Geography And Ownership As Bases For Economic Accounting:

Geography and Ownership as Bases for Economic Accounting Robert E. Baldwin, Robert E. Lipsey, David Richardson, 2007-12-01 Geography and Ownership as Bases for Economic Accounting provides a forum for leading specialists in trade and international economics to explore whether changes in the world economy have increased the usefulness of international accounts drawn up on the basis of ownership rather than on geography The papers in this volume suggest that ownership based national accounts are helpful in understanding trade and financial transactions among globalized enterprises Individual chapters emphasize this perspective through accounting exercises studies of individual countries and studies of foreign direct investment and its relation to national economies This volume gives trade and international economists the data and resources to renew discussion of this timely issue

International and Interarea Comparisons of Income, Output, and Prices Alan Heston, Robert E. Lipsey, 2007-12-01 Economists wish to compare prices real income and output across countries and regions for many purposes In the past such comparisons were made in nominal terms or by using exchange rates across countries ignoring differences in price levels and thus distorting the results Great progress has been made in interspatial comparisons in the past thirty years but descriptions and discussions of the new measures have been scattered in unpublished or inaccessible papers International and Interarea Comparisons of Income Output and Prices includes discussions of developments in the United Nations International Comparison Program the largest effort in this field and in the ICOP program on the production side including efforts in both to extend the comparisons to the formerly planned economies Other papers in this volume explore new programs on interspatial comparisons within the United States There are also theoretical papers on how interspatial comparisons should be made and several examples of uses of such comparisons

Multinational Firms in the World Economy Giorgio Barba Navaretti, Anthony J. Venables, 2020-06-16 Depending on one's point of view multinational enterprises are either the heroes or the villains of the globalized economy Governments compete fiercely for foreign direct investment by such companies but complain when firms go global and move their activities elsewhere Multinationals are seen by some as threats to national identities and wealth and are accused of riding roughshod over national laws and of exploiting cheap labor However the debate on these companies and foreign direct investment is rarely grounded on sound economic arguments This book brings clarity to the debate With the contribution of other leading experts Giorgio Barba Navaretti and Anthony Venables assess the determinants of multinationals' actions investigating why their activity has expanded so rapidly and why some countries have seen more such activity than others They analyze their effects on countries that are recipients of inward investments and on those countries that see multinational firms moving jobs abroad The arguments are made using modern advances in economic analysis a case study and by drawing on the extensive empirical literature that assesses the determinants and consequences of activity by multinationals The treatment is rigorous yet accessible to all readers with a background in economics whether students or professionals Drawing out policy

implications the authors conclude that multinational enterprises are generally a force for the promotion of prosperity in the world economy

Handbook of Research on Innovation and Clusters Charlie Karlsson, 2008 This volume is an important step in furthering the discussion about how cluster strategies work and the implications for theory and policy

Jennifer Clark Review of Regional Studies The role of innovations and clusters has increasingly dominated local and regional development policies in recent decades This authoritative and accessible Handbook considers important aspects of high tech clusters analyses insightful cluster case studies and provides a number of recommendations for cluster policies The chapters in this Handbook are written by international experts in the field and present evidence of the scope effects and potential of clusters as concentrations of innovative activities The authors emphasize that cluster development is not the only option for local and regional development and argue that for cluster policies to be worthwhile supporting policies in fields such as education R D transportation and communication infrastructure must accompany most cluster policies Furthermore several contributions stress that clusters often develop along a life cycle that may end with decline and even the disappearance of clusters Consequently this Handbook provides the basis for improving both research on innovation and clusters and the formulation and implementation of cluster policies Furnishing the reader with rich comprehensive discussion of innovations and clusters this Handbook will be an essential source for researchers and academics in the field as well as policymakers planners and specialists development experts and agencies and consultants

Technological Change and Economic Catch-up Grazia D. Santangelo, 2005-01-01 This book tackles the issue of technological and economic catch up by examining the role that public research institutions and local policy play in the promotion of this process by fostering local science technology linkages with incoming foreign owned multinationals

Influence of WTO and Global Dynamics on Trade Flows Debashis Chakraborty, Oindrila Dey, 2024-10-10 p This book is a machine generated literature overview that explores the impact of the World Trade Organization WTO on international trade and its development It looks at international trade before and after 1995 when WTO was established It highlights the journey of the reciprocity based reforms under WTO that were expected to help the developing and less developed countries LDCs more vis vis their developed counterparts given the existence of systemic and structural bottlenecks in the latter territories The enabling steps were further expected to promote exports from developing countries and LDCs in line with their comparative advantage patterns enhance the wage level and in turn facilitate development of local population The book showcases how during the first decade after WTO inception a considerable progress was made for facilitating exports from the lower and lower middle income countries through crucial provisions like less than full reciprocity LTFR Generalized System of Preferences GSP support measures under Aid for Trade zero duty preferences under Special and Differential Treatment SDT and so on However the pace of WTO reforms has slowed down in the aftermath of the sub prime crisis in 2008 09 and subsequent focus on formation of regional trade agreements RTAs In particular in the aftermath of Covid 19 a trend towards de globalization has been noticed with considerable

