Geographical Imagination In America 1880 1950:

The Geographical Imagination in America, 1880-1950 Susan Schulten, 2001-04 Schulten examines four enduring institutions of learning that produced some of the most influential sources of geographic knowledge in modern history maps and atlases the National Geographic Society the American university and public schools **BOOK JACKET** *The Geographical Imagination in America, 1880-1950* Susan Schulten, 2001 *Eliza Scidmore* Diana P. Parsell, 2023 Deeply researched and briskly written this first ever biography of Eliza Scidmore the pioneering journalist who fought to bring Japanese cherry trees to Washington DC draws heavily on her own writings to follow major events of a half century as seen through the eyes of a remarkable woman who was far ahead of her time

Total Defense Andrew Preston, 2025 In the 1930s amid rising fascism FDR and the New Dealers invented the doctrine of national security which obligated the state to guard against not just territorial invasion but also remote threats to the American way of life Total Defense explores how the new idea of national security transformed the United States and its place in the world

The Geopoetics of Modernism Rebecca Walsh, 2015-01-27 The Geopoetics of Modernism is the first book to illuminate the links between American modernism and the geographic discourse of the time Rebecca Walsh explores Walt Whitman Gertrude Stein Langston Hughes and H D s engagements with contemporary geographic theories and sources including the cosmological geography of Alexander von Humboldt and Mary Somerville the environmental determinism of Ellen Churchill Semple and mainstream textbooks and periodicals which informed the formal and political dimensions of their work Walsh argues that the dominant geographic paradigms of the nineteenth and twentieth centuries gave authority to experimental writers who were breaking with other forms of authority enabling them to create transnational forms of belonging on the exhilarating landscape of nations continents and the globe By examining modernism alongside environmental determinist geography she maps a poetic terrain where binaries such as west versus non west or imperial center versus colonial periphery are destabilized The Geopoetics of Modernism reveals the geographic terms through which American modernist poetry interrogated prevailing ideas of orientalism primitivism and American exceptionalism

Geopolitics and the Quest for Dominance Jeremy Black, 2015-11-25 History and geography delineate the operation of power not only its range but also the capacity to plan and the ability to implement Approaching state strategy and policy from the spatial angle Jeremy Black argues that just as the perception of power is central to issues of power so place and its constraints and relationships is partly a matter of perception not merely map coordinates Geopolitics he maintains is as much about ideas and perception as it is about the actual spatial dimensions of power Black s study ranges widely examining geography and the spatial nature of state power from the 15th century to the present day He considers the rise of British power geopolitics and the age of Imperialism the Nazis and World War II and the Cold War and he looks at the key theorists of the latter 20th century including Henry Kissinger Francis Fukuyama and Samuel P Huntington Philip Bobbitt Niall Ferguson and others

Denis Cosgrove, 2012-11-25 Leading geographer Denis Cosgrove provides a series of personal reflections on the complex connections between seeing imagining and representing the world geographically In a series of eloquent essays he draws upon pictorial images including maps sketches cartoons paintings and photographs to explore and elaborate upon the many and varied ways in which the vast and varied earth and at times the heavens beyond have been both imagined and represented as a place of human habitation The essays include reflections upon geographical discovery urban cartography and utopian visions ideas of landscape and the shaping of America wilderness and masculinity conceptions of the Pacific and the imaginative grip of the Equator Extensively illustrated this engaging work reveals the richness of the geographical imagination as expressed over the past five centuries **Companion Encyclopedia of Geography** Ian Douglas, Richard Huggett, Chris Perkins, 2018-12-12 This revised edition takes the theme of place as the unifying principle for a full account of the discipline at the beginning of the twenty first century The work comprises 64 substantial essays addressing human and physical geography and exploring their inter relations The encyclopedia does full justice to the enormous growth of social and cultural geography in recent years Leading international academics from ten countries and four continents have contributed ensuring that differing traditions in geography around the world are represented In addition to references the essays also have recommendations for further reading As with the original work the new Companion Encyclopedia of Geography provides a state of the art survey of the discipline and is an indispensable addition to the reference shelves of libraries supporting research and teaching in geography **The West and the Word** Steffen Wöll, 2020-10-12 Western expansion in North America has mainly been described as either a linear sequence energized by nineteenth century nation building processes at a moving frontier or as the practice of settler colonialism and its exploitation of resources and displacement of nonwhite peoples This book suggests that shifting the focus from this binary pattern towards spatial imaginations and spatialization processes a new theoretical framework developed at SFB 1199 provides novel insights into the placemaking dynamics of the American West It brings to light a discursive diversity that often contradicts unidirectional interpretive patterns It becomes clear that while some discourses solidified into spatial metanarratives like the character shaping clash of civilizations at the frontier or manifest destiny alternative spatial imaginations exist juxtaposed to or obfuscated by canonical interpretations Making use of a variety of sources including works of literature poetry newspapers paintings and speeches to access spatialization processes on several sociocultural scales the book presents a careful exploration of the parameters that informed the creation affirmation and subversion of spatial imagination of the American West throughout the nineteenth century from the perspective of American Studies **Engineering Earth** Stanley D. Brunn, 2011-03-19 This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social environmental and engineering

sciences Together they document and illustrate with case studies maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical contemporary and postmodern perspectives This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local regional and global scales and from disciplinary and trans disciplinary perspectives **Italian Imprints on**

Nicholas Entrikin,Doug Richardson,2012-03-15 There has been a remarkable resurgence in the past decade of intellectual interplay between geography and the humanities in both academic and public circles Terminology and concepts such as space place landscape mapping and geography are becoming pervasive as conceptual frameworks and core metaphors in recent publications by humanities scholars and well known writers Envisioning Landscapes Making Worlds examines the depth and complexity of human meaning invested in maps attached to landscapes and embedded in the spaces and places of modern life The clashing and blending of cultures caused by globalization and the new technologies that profoundly alter human environmental experience suggest new geographical narratives and representations that are explored here by a multidisciplinary group of authors With contributions from leading scholars this text is essential reading for scholars and students seeking to understand the new synergies and interconnectedness of geography and the humanities

The Killing of Cambodia: Geography, Genocide and the Unmaking of Space James A. Tyner,2017-05-15 Between 1975 and 1978 the Khmer Rouge carried out genocide in Cambodia unparalleled in modern history Approximately 2 million died almost one quarter of the population Taking an explicitly geographical approach this book argues whether the Khmer Rouge s activities not only led to genocide but also terraced the erasure of space In the Cambodia of 1975 the landscape would reveal vestiges of an indigenous pre colonial Khmer society a French colonialism and American intervention The Khmer Rouge however were not content with retaining the past inscriptions of previous modes of production and spatial practices Instead they attempted to erase time and space to create their own utopian vision of a communal society The Khmer Rouge s erasing and reshaping of space was thus part of a consistent sacrifice of Cambodia and its people a brutal justification for the killing of a country and the birth of a new place Democratic Kampuchea While focusing on Cambodia the book provides a clearer geographic understanding to genocide in general and insights into the importance of spatial factors in geopolitical conflict
