Fighting for Peace Lisa Leitz, 2014-04-15 *Fighting for Peace* brings to light an important yet neglected aspect of opposition to the Iraq War the role of veterans and their families Drawing on extensive participant observation and interviews Lisa Leitz demonstrates how the harrowing war experiences of veterans and their families motivated a significant number of them to engage in peace activism Married to a Navy pilot herself Leitz documents how military peace activists created a movement that allowed them to merge two seemingly contradictory sides of their lives an intimate relation to the military and antiwar activism Members of the movement strategically deployed their combined military peace activist identities to attract media attention assert their authority about the military and war and challenge dominant pro war sentiment By emphasizing the human costs of war activists hoped to mobilize American citizens and leaders who were detached from the wars in Iraq and Afghanistan bring the wars to an end and build up programs to take care of returning veterans and their families The stories in *Fighting for Peace* ultimately reveal that America's all volunteer force is contributing to a civilian military divide that leaves civilians with little connection to the sacrifices of the military Increasingly Leitz shows veterans and their families are being left to not only fight America's wars but also to fight against them

Democracy in the Making Kathleen M. Blee, 2012-03-30 Winner of the 2012 ARNOVA Outstanding Book in Nonprofit and Voluntary Action Research Award 2013 Charles Tilly Award for Best Book from the American Sociological Association Section on Collective Behavior and Social Movements *Democracy in the Making* offers a marvelous synthesis of sociological acumen and hope Kathleen Blee finds that while social activists often narrow their visions of doable social change they also can learn together and take surprising new directions with unpredictable results A wide range of activists will recognize themselves in this book's wonderfully fine grained portraits of politics at the grassroots Paul Lichterman author of *Elusive Togetherness* Church Groups Trying to Bridge America's Divisions This book is an enormous breath of fresh air in an area that often recycles concepts and perspectives Blee offers a strikingly original approach to grassroots activism that will substantially reorient research in collective action and social movements Marc W Steinberg Associate Professor of Sociology Smith College With civic engagement commonly understood to be on the decline and traditional bases of community and means of engagement increasingly fractured how do people become involved in collective civic action How do activist groups form What hampers the ability of these groups to invigorate political life and what enables it Kathleen Blee's groundbreaking new study provides a provocative answer the early times matter By following

grassroots groups from their very beginnings Blee traces how their sense of possibility shrinks over time as groups develop a shared sense of who they are that forecloses options that were once open At the same time she charts the turning points at which options re open and groups become receptive to change and reinvention Based on observing more than sixty grassroots groups in Pittsburgh for three years *Democracy in the Making* is an unprecedented look at how ordinary people come together to change society It gives a close up look at the deliberations of activists on the left and right as they work for animal rights an end to the drug trade in their neighbourhood same sex marriage global peace and more It shows how grassroots activism can provide an alternative to civic disengagement and a forum for envisioning how the world can be transformed At the same time it documents how activist groups become mired in dysfunctional and undemocratic patterns that their members dislike but cannot fix By analyzing the possibilities and pitfalls that face nascent activist organizations Blee reveals how critical early choices are to the success of grassroots activism Vital for scholars and activists alike this practical yet profound study shows us through the examples of both groups that flourish and those that flounder how grassroots activism can better live up to its democratic potential *Handbook of Social Movements Across Disciplines* Bert Klandermans, Conny Roggeband, 2009-12-18 This book aims to revisit the interdisciplinary roots of social movement studies Each discipline raises its own questions and approaches the subject from a different angle or perspective The chapters of this handbook are written by internationally renowned scholars representing the various disciplines involved They each review the approach their sector has developed and discuss their disciplines contributions and insights to the knowledge of social movements Furthermore each chapter addresses the unanswered questions and discusses the overlaps with other fields as well as reviewing the interdisciplinary advances so far **Leverage of the Weak** Hwa-Jen Liu, 2015-07-21 Comparing Taiwan and South Korea strategically Hwa Jen Liu seeks an answer to a deceptively simple question Why do social movements appear at different times in a nation s development Despite their apparent resemblance a colonial heritage authoritarian rule rapid industrialization and structural similarities Taiwan and South Korea were opposites in their experiences with two key social movements South Korea followed a conventional capitalist route labor movements challenged the system long before environmental movements did In Taiwan pro environment struggles gained strength before labor activism Liu argues that part of the explanation lies in an analysis of how movements advance their causes by utilizing different types of power Whereas labor movements have the power of economic leverage environmental movements depend on the power of ideology Therefore examining material factors versus ideational factors is crucial to understanding the successes or failures of social movements *Leverage of the Weak* is a significant contribution to the literature on social movements to the study of East Asian political economies and to the progress of the comparative historical method It enhances knowledge of movement emergence investigates the possibilities and obstacles involved in forging labor environment alliances and offers the first systematic multilayered comparisons across movements and nations in East Asia
