Race, Ethnicity, and Place in a Changing America John W. Frazier, Eugene Tettey-Fio, 2006 *Ethnic Landscapes of America* John A. Cross, 2017-06-19 This volume provides a comprehensive catalog of how various ethnic groups in the United States of America have differently shaped their cultural landscape Author John Cross links an overview of the spatial distributions of many of the ethnic populations of the United States with highly detailed discussions of specific local cultural landscapes associated with various ethnic groups This book provides coverage of several ethnic groups that were omitted from previous literature including Italian Americans Chinese Americans Japanese Americans and Arab Americans plus several smaller European ethnic populations The book is organized to provide an overview of each of the substantive ethnic landscapes in the United States Between its introduction and conclusion which looks towards the future the chapters on the various ethnic landscapes are arranged roughly in chronological order such that the timing of the earliest significant surviving landscape contribution determines the order the groups will be viewed Within each chapter the contemporary and historical spatial distribution of the ethnic groups are described the historical geography of the group s settlement is reviewed and the salient aspects of material culture that characterize or distinguish the group s ethnic landscape are discussed *Ethnic Landscapes of America* is designed for use in the classroom as a textbook or as a reader in a North American regional course or a cultural geography course This volume also can function as a detailed summary reference that should be of interest to geographers historians ethnic scholars other social scientists and the educated public who wish to understand the visible elements of material culture that various ethnic populations have created on the landscape Forced Migration in/to Canada Christina R. Clark-Kazak, 2024-10-22 Forced migration shaped the creation of Canada as a settler state and is a defining feature of our contemporary national and global contexts Many people in Canada have direct or indirect experiences of refugee resettlement and protection trafficking and environmental displacement Offering a comprehensive resource in the growing field of migration studies *Forced Migration in to Canada* is a critical primer from multiple disciplinary perspectives Researchers practitioners and knowledge keepers draw on documentary evidence and analysis to foreground lived experiences of displacement and migration policies at the municipal provincial territorial and

federal levels From the earliest instances of Indigenous displacement and settler colonialism through Black enslavement to statelessness trafficking and climate migration in today's world contributors show how migration as a human phenomenon is differentially shaped by intersecting identities and structures Particularly novel are the specific insights into disability race class social age and gender identity Situating Canada within broader international trends norms and structures both today and historically Forced Migration in to Canada provides the tools we need to evaluate information we encounter in the news and from government officials colleagues and non governmental organizations It also proposes new areas for enquiry discussion research advocacy and action

Regionalization of the World Pierre Beckouche, Yann Richard, 2024-04-16 On the world map macro regions or global regions have gradually emerged with varying degrees of success and following different trajectories The authors of this book attempt to determine whether within the context of globalization these macro regions have become an additional level in the spatial deployment of numerous actors and whether they have come to stand between the national and global levels This question has arisen because the increasing scales of trade environmental problems migration routes energy distribution the construction of major infrastructures etc transcend national boundaries and are leading states to implement macro regional cooperation The authors ask whether these large regional groupings are becoming genuine territories and are the fruit of in depth regional integration economic institutional legal normative political cultural and in terms of identity If so these global regions would therefore become referents that make sense and take root in social representations

Ain't There No More Carl A. Brasseaux, Donald W. Davis, 2017-02-06 Winner of the 2018 Louisiana Literary Award given by the Louisiana Library Association For centuries outlanders have openly denigrated Louisiana's coastal wetlands residents and their stubborn refusal to abandon the region's fragile prairies tremblants despite repeated natural and more recently man made disasters Yet the cumulative environmental knowledge these wetlands survivors have gained through painful experiences over the course of two centuries holds invaluable keys to the successful adaptation of modern coastal communities throughout the globe As Hurricane Sandy recently demonstrated coastal peoples everywhere face rising sea levels disastrous coastal erosion and inevitably difficult lifestyle choices Along the Bayou State's coast the most insidious challenges are man made Since channelization of the Mississippi River in the wake of the 1927 flood which diverted sediments and nutrients from the wetlands coastal Louisiana has lost to erosion subsidence and rising sea levels a land mass roughly twice the size of Connecticut State and national policymakers were unable to reverse this environmental catastrophe until Hurricane Katrina focused a harsh spotlight on the human consequences of eight decades of neglect Yet even today the welfare of Louisiana's coastal plain residents remains at best an afterthought in state and national policy discussions For coastal families the Gulf water lapping at the doorstep makes this morass by no means a scholarly debate over abstract problems *Ain't There No More* renders an easily read history filled with new insights and possibilities Rare previously unpublished images documenting a disappearing way of life accompany the narrative The authors bring nearly a

century of combined experience to distilling research and telling this story in a way invaluable to Louisianans to policymakers and to all those concerned with rising sea levels and seeking a long term solution

