the second millennium we find ourselves in times of radical social change Orthodox explanations of the economy the environment and the development process are unable to provide coherent policies for such issues as employment creation environmental degradation and social progress Economy Environment Development Knowledge provides alternative perspectives on these fundamental aspects of human existence Economists environmentalists and development theorists have so far been unable to agree on the most successful prescriptions to address problems To understand contrast and compare alternative understandings of economic environmental and development issues we need to be aware why theorists conceptualise the process of social experience so differently Part 1 of Economy Environment Development Knowledge addresses the subjective preference cost of production and abstract labour theories of values in economics Part 2 explains egocentrism ecocentrism and socioecocentrism as competing theoretical perspectives in environmental theory Part 3 highlights modernisation theory structuralist theory and class struggle as ways to account for the process of development and Part 4 examines the generation of knowledge through positivism paradigms and praxis legitimating competing perspectives in economics environmentalist and development The book concludes by considering why different people find alternative explanations more or less plausible By addressing the disagreements between theorists Economy Environment Development Knowledge provides a unique basis to contrast and compare the plethora of theories of and policies for economic prosperity environmental sustainability and social progress Reintroducing Macroeconomics Steven Mark

Cohn,2015-01-28 This lively introduction to heterodox economics provides a balanced critique of the standard introductory macroeconomic curriculum In clear and accessible prose it explains many of the key principles that underlie a variety of alternative theoretical perspectives including institutionalist economics radical economics Post Keynesian economics feminist economics ecological economics Marxist economics social economics and socioeconomics Because the book s structure parallels the chapters and subject matter presented in a typical introductory macroeconomics textbook Reintroducing Macroeconomics provides readers with a running commentary on the standard approach while simultaneously introducing them to a broader range of ideas about the causes and appropriate policy responses to a wide range of common economic problems Although designed primarily as a companion volume for students in introductory economics courses the book can also be used effectively for more targeted applications that highlight a particular economic issue or approach It will be of

particular interest to students in related disciplines such as American Studies anthropology black studies environmental studies gender studies history political science and sociology who may be required to take introductory economics classes and who are interested in gaining an alternative perspective By demonstrating the vitality and common ground underlying a broad spectrum of heterodox approaches Reintroducing Macroeconomics brings alternative perspectives into the classroom in an accessible way that empowers students to think about the economy in new and exciting ways The text includes end of chapter study questions as well as a detailed note to instructors

*In Defense of Post-Keynesian and Heterodox Economics* Frederic S. Lee, Marc Lavoie, 2012 This text makes it clear that post Keynesian heterodox economics is in spite of internal problems a viable and important approach to economics and that it should resist the attempts of the critics to bury it

*The Endless Crisis* John Bellamy Foster, Robert W. McChesney, 2017-05-01 The days of boom and bubble are over and the time has come to understand the long term economic reality Although the Great Recession officially ended in June 2009 hopes for a new phase of rapid economic expansion were quickly dashed Instead growth has been slow unemployment has remained high wages and benefits have seen little improvement poverty has increased and the trend toward more inequality of incomes and wealth has continued It appears that the Great Recession has given way to a period of long term anemic growth which Foster and McChesney aptly term the Great Stagnation This incisive and timely book traces the origins of economic stagnation and explains what it means for a clear understanding of our current situation The authors point out that increasing monopolization of the economy when a handful of large firms dominate one or several industries leads to an over abundance of capital and too few profitable investment opportunities with economic stagnation as the result Absent powerful stimuli to investment such as historic innovations like the automobile or major government spending modern capitalist economies have become increasingly dependent on the financial sector to realize profits And while financialization may have provided a temporary respite from stagnation it is a solution that cannot last indefinitely as instability in financial markets over the last half decade has made clear

**Advancing the Frontiers of Heterodox Economics** Tae-Hee Jo, Zdravka Todorova, 2015-07-30 This collection of essays honors the life and work of one of the most prominent and fervent heterodox economists Frederic S Lee who has been at the heart of the heterodox economics movements for the past three decades Authors in this book demonstrate that heterodox economic has transcended the criticism of mainstream economics and more importantly that constructive developments are in the making by way of cross communications among various heterodox economics traditions Frederic S Lee s contributions to heterodox economics are centered on three themes the making of a history and identity of heterodox economics heterodox microeconomics and the heterodox analysis of social provisioning Part I addresses the importance of history theory research methods and institutions in the making of the identity of heterodox economics as an alternative to mainstream economics Part II delves into heterodox microeconomic theories in particular investment pricing competition markets and market governance as foundations of heterodox macroeconomic analyses Part III

expands the analysis of the capitalist social provisioning process with an emphasis on its subsystems and their relationships over historical time Part IV encapsulates the life and work of Frederic S Lee Throughout his intellectual life Frederic S Lee has shown to many that the development of heterodox economics is rendered possible by unselfish and ceaseless efforts to build both theory and institutions Essays in this book attest that establishing an alternative critical theory to the status quo is not only possible but also serviceable to the majority of the population

