Geology and Settlement Dora P. Crouch, 2004 Traditionally our understanding of ancient cities has been approached through archaeological historical and literary sources with little regard or understanding of geology or engineering Assembling the Archipelago: Heritage in Energy Transitions and Climate Action Marilena Mela, 2025-09-09 This book explores the potential of heritage to enact sustainable human environment relationships across geographical differences It does so by travelling to four archipelagoes the Wadden Islands in the Netherlands the Cyclades in Greece Shetland in Scotland and the Aeolian Islands in Italy In the face of planetary socioenvironmental crises the reliance on sustainable development strategies including the energy transition on technocratic top down solutions fail to counterbalance global

agendas of extraction and growth and address environmental injustices in peripheral places This book stresses the need to think small arguing that seeds for meaningful change exist in such places and the geographically and historically situated relationships between people and environments Islands interconnected yet autonomous places with unique histories are good places to start In four archipelagoes frictions produced both by climate change and climate mitigation the fragile consensus around a solar park in the Wadden Sea conflicts around wind turbine towers in the Aegean experiments with the tides in Shetland and volcanic episodes in the Aeolian come in dialogue with the learning potential of their environmental and cultural heritage. The counterposing of these stories renegotiates established discourses of heritage and sustainability and the associated courses of action in policy and planning This contribution will resonate with academics students policymakers and activists in heritage studies environmental humanities landscape studies science and technology studies and sustainability Readers are invited to participate in the life and troubles of four island landscapes and to think along on emergent archipelagic claims towards sustainable and just futures **Across the Corrupting Sea** Cavan Concannon, Lindsey A. Mazurek, 2016-03-17 Across the Corrupting Sea Post Braudelian Approaches to the Ancient Eastern Mediterranean reframes current discussions of the Mediterranean world by rereading the past with new methodological approaches The work asks readers to consider how future studies might write histories of the Mediterranean moving from the larger pan Mediterranean approaches of The Corrupting Sea towards locally oriented case studies Spanning from the Archaic period to the early Middle Ages contributors engage the pioneering studies of the Mediterranean by Fernand Braudel through the use of critical theory GIS network analysis and postcolonial cultural inquiries Scholars from several time periods and disciplines rethink the Mediterranean as a geographic and cultural space shaped by human connectivity and follow the flow of ideas ships trade goods and pilgrims along the roads and seascapes that connected the Mediterranean across time and space The volume thus interrogates key concepts like cabotage seascapes deep time social networks and connectivity in the light of contemporary archaeological and theoretical advances in order to create new ways of writing more diverse histories of the ancient world that bring together local contexts literary materials and archaeological analysis

study and think about a crucial era in ancient Greek history Volume III contains detailed and up to date studies of Cumae and Pithecusae The Cyclades and Cyprus Karia and the Dodekanese Poul Pedersen, Birte Poulsen, John Lund, 2021-01-21 The papers in Karia and the Dodekanese Vol I focus on regional developments and interregional relations in western Asia Minor and the Dodekanese during the Late Classical and Early Hellenistic period Throughout antiquity this region was a dynamic meeting place for eastern and western civilizations Cultural achievements of exceptional and everlasting importance including significant creations of ancient Greek literature philosophy art and architecture originated in the coastal cities of western Anatolia and the adjoining Aegean islands In the fourth century BC the eastern cities experienced a new economic boom and a revival of Archaic culture sometimes termed The Ionian Renaissance began The cultural revival furthered rebuilding of old major works such as the Artemision at Ephesos the embellishment of sanctuaries and a new royal architecture such as the Maussolleion at Halikarnassos The rich cultural revival was initially promoted by the satrapal family of the Hekatomnids in Karia and in particular by its most famous member Maussollos whose influence was not confined to Asia Minor but included the Dodekanese islands Kos and Rhodos Partly under the influence of the Karian satrapy a number of cities were founded on a new common urban model in Rhodos Halikarnassos Priene Knidos and Kos When Alexander the Great conquered the satrapies in western Asia Minor in 334 BC the culture initially promoted at the satrapal courts was carried on by gifted thinkers poets and architects preparing the way for Hellenistic cultural centres such as Alexandria