The Life of North American Suburbs Jan Nijman, 2020-02-24 This book chronicles and explains the role of suburbs in North American cities since the mid twentieth century Examining fifteen case studies from New York to Vancouver Atlanta to Chicago Montreal to Phoenix The Life of North American Suburbs traces the insightful connection between the evolution of suburbs and the cultural dynamics of modern society Suburbs are uniquely significant spaces their creation and evolution reflect the shifting demographics race relations modes of production cultural fabric and class structures of society at large The case studies investigate the place of suburbs within their wider metropolitan constellations the crucial role they play in the cultural economic political and spatial organization of the city Together the chapters paint a compelling portrait of North American cities and their dynamic suburban landscapes

Before Renaissance John F. Bauman, Edward K. Muller, 2006-10-29 Before Renaissance examines a half century epoch during which planners public officials and civic leaders engaged in a dialogue about the meaning of planning and its application for improving life in Pittsburgh Planning emerged from the concerns of progressive reformers and businessmen over the social and physical problems of the city In the Steel City enlightened planners such as Frederick Law Olmsted Jr and Frederick Bigger pioneered the practical approach to reordering the chaotic urban industrial landscape In the face of obstacles that included the embedded tradition of privatism rugged topography inherited built environment and chronic political fragmentation they established a tradition of modern planning in Pittsburgh Over the years a melange of other distinguished local and national figures joined in the planning dialogue among them the park founder Edward Bigelow political bosses Christopher Magee and William Flinn mayors George Guthrie and William Magee industrialists Andrew Carnegie and Howard Heinz financier Richard King Mellon and planning luminaries Charles Mulford Robinson Frederick Law Olmsted Jr Harland Bartholomew Robert Moses and Pittsburgh s Frederick Bigger The famed alliance of Richard King Mellon and Mayor David Lawrence which heralded the Renaissance owed a great debt to Pittsburgh s prior planning experience John Bauman and Edward Muller recount the city s long tradition of public private partnerships as an important factor in the pursuit of orderly and stable urban growth Before Renaissance provides insights into the major themes benchmarks successes and limitations that marked the formative days of urban planning It defines Pittsburgh s key role in the vanguard of the national movement and reveals the individuals and processes that impacted the physical shape and form of a city for generations to come

Atlantic Automobilmism Gijs Mom, 2014-12-01 Our continued use of the combustion engine car in the 21st century despite many rational arguments against it makes it more and more difficult to imagine that transport has a sustainable future Offering a sweeping transatlantic perspective this book explains the current obsession with automobiles by delving deep into the motives of early car users It provides a synthesis of our knowledge about the emergence and persistence of the car using a broad range of material including novels poems films and

songs to unearth the desires that shaped our present car society Combining social psychological and structural explanations the author concludes that the ability of cars to convey transcendental experience especially for men explains our attachment to the vehicle Sediment Records of Biomass Burning and Global Change James S. Clark, Helene Cachier, Johann G. Goldammer, Brian J. Stocks, 2013-06-29 Biomass burning profoundly affects atmospheric chemistry the carbon cycle and climate and may have done so for millions of years Bringing together renowned experts from paleoecology fire ecology atmospheric chemistry and organic chemistry the volume elucidates the role of fire during global changes of the past and future Topics covered include the characterization of combustion products that occur in sediments including char soot fly ash and polycyclic aromatic hydrocarbons the calibration of these constituents against atmospheric measurements from wildland and prescribed fire emissions spatial and temporal patterns in combustion emissions at scales of individual burns to the globe

