Genome Management in Eukaryotes Open Universiteit (Heerlen, Netherlands), University of Greenwich, 1993-01-01

Biotechnological Innovations in Chemical Synthesis University of Greenwich, 1997 A self study textbook for technicians seeking further education graduates extending their knowledge base experienced workers facing changes in jobs managers unfamiliar with the new technology and people returning after a career break Explores some ways biotechnology can provide new routes for producing traditional organic chemical products and enable new products to replace those with environmental or other drawbacks The aspects discussed include a biocatalyst in organic synthesis the efficiency of growth and product formation the production and diversification of antibiotics and the industrial production of amino acids by fermentation and chemo enzymatic methods

Biotechnological Innovations in Animal Productivity BIOTOL, B C Currell, R C E Dam-Mieras, 2013-10-22 Biotechnological Innovations in Animal Productivity examines the application of biotechnology to animal production The book focuses on the use of contemporary biotechnology procedures on the different facets of animal production such as the reproductive capabilities of animals their growth rates and the ability of the farmer and veterinary services to prevent and cure infection The text contains chapters that discuss topics on the manipulation of reproductive processes endocrine regulation of the oestrous cycle in vitro embryo production and manipulation vaccines and the production of transgenic livestock animals Biotechnologists biologists and livestock producers will find the book very insightful

Biosynthesis & Integration of Cell Metabolism B C Currell, R C E Dam-Mieras, 2017-12-20 Biosynthesis Integration of Cell Metabolism

The Molecular Fabric of Cells BIOTOL, B C Currell, R C E Dam-Mieras, 2013-10-22 Knowledge of the molecules which make up cells not only provides the basis upon which an understanding of cell function may be developed but also provides the knowledge needed to manipulate and purify chemicals The text therefore holds an important and key position in both applied biology and biotechnology

Infrastructure and Activities of Cells M.C.E. van Dam-Mieras, B C Currell, R C E Dam-Mieras, 2016-04-06 Cells may be seen as superb factories in so far as they take in one set of chemicals nutrients and convert them into new products Each cell taking in its own set of chemicals and making its own collection of products Describing the structural organisation of cells in both unicellular and multicellular organisms this text considers the organisation and management which lead to these factories operating in a coordinated and functional manner Reproduction the one feature special to cell activities is addressed in detail

Plant Breeding Abstracts, 1994

Biotechnological Innovations in Energy and Environmental Management Open Universiteit (Heerlen, Netherlands), 1994 Provides an overview of the central environmental issues which arise from the activities of humans with special emphasis on the need to achieve a sustainable more environmentally responsive development Examines how biotechnology may be applied to the production and utilisation of renewable energy and material resources and to consider how this and the biotechnological treatment of waste will contribute to the management of the environment