**The Cave of the Nymphs at Pharsalus** Robert S. Wagman, 2015-10-27 Cave of the Nymphs at Pharsalus is the first book length study of one of Greece's most cited nymph sanctuaries. The volume includes a revised catalog extensive new commentaries on the cave s famous inscriptions and a first time investigation of the site s topographical and archaeological layout Also known as Alogopati or Karapla cave the Pharsalian shrine holds a special place among ancient nymph caves as the only such site to feature an inscribed poetic chronicle of the shrine's foundation and its founder the mysterious nymph worshipper Pantalces Based on years of fieldwork and archival research Cave of the Nymphs challenges some commonly held views about the origin of this rock cut tale and offers a fresh perspective for understanding the Pharsalian cave in its proper historical context Metallurgy Philip P. Betancourt, Susan C. Ferrence, 2011-12-31 Prof James D Muhly has enjoyed a distinguished career in the study of ancient history archaeology and metallurgy that includes an emeritus professorship at the University of Pennsylvania and a term as director of the American School of Classical Studies at Athens as well as receiving the Archaeological Institute of America's Pomerance Award for Scientific Contributions to Archaeology In Muhly's honor a total of 38 eminent scholars have contributed 30 articles that include topics on Bronze and Iron Age metallurgy around the Eastern Mediterranean in such places as Crete the Cyclades Cyprus and Turkey Governmental Intervention in Foreign Trade in Archaic and Classical Greece Errietta M. A. Bissa, 2009 Trade was a necessity in the ancient Greek world yet the prevalent scholarly view is that Greek states intervened in foreign trade only rarely and

sporadically This book studies four necessary commodities gold silver ship building timber and grain from production through export to import Through the re evaluation of known evidence and the presentation of new avenues of research the book shows that Greek and non Greek governments in the archaic and classical periods intervened and involved themselves greatly in foreign trade The book offers the student of the Greek economy a fresh perspective on state intervention in trade and the ways in which intervention worked in the Greek world **Encyclopedia of Greece and the Hellenic Tradition** Graham Speake, 2021-01-31 Hellenism is the living culture of the Greek speaking peoples and has a continuing history of more than 3 500 years The Encyclopedia of Greece and the Hellenic Tradition contains approximately 900 entries devoted to people places periods events and themes examining every aspect of that culture from the Bronze Age to the present day The focus throughout is on the Greeks themselves and the continuities within their own cultural tradition Language and religion are perhaps the most obvious vehicles of continuity but there have been many others law taxation gardens music magic education shipping and countless other elements have all played their part in maintaining this unique culture Today Greek arts have blossomed again Greece has taken its place in the European Union Greeks control a substantial proportion of the world's merchant marine and Greek communities in the United States Australia and South Africa have carried the Hellenic tradition throughout the world This is the first reference work to embrace all aspects of that tradition in every period of its Death in Mycenaean Lakonia (17th to 11th c. BC) Chrysanthi Gallou, 2019-12-27 A Silent Place Death in existence Mycenaean Lakonia is the first book length systematic study of the Late Bronze Age LBA burial tradition in south eastern Peloponnese Greece and the first to comprehensively present and discuss all Mycenaean tombs and funerary contexts excavated and or simply reported in the region from the 19th century to present day The book will discuss and reconstruct the emergence and development of the Mycenaean mortuary tradition in Lakonia by examining the landscape of death the burial architecture the funerary and post funerary customs and rituals and offering patterns over a longue dur e The author proposes patterns of continuity from the Middle Bronze Age even the Early Bronze Age in terms of burial architecture to the LBA and equally important from the Late Bronze Age to the Early Iron Age and reconstructs diachronic processes of invention of tradition and identity in Mycenaean communities on the basis of tomb types and their material culture The text highlights the social political and economic history of Late Bronze Age Lakonia from the evolution of the Mycenaean civilisation and the establishment of palatial administration in the Spartan vale to the demise of Mycenaean culture and the turbulent post collapse centuries as reflected by the burial offerings The book also brings to publication the chamber tombs at Epidavros Limera that remained largely unpublished since their excavation in the 1930s and 1950s Epidavros Limera was one of the most important prehistoric coastal sites in prehistoric southern Greece early 3rd late 4th millennium BC and one of the main harbour towns of the Mycenaean administrative centres of central Lakonia It is one of very few Mycenaean sites that flourished uninterruptedly from the emergence of the Mycenaean civilisation until after the collapse of the palatial

administration and into the transition to the Early Iron Age The present study of the funerary architecture and of the pottery from the tombs suggests that the site was responsible for the introduction of the chamber tomb type on the Greek mainland in the latest phase of the Middle Bronze Age definitely no later than the transitional Middle Bronze Age Late Bronze Age period and not in the early phase of the Late Bronze Age Late Helladic I as previously assumed
