## **Geography Of Defence The Spatial Impact Of Defence Policies:**

**The Geography of Interwar Britain** Stephen V. Ward, 2025-09-01 As the first geographical study of interwar Britain The Geography of Interwar Britain originally published in 1988 and now with a new preface by the author breaks new ground incorporating original research and new interpretations of the work of historians and others within a geographical frame of reference The central argument of the book is that the state in interwar Britain intensified uneven capitalist development State actions in many important fields including macro economic policy defence industrial rationalisation labour and unemployment policy local government and regional policy are analysed in detail These studies show that until the later 1930s state policies worked to the disadvantage of depressed outer Britain and favoured the more prosperous south and midlands However shifts in state policies were apparent as rearmament and changes in macro economic policies necessitated new approaches Significantly the first stages in the creation of what became the post 1945 political consensus were evident at this time particularly in regional and industrial location policy The book will be of interest to geographers economic and social historians political scientists sociologists and planners

**Britain's Changing Environment from the Air** Tim Bayliss-Smith, Susan E. Owens, 1990-11-15 Commercial pressures and mechanization have rendered almost unrecognizable the natural and man made landscapes of Britain as they existed before World War I How this happened and how we can best conserve what is left is charted using the perspective of aerial photography in this book

**Industrial Geography** H. D. Watts, 1987

**An Introduction to Political Geography** John Rennie Short, 2002-09-26 Old powers are falling New states are emerging The gap between East and West is narrowing What are the problems facing the emerging new world order Can action at the community level affect global issues An Introduction to Political Geography in its first edition helped shape the study of the discipline Entirely revised and updated this new edition explores political and geographic change within the same accessible framework John Short emphasises the need for a fluid approach to the study of the international order the nation state as well as social movements Though the world is becoming smaller popular access to power remains an elusive goal An integrated world economy may well perpetuate past inequalities just as political systems continue to work by exclusion The global village and the ecological approach this implies must be paid particular attention when examining the political geography of participation An Introduction to Political Geography reviews the history of the rise and fall of centres of power draws on a wide range of detailed international case studies to illustrate current trends and discusses future developments

**Economic Geography** Sharmistha Bagchi-Sen, Helen Lawton-Smith, 2006-09-27 The impact of economic geography both within and beyond the wider field of geography has been constrained in the past by its own limitations Drawing together the work of several eminent geographers this superb collection assesses the current state of knowledge in the sub discipline and its future direction In doing so the contributors show how economic geographers have offered explanations that affect places and lives in the broader context of the global economy Offering a discussion of theoretical

constructs and methodologies with the purpose to show the need to combine different approaches in understanding spatial inter dependencies contributors also demonstrate the need to engage with multiple audiences and within this context they proceed to examine how geographers have interfaced with businesses and policy This excellent collection moves economic geography from a preoccupation with theory towards more rigorous empirical research with greater relevance for public policy With excellent breadth of coverage it provides an outstanding introduction to research topics and approaches

**Whitaker's Cumulative Book List** ,1986      [A Century of British Geography](#) Ron Johnston,Michael Williams,British Academy,2003-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today s geographers      [Elgar Encyclopedia of Space Policy and Governance](#) Sa'id Mosteshar,Christoph Beischl,Arne Sönnichsen,2025-06-09 This authoritative Encyclopedia explores the dynamic fields of space policy and governance Authored by over 50 expert scholars and practitioners from across the globe it delves into the key concepts governing bodies and challenges involved in regulating the space sector Entries provide insights into topics ranging from cybersecurity and sustainability to astropolitics and space law critically engaging with the definition core issues and future directions of each aspect      [Strategy And Defense Policy For Small States: Problems And Prospects](#) Bernard F W Loo,2021-11-08 For students of Strategic Studies in small countries with limited financial human and military resources the available literature on Strategic Studies in particular texts that seek to explain the key concepts and components of Strategic Studies can be very alien in its focus to the strategic conditions and issues that these countries face This book contains a collection of essays that seeks to discuss key concepts in Strategic Studies as well as contemporary challenges in strategy and defence policy from the perspective of small states It is based on the idea derived from the German philosopher of war Carl von Clausewitz that there is a distinction between logic and grammar while the field of Strategic Studies contains a number of key concepts such as geopolitics and geostrategy strategic culture arms dynamics and the phenomenon of military modernization that are universal in logic the grammar that is the specific manifestations of these concepts in the contexts of small states is necessarily different from larger more materially endowed states Related Link s      [Security, Strategy, and Military Dynamics in the South China Sea](#) Gordon Houlden,Scott N. Romaniuk,Nong Hong,2021-07-27 This volume brings together international experts to provide fresh perspectives on geopolitical concerns in the South China Sea The book considers the interests and security strategies of each of the nations with a claim to ownership and jurisdiction in the Sea

