Journal of the House of Representatives Illinois. General Assembly. House of Representatives,1996 **Genes and Insurance** Marcus Radetzki,Marian Radetzki,Niklas Juth,2003-11-06 The result of two key social developments in recent years are examined here the partial dismantling of the welfare state and the progress of genetics Genetic insights are increasingly valuable for risk assessment and insurers would like to use these insights to help determine premiums Combined with the fact that social welfare is being curtailed this could potentially create an uninsured high risk population Along with considerations of autonomy and privacy this is the basis for an ethical critique of insurer s access to information The result has often been regulation of such information but the authors argues that due to adverse selection regulation will not solve these problems and this may jeopardize the survival of private personal insurance Instead we should look towards the resurrection of social insurance a key component of the welfare state This will interest academic researchers as well as professionals involved with genetics and insurance **Essentials of Public Health Biology** Constance Battle,2009-10-06

Genetic Privacy: An Evaluation Of The Ethical And Legal Landscape Terry Sheung-hung Kaan, Calvin Wai-loon Ho, 2013-07-04 Privacy is an unwieldy concept that has eluded an essentialised definition despite its centrality and importance in the body of bioethics The compilation presented in this volume represents continuing discussions on the theme of privacy in the context of genetic information It is intended to present a wide range of expert opinion in which the notion of privacy is examined from many perspectives in different contexts and imperatives and in different societies with the hope of advancing an understanding of privacy through the examination and critique of some of its evolving component concepts such as notions of what constitute the personal the context of privacy the significance and impact of the relational interests of others who may share the same genetic inheritance and mechanisms for the protection of privacy as well as of their limitations among others More specifically the discussions in this volume encourages us to think broadly about privacy as encompassing values that are entailed in the sociality of context and of relations and also as freedom from illegitimate and excessive surveillance A long standing question that continues to challenge us is whether genetic information should be regarded as exceptional as it is often perceived A conclusion that could be derived from this volume is that while genetic information may be significant it is not exceptionally so The work presented in this volume underlines the continuing and growing relevance of notions of privacy to genomic science and the need to take ownership of a genetic privacy for the future through broad rigorous and open discussion Contributors Alastair V Campbell Benjamin Capps Jacqueline JL Chin Oi Lian Kon Kenji Matsui Thomas H Murray Nazirudin Mohd Nasir Dianne Nicol Anh Tuan Nuyen Onora O'Neill Margaret Otlowski Yvette van der Eijk Chunshui Wang Ross S White
