Clarke,2025-06-24 Colleagues and former students of Gregory Schopen honor his path breaking contributions to Buddhist studies with these articles on the early Mahayana the monastic codes and Buddhism s art historical and epigraphical remains This volume honors the profoundly transformative influence of Gregory Schopen s many contributions to Buddhist studies Eighteen articles by former students and colleagues focus on the areas of Schopen s most noteworthy influence the study of the Mahayana particularly of its early sutra literature the study of Vinaya especially the narratives accompanying the rules for monks and nuns and the study of Buddhist epigraphy and art history Contributors demonstrate the ongoing significance

of Schopen's scholarship including his very first article on the cult of the book in the early Mahayana published fifty years ago Schopen has repeatedly shown how the study of Buddhism has too often focused on scriptures and normative doctrines and not enough on the practical ideas and contexts that significantly impacted the lives of actual Buddhists He sought to reveal these lived concerns in the massive trove of Buddhist inscriptions which often expose the habits and ideas of the tradition's most prominent donors many of whom were monastics as well as the everyday concerns of monks and nuns whose views did not always dovetail with canonical sources Even in his treatment of canonical sources Schopen has shown that the standard portrait of a Buddhist monk or nun fails to match a careful reading of their law codes his work on the Mulasarvastivada vinaya has required scholars to substantially reimagine the legal and ritual obligations as well as the economic concerns that preoccupied the minds of Buddhist jurists Schopen has in essence brought the Buddha down to earth revealing that this is precisely where most Indian Buddhists encountered him The contributions in this celebratory volume reflect this legacy and Schopen's considerable impact on our understanding of Buddhists in India

Hegewald,2023-03-20 Have you ever thought about dependencies in Asian art and architecture Most people would probably assume that the arts are free and that creativity and ingenuity function outside of such reliances However the 13 chapters provided by specialists in the fields of Asian art and architecture in this volume show that those active in the visual arts and the built environment operate in an area of strict relations of often extreme dependences Material artefacts and edifices are dependent on the climate in which they have been created on the availability of resources for their production on social and religious traditions which may be oral or written down and on donors patrons and the art market Furthermore gender and labour dependencies play a role in the creation of the arts as well Despite these strong and in most instances asymmetrical dependencies artists have at all times found freedoms in expressing their own imagination vision and originality This shows that dependencies and freedoms are not necessarily strictly separated binary opposites but that at least in the area of the history of art and architecture in Asia the two are interconnected in what are often complex and multifaceted layers

Introduction to the Study of Mediaeval Indian Sculpture Kenneth de Burgh Codrington,1929 **Water and Historic**

Settlements Yaaminey Mubayi,2022-09-13 This book explores the manner in which human societies understood and managed scarce water resources Focusing on the arid rain shadow region of Marathwada it documents the panoramic

history of this region's most important resource water. It shows how water delineates the establishment of political authority, marks the intersection of networks of trade and pilgrimage and is the bearer of identity through community memories. The book foregrounds how, as a material as well as a ritual and symbolic element, water flows across the boundaries of caste, sect and religion, bringing communities together and linking the past with the present. It not only analyses textual and archaeological sources but also focuses on oral narratives and their potential to provide consensual as well as alternative narratives of the historical and cultural landscape of Ellora, Khuldabad, Daulatabad. It also shows how water has been framed in myriad forms in human history as a ritual, allegorical element present in the myths and cosmology that order the sacred geography of pilgrimage centres as a physical, tangible presence manipulated through human technology to sustain the population and finally as a subliminal driver for historic agency, its often hidden underground presence underwriting the region's vitality over the past millennium. A nuanced history of water over millennia, this book will be of great interest to scholars and researchers of environmental history, historical geography, South Asian studies, heritage studies and environmental studies.