Examining contexts including the region's natural resources and China's behaviour the book also assesses the motivations and approaches of other states in Asia and further afield This is an accessible even handed and comprehensive examination of current and future rivalries and challenges in one of the most strategically important and militarized maritime regions of the world

*Coastal Defences* Peter W. French, 2002-01-04 *Coastal Defences* aims to present the broad spectrum of methods that engineers use to protect the coastline and investigates the sorts of issues that can arise as a result The first section of the book examines traditional hard techniques such as sea walls and groynes whilst the second looks at the more recent trend of using techniques more sympathetic to nature By looking at each of the main methods of coastal protection in detail the book investigates the rationale for using each method and the consequent management issues presenting a case for and against each of the techniques

Knowledge and Industrial Organization Ake E. Andersson, David F. Batten, Charlie Karlsson, 2012-12-06 This volume contains a selection of papers presented at an international symposium on research and development industrial change and economic policy organized and hosted by the University of Karlstad Värmland Sweden Situated about halfway between Stockholm and Oslo Karlstad stands on the River Klara which reaches north into the mountains of Norway Founded by King Charles IX of Sweden whose statue stands in the city centre beside the river the city celebrated its 400th anniversary in 1984 For many decades the wealth of Karlstad has been based on traditional industries such as iron timber and paper and throughout the province of Värmland there are a considerable number of industrial communities which grew up around mines ironworks sawmills and papermills Even the cultural structure of these communities is heavily marked by the industrial environment in which they developed However for over a decade now a major structural reorientation has been taking place and the old industrial structures have been disappearing For various reasons the importance of large scale manufacturing companies has declined and as a result of intense development work with new ideas new entrepreneurs and new technology we have seen the rapid rise of small companies In this context recent research has shown that universities playing an increasingly central role in regional development Thus the continued development of the University of Karlstad is of significant regional and national interest Although fairly small in an international perspective approximately 4000 students the university is expanding rapidly

**Illusions of Location Theory: Consequences for Blue Economy in Africa** Francis Onditi, Douglas Yates, 2021-01-05 *Illusions of Location Theory: Consequences for Blue Economy in Africa* questions the relevance of location theory in explaining the coastal hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa It pays more attention to territorial contestations maritime disputes vulnerabilities of landlocked states and expansionist policies as

displayed through spatial organizational regimes These areas of investigation have previously been largely studied from the narrow perspective of location unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology ideology and the power of mental mapping in spatial decision making This volume puts forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies Thus this work proffers possibilities for a holistic regime for managing Africa s coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy The combination of theoretical and empirical analysis buttressed by in depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers students and practitioners interested in African regional studies African political economy political geography strategic military studies governance of seas and oceans and maritime science diplomacy

**Beyond the Wire** Michael A. Allen, Carla Martinez Machain, Michael E. Flynn, Andrew Stravers, 2023 In a time where US deployments are uncertain this book shows how US service members can either build the necessary support to sustain their presence or create added animosity towards the military presence The United States stands at a crossroads in international security The backbone of its international position for the last 70 years has been the massive network of overseas military deployments However the US now faces pressures to limit its overseas presence and spending In *Beyond the Wire* Michael Allen Michael Flynn Carla Martinez Machain and Andrew Stravers argue that the US has entered into a Domain of Competitive Consent where the longevity of overseas deployments relies upon the buy in from host state populations and what other major powers offer in security guarantees Drawing from three years of surveys and interviews across fourteen countries they demonstrate that a key component of building support for the US mission is the service members themselves as they interact with local community members Highlighting both the positive contact and economic benefits that flow from military deployments and the negative interactions like crime and anti base protests this book shows in the most rigorous and concrete way possible how US policy on the ground shapes its ability to advance its foreign policy goals
