Gender and Genre in Medieval Literature Elaine Treharne, 2002 Medievalists demonstrate how a focus on gender can transform an approach to literary texts and genres The essays in this annual English Association volume provide useful examples of how the conventions behind and the expectations evoked by literary modes and genres help to shape what purports to be an entirely essential and or socially constructed aspect of identity of the he she or I of the literary text Ranging across materials from Old English Biblical poetry and hagiography to the late Middle English romances and fabliaux the essays are united by a commitment to a variety of traditional scholarly methodologies But each examines afresh an important aspect of what it means to be man or woman husband son mother daughter wife devotee or love in the context of particular kinds of medieval literary texts Contributors ANNE MARIE D ARCY HUGH MAGENNIS DAVID SALTER MARY SWAN ELAINE TREHARNE GREG WALKER Linguavideo, 1991 **Vox Feminae** John Francis Plummer, 1981 It is the artistic use of the female voice as role persona or rhetorical stance in particular lyrical traditions or by particular poets that is of interest here Woman s songs are found in all parts and periods of medieval Europe the study of medieval woman s song is primarily the study of the image of a voice This is not an attempt to completely cover the field but to offer an introduction and guide to those who are not familiar with woman s song and a stimulation to those who are **A Necessary Fire** Marilyn Johnson, 1992 **The Cold Counsel** Sarah M.
