforts of inclusion The book focuses on the  
constitution with its ambiguous allocation of divided powers the pivotal role of the courts in balancing these powers and the  
political leaders whose interactions oscillate between intergovernmental conflict and cooperation This focus on executive  
leadership and judicial supervision is framed by considerations of Canada s regionalized political economy and cultural
