from a focus on pedagogy the how of teaching and towards curriculum the what of teaching Ofsted s revised inspection framework reflects this shift and their plans to deep dive into subject areas meaning that teachers and department heads now need a much greater understanding of curricular structures leave many educators having to think about their subject in new ways Luckily for geography teachers however bestselling author Mark Enser provides plenty of insightful subject specific guidance in this all encompassing book Mark explores both the purpose of the geography curriculum and its various applications in practice He details how teachers can take their students learning beyond the acquisition of knowledge to transform how they see the world He also tackles the changing nature of school geography shares a variety of case studies and offers his take on how best to facilitate geographical enquiry and fieldwork The first part of the book considers the issue of purpose by looking at the role of the school in society and then shows the place that geography occupies within it It also considers the history of the subject so as to help geography teachers better understand where they stand today and concludes by discussing how the concepts of powerful knowledge and GeoCapabilities can help them find their way again The second part is a practical guide which illustrates how to put this theory of curriculum purpose into practice It explores the steps which must be taken to create a powerful geography curriculum by deciding on content and places to be studied putting the components into a sequence and then using all this to do geography It will also discuss the extent to which

teachers need to consider the future and respond to the concerns of the wider world when planning the curriculum Suitable