The Macroeconomics of Finance-dominated Capitalism and Its Crisis Eckhard Hein, 2012-01-01 The rise to dominance of finance in the past three decades has had many profound effects on economic performance In this book Eckhard Hein provides us with detailed well grounded and highly insightful analyses of the macroeconomic impacts on investment employment global imbalances income distribution and much more This is must read for those wanting to comprehend the macroeconomics of the era of financialization and for those seeking macro economic policies to address the financial crisis and bring economic prosperity Malcolm Sawyer University of Leeds UK Eckhard Hein examines the causes and consequences of financialisation His book is economics as it should always be it combines reflections data gathering empirical analysis theoretical formalization and policy recommendations Hein goes beyond the exuberant behaviour of the banking industry to analyse the global financial crisis and the eurozone crisis showing through various variants of a Kaleckian growth model the macroeconomic consequences of the rising dominance of finance over modern capitalism during the last three decades Marc Lavoie University of Ottawa Canada In this timely and thought provoking book Eckhard Hein illustrates that the Great Recession which hit the world economy in 2008 09 is rooted in the contradictions of finance dominated capitalism the author provides an in depth exploration of the macroeconomics of finance dominated capitalism its problems and its crisis and presents economic policy lessons and alternatives In particular he shows that since the early 1980s finance dominated capitalism has affected long run economic developments via three distinct channels the re distribution of income at the expense of low labour incomes the dampening of investment in real capital stock and an increasing potential for wealth based and debt financed consumption the author concludes that against the background of these basic macroeconomic tendencies increasing instability potentials at the national economy levels and rising current account imbalances at both global and European levels have developed and have contributed to the severity of the Great Recession This systematic study of finance dominated capitalism presented from a macroeconomic perspective will prove a thought provoking read for academics researchers graduate students and economic policy consultants with an interest in macroeconomics financial economics economic policies and distribution and growth

**Philosophy after Marx** Christoph Henning, 2014-04-17 Christoph Henning writes a concise history of misreadings of Marx in the 20th century Focussing on German philosophy from Heidegger to Habermas he also addresses the influence of Rawls and Neopragmatism subsequently scrutinizing a previous history of Marx interpretations that had served as the premises upon which these later works were based Henning sketches a historical trajectory in which a theory

of socialist politics enters the fields of economics sociology critical theory and theology before finally overloaded with intellectually dead freight entering into philosophy In so doing he takes a hermeneutic approach to how misreadings in a specific field proliferate into further misreadings across a variety of fields leading to an accumulation of questionable preconceptions With the recent resurgence of interest in Marx Henning s historical recursions make evident where and how academic Anti Marxism had previously got it wrong English translation of Philosophie nach Marx 100 Jahre Marxrezeption und die normative Sozialphilosophie der Gegenwart in der Kritik Transcript Verlag Bielefeld 2005

Ontology and Economics Edward Fullbrook,2008-10-27 Tony Lawson has become a major figure of intellectual controversy on the back of juxtaposing two relatively simple and seemingly innocuous ideas He has argued firstly that success in science depends on finding and using methods including modes of reasoning appropriate to the nature of the phenomena being studied and also that there are important differences between the nature of the objects of study of natural sciences and those of social science This original book brings together some of the world s leading critics of economics orthodoxy to debate Lawson s contribution to the economics literature The debate centres on ontology which means enquiry into the nature of what exists and in this collection scholars such as Bruce Caldwell John B Davis and Geoffrey M Hodgson present their thoughtful criticisms of Lawson s work

Lawson himself presents his reactions to these criticisms with full chapter replies to each of the scholars included. This book is particularly useful for students and researchers concerned primarily with methodology and future development of economics. It is also relevant to the concerns of philosophers of science and to all social scientists interested in methodological issues.

**The Routledge Handbook of Heterodox Economics** Tae-Hee Jo, Lynne Chester, Carlo D'Ippoliti, 2017-07-28

The Routledge Handbook of Heterodox Economics presents a comprehensive overview of the latest work on economic theory and policy from a pluralistic heterodox perspective. Contributions throughout the Handbook explore different theoretical perspectives including Marxian radical political economics, Post Keynesian, Sraffian economics, institutionalist, evolutionary economics, feminist economics, social economics, Regulation theory, the Social Structure of Accumulation approach, and ecological economics. They explain the structural properties and dynamics of capitalism as well as propose economic and social policies for the benefit of the majority of the population. This book aims firstly to provide realistic and coherent theoretical frameworks to understand the capitalist economy in a constructive and forward looking manner. Secondly, it delineates the future directions as well as the current state of heterodox economics and then provides both heat and light on controversial issues, drawing out the commonalities and differences among different heterodox economic approaches. The volume also envisions transformative economic and social policies for the majority of the population and explains why economics is and should be treated as a social science. This Handbook will be of compelling interest to those including students who wish to learn about alternative economic theories and policies that are rarely found in conventional economics textbooks or discussed in the mainstream media, and to critical economists and other social scientists who are concerned with analyzing pressing socio-economic issues.
