Identifying, Describing, and Developing Teachers Who Are Gifted and Talented Van Sickle, Meta L., Swanson, Julie D., Bazler, Judith A., Lubniewski, Kathryn L., 2018-12-07 Much of the research about teachers focuses on those who can't don't aren't good in the classroom However teachers who are gifted and talented exist but there has been little attention to date on the characteristics and practices of such teachers in the classroom While few the examples of research on positive teacher attributes include work on the expert authentic and creative as well as examples of research on eminent adults Identifying Describing and Developing Teachers Who Are Gifted and Talented is an essential reference source that discusses behaviors and traits in teachers who are considered gifted and talented as well as case studies on the identification and preparation of teachers who fall into this category Featuring research on topics such as creative innovation emotional intelligence and skill development this book is ideally designed for educators administrators researchers and academicians

Handbook of Parenting Marc H. Bornstein, 2005-02-16 Completely revised and expanded from four to five volumes this new edition of the Handbook of Parenting appears at a time that is momentous in the history of parenting Parenting and the family are today in a greater state of flux question and redefinition than perhaps ever before We are witnessing the emergence of striking permutations on the theme of parenting blended families lesbian and gay parents and teen versus fifties first time moms and dads One cannot but be awed on the biological front by technology that now not only renders

postmenopausal women capable of childbearing but also presents us with the possibility of designing babies Similarly on the sociological front single parenthood is a modern day fact of life adult child dependency is on the rise and parents are ever less certain of their own roles even in the face of rising environmental and institutional demands that they take increasing responsibility for their offspring The Handbook of Parenting concerns itself with different types of parents mothers and fathers single adolescent and adoptive parents basic characteristics of parenting behaviors knowledge beliefs and expectations about parenting forces that shape parenting evolution genetics biology employment social class culture environment and history problems faced by parents handicap marital difficulties drug addiction and practical concerns of parenting how to promote children s health foster social adjustment and cognitive competence and interact with school legal and public officials Contributors to the Handbook of Parenting have worked in different ways toward understanding all these diverse aspects of parenting and all look to the most recent research and thinking in the field to shed light on many topics every parent wonders about Each chapter addresses a different but central topic in parenting each is rooted in current thinking and theory as well as classical and modern research in that topic each has been written to be read and absorbed in a single sitting In addition each chapter follows a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classical and modern research forecasts of future directions of theory and research and a set of conclusions Of course contributors own convictions and research are considered but contributions to this new edition present all major points of view and central lines of inquiry and interpret them broadly The Handbook of Parenting is intended to be both comprehensive and state of the art As the expanded scope of this second edition amply shows parenting is naturally and closely allied with many other fields

Scientific Inquiry into Human Potential David Yun Dai,Robert J. Sternberg,2020-12-09 Scientific Inquiry into Human Potential explores the intellectual legacy and contemporary understanding of scientific research on human intelligence performance and productivity Across nineteen chapters some of the most eminent scholars of learning and psychology recount how they originated distinguished measured challenged and adapted their theories on the nature and nurture of human potential over decades of scientific research These accessible autobiographical accounts cover a spectrum of issues from the biological underpinnings and developmental nature of human potential to the roles of community social interaction and systematic individual differences in cognitive and motivational functioning Researchers instructors and graduate students of education psychology sociology and biology will find this book not only historically informative but inspiring to their own ongoing research journeys as well [Mentoring and Tutoring by Students](#) Sinclair Goodlad,2013-04-15 Schemes involving students as tutors are in place in many countries This work aims to stimulate and encourage the use of an educational technique through which teachers in tertiary and secondary education can amplify and extend their influence through the deployment of students as tutors
