

The Geography of Opportunity: Race and Housing Choice in Metropolitan America (James A. Johnson Metro Series)

A popular version of history trumpets the United States as a diverse nation of immigrants, welcome to all. The truth, however, is that local communities have a long history of ambivalence toward new arrivals and minorities. Persistent patterns of segregation by race and income still exist in housing and schools, along with a growing emphasis on rapid metropolitan development (sprawl) that encourages upwardly mobile families to abandon older communities and their problems. This dual pattern is becoming increasingly important as America grows more diverse than ever and economic inequality increases. Two recent trends compel new attention to these issues. First, the geography of race and class represents a crucial litmus test for the new regionalism?the political movement to address the linked fortunes of cities and suburbs. Second, housing has all but disappeared as a major social policy issue over the past two decades. This timely book shows how unequal housing choices and sprawling development create an unequal geography of opportunity. It emerges from a project sponsored by the Civil Rights Project at Harvard University in collaboration with the Joint Center for Housing Studies and the Brookings Institution. The contributors?policy analysts, political observers, social scientists, and urban planners?document key patterns, their consequences, and how we can respond, taking a hard look at both successes and failures of the past. Place still matters, perhaps more than ever. High levels of segregation shape education and job opportunity, crime and insecurity, and long-

Race, Real Estate, and Uneven Development, Second Edition Kevin Fox Gotham, 2014-02-01 Updated second edition examining how the real estate industry and federal housing policy have facilitated the development of racial residential segregation Traditional explanations of metropolitan development and urban racial segregation have emphasized the role of consumer demand and market dynamics In the first edition of *Race Real Estate and Uneven Development* Kevin Fox Gotham reexamined the assumptions behind these explanations and offered a provocative new thesis Using the Kansas City metropolitan area as a case study Gotham provided both quantitative and qualitative documentation of the role of the real estate industry and the Federal Housing Administration demonstrating how these institutions have promulgated racial residential segregation and uneven development Gotham challenged contemporary explanations while providing fresh insights into the racialization of metropolitan space the interlocking dimensions of class and race in metropolitan development and the importance of analyzing housing as a system of social stratification In this second edition he includes new material that explains the racially unequal impact of the subprime real estate crisis that began in late 2007 and explains why racial disparities in housing and lending remain despite the passage of fair housing laws and antidiscrimination statutes Praise for the First Edition This work challenges the notion that demographic change and residential patterns are natural or products of free market choices it contributes greatly to our understanding of how real estate interests shaped the hyper segregation of American cities and how government agencies including school districts worked in tandem to further demarcate the separate and unequal worlds in metropolitan life H Net Reviews H Education A hallmark of this book is its fine grained analysis of just how specific activities of realtors the FHA program and members of the local school board contributed to the residential segregation of blacks in twentieth century urban America A process Gotham labels the racialization of urban space the social construction of urban neighborhoods that links race place behavior culture and economic factors has led white residents realtors businessmen bankers land developers and school board members to act in ways that restricted housing for blacks to specific neighborhoods in Kansas City as well as in other cities Philip Olson University of Missouri Kansas City This is a book which is greatly needed in the field Gotham integrates using historical data the involvement of the real estate industry and the collusion of the federal government in the

manufacturing of racially biased housing practices His work advances the struggle for civil rights by showing that solving the problem of racism is not as simple as banning legal discrimination but rather needs to address the institutional practices at all levels of the real estate industry Talmadge Wright author of *Out of Place Homeless Mobilizations Subcities and Contested Landscapes*