ramifications for the development of lower income countries In this background there is a need to analyze how the deepening of trade flows and the subsequent de globalization waves in the global canvas have traversed different paths in different continents and draw the appropriate lessons for the understanding the trade development interlinkage therein With insightful observations from the human editors this machine generated overview would be of interest to academicians policy research community advisory research community and students of international trade globally Global Economic Prospects 2003, 2003 The 13th edition of this annual publication focuses on the global and national dimensions of the investment climate for developing countries that is the policy and institutional environment that fosters entrepreneurship and productive investment Issues discussed include the effects of current developments in the world economy ways that the international community can help foster economic growth and reduce poverty levels the need for sound national policies particularly to encourage competition in order for developing countries to reap the benefits of globalisation and the potential for a new World Trade Organization agreement on investment and competition

The Oxford Handbook of the Political Economy of International Trade Lisa L. Martin, 2015-03-27 The Oxford Handbook of the Politics of International Trade surveys the literature on the politics of international trade and highlights the most exciting recent scholarly developments It examines the impact of domestic societal actors domestic institutions and international interactions on trade policy and trade flows as well as building on this basic analytical framework Including contributions from prominent scholars around the globe and from multiple theoretical and methodological traditions the volume considers the development of concepts and policies about international trade the influence of individuals firms and societies the role of domestic and international institutions and the interaction of trade and other issues such as monetary policy environmental challenges and human rights Showcasing both established theories and findings and cutting edge new research the Handbook is a valuable reference for scholars of political economy

Transforming the European Economy Martin Neil Bailly, Jacob Funk Kirkegaard, 2004-09-10 Europe grew rapidly for many years but now faced with greater challenges several of the large economies in Europe have either failed to generate enough jobs or have failed to achieve the highest levels of productivity or both This study explores why Europe's growth slowed what contribution information technology makes to growth and what policies could facilitate economic transformation It emphasizes a system with strong work incentives and a high level of competitive intensity Europe doesn't need to eliminate its protections for individuals the authors conclude but both social programs and policies toward business must be reoriented so that they encourage economic change

Multinational Enterprises, International Trade, and Productivity Growth Wolfgang Keller, Stephen R. Yeaple, 2003-12-01 We estimate international technology spillovers to U S manufacturing firms via imports and foreign direct investment FDI between 1987 and 1996 In contrast to earlier work our results suggest that FDI leads to substantial productivity gains for domestic firms The size of FDI spillovers is economically important accounting for about 11 percent of productivity growth in U S firms between 1987 and 1996 In addition there is

some evidence for import related spillovers but it is weaker than for FDI spillovers The paper also gives a detailed account of why our study leads to results different from those found in previous work This analysis indicates that our results are also likely to apply to other countries and periods

Multinationals and Economic Growth in East Asia Shujiro Urata, Chia Siow Yue, Fukunari Kimura, 2006-11-22 This is a comprehensive examination of the role of foreign direct investment in East Asia before and after the financial crisis of mid 1997

Multinational Corporations Paz Estrella Tolentino, 2003-09-02 This work presents case studies of the emergence and evolution of Multinational Corporations MNCs based in eleven developed and developing countries of widely divergent patterns of national development From this analysis Tolentino develops a comprehensive theory of the emergence and evolution of MNCs from a macroeconomic perspective

Japan's Economic Recovery Robert Mitchell Stern, 2003-05-28 The contributors to this book from the US and Japan explore the main issues involved in the international trade foreign direct investment and macro financial relations of the United States and Japan and provide guidance to policy makers for measures to help overcome Japan's economic stagnation since the early 1990s The book is divided into three parts Part I contains an empirical analysis of trade diversion under the North American Free Trade Agreement NAFTA a theoretical analysis of time in determining the structure and effects of trade with an application to Japan and an empirical analysis of Japan's changing import behavior Part II is focused on foreign direct investment FDI trade and the behavior and structure of Japanese firms Part III deals with macro financial issues of current interest and importance in Japan The analytical focus of the chapters is intended to enhance the understanding of the issues addressed and to provide some guidance to policymakers in the design of measures that will improve economic efficiency and welfare and help to overcome the economic stagnation that Japan has experienced in the past decade or more