Scale in Remote Sensing and GIS Dale A. Quattrochi, Michael F. Goodchild, 2023-01-13 The recent emergence and widespread use of remote sensing and geographic information systems GIS has prompted new interest in scale as a key component of these and other geographic information technologies With a balanced mixture of concepts practical examples techniques and theory *Scale in Remote Sensing and GIS* is a guide for students and users of remote sensing and GIS who must deal with the issues raised by multiple temporal and spatial scales Sixteen pages of full color photographs help demonstrate key points made in the text **Earthquake Insurance** Risa Palm, 2019-03-07 This book explores the nature of the earthquake hazard and the availability of insurance and reports on a longitudinal study of homeowners in four California counties to chart their growing concern with earthquakes *Cities of Culture* John R. Gold, 2016-12-05 City authorities in recent years have competed vigorously to gain the right to host international festivals In doing so they are heirs to a long tradition since cities have always served as a natural location for festivals and fairs providing settings on a scale impossible elsewhere *Cities of Culture* examines the role of the Western city as the scene of staged cultural events over the last 150 years Adopting a lively comparative perspective it highlights the development of international festivals since London's Great Exhibition of 1851 Making extensive use of case studies and illuminating examples it offers thought provoking insight into the material and symbolic significance of international festivals in urban affairs The book opens with an historical analysis of the role of the city as centre for celebrations rites and festivities from Antiquity to the French Revolution The next three sections of the book each focus on a different form of international festival The first deals with the history of staging the International Expositions with case studies of the Great Exhibition 1851 New York's World's Fair 1939-40 and Montreal's Expo 67 1967 The next part covers the Summer Olympic Games from their revival at Athens in 1896 to the Atlanta Games 1996 discussing the implications of their fluctuating fortunes for their host cities The third section discusses the history of a recently founded event that is assuming ever greater importance the European Cities of Culture programme The conclusion provides an overview of the events that celebrated the Millennium and examines the prospects for international festivals as

part of the urban agenda of the twenty first century Cities of Culture will appeal to students of cultural history urban and cultural geography specialists in arts and heritage events management and anyone with an interest in the development of the contemporary Western city **Long-term Environmental Change in Arctic and Antarctic Lakes** Reinhard

Pienitz, Marianne S.V. Douglas, John P. Smol, 2007-11-08 Concerns about the effects of global climate change have focused attention on the vulnerability of circumpolar regions Long term historical data are needed to better understand the magnitude and direction of environmental change related to both natural and anthropogenic causes as well as to assess patterns of natural variability The paucity of instrumental data requires that proxy methods be used The abundance of lakes throughout the Arctic and Antarctic makes paleolimnological approaches especially powerful tools to assist interpretations of environmental change This book provides a synthesis of the broad spectrum of techniques available for generating long term environmental records from circumpolar lakes It also provides overviews of the geographic extent of paleolimnological work completed thus far in these regions It explores the diverse ways in which paleolimnology is used to address the pressing and emerging environmental issues of high latitude regions By providing both an introduction and in depth reviews this volume is of interest to students and advanced researchers alike who are studying earth atmospheric and environmental sciences

Environmental Information Management And Analysis W K Michener, J W Brunt, S G Stafford, 1994-08-08 Most environmental studies are based upon data collected at fine spatial scales plots sediments cores etc Furthermore temporal scales of these studies have been relatively short days weeks months and few studies have exceeded three years duration the typical funding cycle Despite this history environmental scientists are now being called *Urban Geomorphology* Mary J Thornbush, Casey D. Allen, 2018-07-17 *Urban Geomorphology Landforms and Processes in Cities* addresses the human impacts on landscapes through occupation urbanization and development as a contribution to anthropogenic geomorphology or anthropogeomorphology This includes a focus on land clearance conservation issues pollution decay and erosion urban climate and anthropogenic climate change These topics as well as others are considered to shed more light on the human transformation of natural landscapes and the environmental impacts and geomorphological hazards that environmental change can encompass Its multidisciplinary approach is appropriate for audiences from a range of disciplines and professions from geologists conservationists and land use planners to architects and developers *Urban Geomorphology* not only transcends disciplines but also covers varied spatial temporal frameworks and presents a diverse set of approaches and solutions to human impacts and geomorphological hazards within urban landscapes Features a cross disciplinary perspective highlighting the importance of the geosciences to environmental science engineering and public policy Focuses on the built environment as the location of concentrated human impacts and change Provides an international scope including case studies from urban areas around the world