Choosing Homes, Choosing Schools Annette Lareau, Kimberly Goyette, 2014-03-31 A series of policy shifts over the past decade

promises to change how Americans decide where to send their children to school In theory the boom in standardized test scores and charter schools will allow parents to evaluate their assigned neighborhood school or move in search of a better option But what kind of data do parents actually use while choosing schools Are there differences among suburban and urban families How do parents choices influence school and residential segregation in America Choosing Homes Choosing Schools presents a breakthrough analysis of the new era of school choice and what it portends for American neighborhoods The distinguished contributors to Choosing Homes Choosing Schools investigate the complex relationship between education neighborhood social networks and larger patterns of inequality Paul Jargowsky reviews recent trends in segregation by race and class His analysis shows that segregation between blacks and whites has declined since 1970 but remains extremely high Moreover white families with children are less likely than childless whites to live in neighborhoods with more minority residents In her chapter Annette Lareau draws on interviews with parents in three suburban neighborhoods to analyze school choice decisions Surprisingly she finds that middle and upper class parents do not rely on active research such as school tours or test scores Instead most simply trust advice from friends and other people in their network Their decision making process was largely informal and passive Eliot Weinginer complements this research when he draws from his data on urban parents He finds that these families worry endlessly about the selection of a school and that parents of all backgrounds actively consider alternatives including charter schools Middle and upper class parents relied more on federally mandated report cards district websites and online forums while working class parents use network contacts to gain information on school quality Little previous research has explored what role school concerns play in the preferences of white and minority parents for particular neighborhoods Featuring innovative work from more than a dozen scholars Choosing Homes Choosing Schools adroitly addresses this gap and provides a firmer understanding of how Americans choose where to live and send their children to school

Citizen Brown Colin Gordon, 2019-09-11 A study of the 2014 killing in Ferguson Pioneering A larger more complicated consideration of the recent history of race relations in American suburbs Mark Krasovic author of The Newark Frontier The killing of Michael Brown in Ferguson Missouri ignited nationwide protests and brought widespread attention to police brutality and institutional racism As Colin Gordon shows in this book the events in Ferguson didn't just expose the deep racism of a local police department it also revealed the ways in which decades of public policy effectively segregated people and curtailed citizenship not just in Ferguson but across the St Louis suburbs Citizen Brown uncovers half a century of private practices and public policies that resulted in bitter inequality and sustained segregation in Ferguson and beyond Gordon shows how municipal and school district boundaries were pointedly drawn to contain or exclude African Americans and how local policies and services especially policing education and urban renewal were weaponized to maintain civic separation He also makes it clear that the outcry that arose in Ferguson was no impulsive outburst but rather an explosion of pent up rage against long standing systems of segregation and inequality of which a police force that viewed

citizens not as subjects to serve and protect but as sources of revenue was only the most immediate example. *Worse Citizen Brown* illustrates the fact that though the greater St. Louis area provides some extraordinarily clear examples of fraught racial dynamics, this is hardly alone among American cities and regions. An innovative study, *Citizen Brown* also benefits from being grounded in political theory about citizenship and its many meanings. *Missouri Historical Review* **The Oxford Handbook of Urban Planning** Randall Crane, Rachel Weber, 2015. Why plan? How and what do we plan? Who plans for whom? These three questions are then applied across three major topics in planning: States, Markets, and the Provision of Social Goods. The Methods and Substance of Planning and Agency Implementation and Decision Making *The Black Metropolis in the Twenty-First Century* Robert D. Bullard, 2007-05-10. This book brings together key essays that seek to make visible and expand our understanding of the role of government policies, programs, and investments in shaping cities and metropolitan regions: the costs and consequences of uneven urban and regional growth patterns, suburban sprawl, and public health, transportation, and economic development; and the enduring connection of place, space, and race in the era of increased globalization. Whether intended or unintended, many government policies—housing, transportation, land use, environmental, economic development, education, etc.—have aided and in some cases subsidized suburban sprawl, job flight, and spatial mismatch, concentrated urban poverty, and heightened racial and economic disparities. Written mostly by African American scholars, the book captures the dynamism of these meetings, describing the challenges facing cities, suburbs, and metropolitan regions as they seek to address continuing and emerging patterns of racial polarization in the twenty-first century. The book clearly shows that the United States entered the new millennium as one of the wealthiest and the most powerful nations on earth. Yet amid this prosperity, our nation is faced with some of the same challenges that confronted it at the beginning of the twentieth century, including rising inequality in income, wealth, and opportunity; economic restructuring; immigration pressures; and ethnic tension, and a widening gap between haves and have-nots. Clearly, race matters. Place also matters. Where we live impacts the quality of our lives and chances for the good life.
