Rwanda Yesterday Patricia Bamurangirwa, 2013-10-23 Patricia Bamurangirwa was born in Rwanda in 1949 The outbreak of the civil war in the 1960s ended her education and her family fled from Rwanda first as refugees to the Congo and Uganda and later to Tanzania and Kenya Deprived of an education and stable upbringing Patricia has become interested in the reason behind the wars and violence Rwanda and its people suffered She decided to write this book to set the record straight regarding the common myths about the history of Rwanda and its people This book is divided into three parts Starting with the formation of Rwanda it shows how the tribes Banyarwanda Tutsi Twa and Hutu lived in harmony under the rule of a king It then examine Rwanda under colonialism when the Belgians devised an ethnic system that raised the Hutus above the Tutsis and laid the groundwork of the future tensions in the country Finally the last part examines Rwanda as it

entered the period of the 1994 genocide when over 20% of the population was killed and the world stood by The book does not simply narrate events in Rwanda s history but seeks to provide some clarity on the cause rather than the effects of the current state of affairs It is not a book simply about the genocide but a look at how the country s history has shaped the events of modern times It is important to understand Rwanda s successive periods of history in order to understand today s Rwanda and this book presents a fresh perspective on the country and its people

The Laws of Genocide Thomas W. Simon,2007-06-30 The tools of reason offer the best hope for the international community to confront the increasing incidents of hate throughout the world A historically informed normative examination of the elements of the crime of genocide provides an excellent case study of how the law reason s handmaiden enhances understanding and improves practical ways of dealing with global injustices How should we confront hate As political activists we could resort to fighting hate with hate As concerned citizens we could consciously ignore or actively protest hate As committed educators we could put the implements and survivors of hate on display As committed scholars we could resuscitate the idea of evil As humanitarian jurists we could put individual hate mongers on trial Part I of this book makes a case for making the maximum use of reason to deal with hate This means that we should actively debate those who promote hate Further as a close look at the history of applying law to incidents of hate and violence illustrates the courtroom proves to be an excellent place to demonstrate the virtues of applying the tools of reason not to global evils but to the grave injustices of the world In Part II Simon demonstrates the power of legal analysis in enhancing our understanding of genocide probably the worst injustice imaginable A close examination of each purported element of the crime of genocide redirects misguided turns taken by international jurists Contrary to a more realistic perspective adopted at the Nuremberg trials jurists have mistakenly modeled international criminal law on national criminal law which focuses on individual responsibility However the cases of grave injustices throughout the 20th century amply demonstrate the primary collective responsibility underlying incidences of genocide The failure to prosecute criminal organizations for genocide has and will continue to have disastrous results While the Nuremberg tribunal at least disbanded the responsible Nazi organizations current war crimes tribunals have allowed organizations responsible for the Rwandan genocide to continue to wreak havoc throughout Central Africa If the international community cannot forge a common understanding of genocide then it has little hope of establishing an international legal order or a global ethics

The Limits of Common Humanity Samuel Jarvis,2022-06-27 What motivates states to protect populations threatened by mass atrocities beyond their own borders Most often states and their representatives appeal to the principle of common humanity acknowledging a conscience shocking quality that demands a moral response But though the idea of a common humanity is powerful the question remains to what extent is it effective in motivating action The Limits of Common Humanity provides an ambitious interdisciplinary response to this question theorizing the role of humanity as a motivational concept by

building on insights from international relations political philosophy and international law Through this analysis Samuel Jarvis examines the influence the concept of humanity has had on the creation and mission of the Responsibility to Protect R2P commitment while highlighting the challenges that have restricted its application in practice By providing a new framework for thinking about how political legal and moral arguments interact during the process of collective decision making Jarvis explores the contradictory ways in which states approach the protection of human beings from mass atrocity crimes both domestically and internationally In the context of a rapidly changing global order The Limits of Common Humanity is a timely reappraisal of the R2P concept and its future application arguing for a more politically motivated response to human protection that moves beyond an appeal for morality **Proclivity to Genocide** Grace O.

Okoye,2014-08-20 This book examines proclivity to genocide in the protracted killings that have continued for decades in the northern Nigeria ethno religious conflict spanning from the 1966 northern Nigeria massacres of thousands of Ibos up to the present ongoing killings between extremist Muslims and Christians or non Muslims in the region It explores the ethnic and religious dimensions of the conflict over five phases to investigate genocidal proclivity to the killings and the extent to which religion foments and escalates the conflict This book adopts a conceptual analytic approach of establishing similarity of genocidal patterns to the northern Nigeria ethno religious conflict by examining genocidal occurrences and massacres in history particularly the twentieth century contemporary genocides for an understanding of genocide With this reference frame the study structures a Genocide Proclivity Model for identifying inclinations to genocide and derives a substantive theory using the Strauss and Corbin 1990 approach By identifying genocidal intent as underlying the various manifestations and causes of genocide in specific genocide cases the book establishes that genocidal proclivity or the intent to exterminate the other on the basis of religion and or ethnicity underlies most of the northern Nigerian episodic but protracted killings The book s analytic framework and approach are grounded in identifiable and provable evidences of specific intent to annihilate the other mostly involving extremist Muslims intent to cleanse northern Nigeria of Christians and other non Muslims through the exclusionary ideology of imposition of the Sharia Law and to force assimilation or extermination through massacres and genocidal killings of those who refuse to assimilate or adopt the Muslim ideology The study establishes that the genocidal inclinations to the conflict have remained latent because of the intermittent but protracted nature of the killings and lends credence to the conception of genocidal intent and its covertness in situations of genocidal intermittency The book unearths the latency of episodic genocide in the northern Nigeria ethno religious conflict prescribes recommendations and launches a clarion call for international intervention to stop the genocide **Criminology, Civilisation and the New World Order**