Structural Reforms Without Prejudices Tito Boeri, Micael Castanheira, Riccardo Faini, Vincenzo Galasso, 2006-06-15 Our economies face constant challenges from many different directions Structural reforms are implemented every day either to grasp the benefits of globalization and technological change or to avoid foundering on unaffordable welfare systems or the rise of new economies Despite this flurry of reforms many of their effects are insufficiently understood What makes reforms a success or a failure Why do we witness systematically ambivalent attitudes to reforms Can governments implement reforms differently without inflicting prejudice to large fringes of the population This book explores these issues by comparing a number of reforms across a large set of countries and sectors First through an innovative multisectorial input output analysis the authors compare the effects of liberalisation reforms in the telecommunication and electricity sectors across Europe Surprisingly they find that very similar and well intended reforms can generate highly contrasted outcomes It is also shown that governments must consider the effects of each reform on all sectors of the economy Second the authors explore how governments can tailor their reform strategy to alter the redistributive effects of reforms They show that the government's approach to reforms has been very different across time and across countries A government's approach depends on local

institutions on the nature of the opposition and on the scope of the reform under way The authors however show that governments do have alternatives Often there are ways to tailor reforms so as to protect specific parts of the population and there are ways to experiment gradually to avoid costly policy mistakes Regulation Of Foreign Investment: Challenges To International Harmonization Zdenek Drabek,Petros C Mavroidis,2013-01-11 The main aim of this book is to assess the importance of international rules for foreign direct investment and the major challenges to international harmonization of those rules Particular attention is paid to the most controversial and contentious issues with the view of appraising the prospects for establishing global rules The book is divided into three parts the first part includes papers assessing the role of national and international legislation with further distinction being made between bilateral regional and multilateral legal frameworks The second part addresses regulatory issues of technology transfer labor environment subsidies and investment incentives national security public services and sovereign wealth funds The final part looks at the experience of some international fora in addressing these issues and at some theoretical and conceptual problems of rule harmonization The papers have been written by legal and economic scholars from leading universities *Global Trade and Trade Governance During De-Globalization* Anna Karhu,Eini Haaja,2022-10-12 This book takes a fresh and much needed perspective on the challenges of trade policy and explores possible futures for trade policy development By taking the perspective of business studies the book does not only focus on the economic policy or legislative perspectives but views trade policy as a part of international business environment The purpose of this book is to bring forward discussions on trade policy development and future development needs and offers a comprehensive read for international business researchers practitioners and policymakers regarding the interconnections of trade policy and international business **Globalization and Self-Determination** David R. Cameron,Gustav Ranis,Annalisa Zinn,2006-04-12 Is the nation state under siege A common answer is that globalization poses two fundamental threats to state sovereignty The first concerns the unleashing of centrifugal and centripetal forces such as increasing market integration and the activities of institutions like the IMF World Bank and WTO that imperil state sovereignty from outside the nation state The second threat emanates from self determination movements that jeopardize state sovereignty from inside Rigorously analyzing popular hypotheses on globalization s effect on state sovereignty from a broad social sciences perspective the authors use empirical evidence to suggest that globalization s multilevel threats to state sovereignty have been overestimated In most instances globalization is likely to generate pressure for increased government spending while only one form of market integration foreign direct investment by multinational enterprises appears to increase any feeling of economic insecurity This volume will be invaluable to course instructors at both graduate and undergraduate levels policy makers and members of the general public who are concerned about the effects of globalization on the nation state **Survey of Current Business** ,1998 *Routledge Handbook of Southeast Asian Economics* Ian Coxhead,2014-12-17 The Routledge Handbook of Southeast Asian Economics

offers new insights into the rapidly developing economies of Southeast Asia. Despite widespread initial deprivation, Southeast Asia has achieved and sustained a remarkable rate of growth in the course of which tens of millions have successfully escaped severe poverty. Though the economies of the region vary in many dimensions, integration into the wider East Asian network of production and trade is a notable common feature, one that continues a centuries-long history of engagement with global trade. A second striking feature is the pace and extent of transformation in the structure of production and in sources of household income in the region, which has undergone remarkably rapid industrialization and urban growth. However, the search for sustained and sustainable growth through and beyond middle income continues to confront pressing economic and policy challenges. This Handbook offers a timely and comprehensive overview of Southeast Asian economic development. Organized according to the logic of chronological and thematic unity, it is structured in these sections: Growth and development over the long term; Food, agriculture and natural resources; Trade, investment and industrialization; Population, labor and human capital; Poverty and political economy; Twenty-first century challenges. This original Handbook, written by experts in their fields, is unique in the breadth and depth of its coverage. Its forward-looking perspective renders it relevant both now and in the future. This advanced-level reference work will be essential reading for students, researchers and scholars of Asian Studies, Economics and Southeast Asian studies.

Foreign-Owned Firms R. Jungnickel, 2002-10-14

Foreign-owned firms (FoFs) can have significant implications in terms of employment, income and technology for the national economies involved. This book compares the efficiency of domestic and FoFs and also looks at the performance of FoFs in several different countries. Contributors take a broad variety of research approaches, with a focus on the use of firm-specific data from France, Germany, Austria and Sweden. They conclude that foreign ownership matters, but the real difference is not between FoFs and national firms, but between multinational and domestic firms.
