Gunning of America Pamela Haag,2016-04-19 Americans have always loved guns This special bond was forged during the American Revolution and sanctified by the Second Amendment It is because of this exceptional relationship that American civilians are more heavily armed than the citizens of any other nation Or so we re told In The Gunning of America historian Pamela Haag overturns this conventional wisdom American gun culture she argues developed not because the gun was exceptional but precisely because it was not guns proliferated in America because throughout most of the nation s history they were perceived as an unexceptional commodity no different than buttons or typewriters Focusing on the history of the Winchester Repeating Arms Company one of the most iconic arms manufacturers in America Haag challenges many basic assumptions of how and when America became a gun culture Under the leadership of Oliver Winchester and his heirs the company used aggressive sometimes ingenious sales and marketing techniques to create new markets for their product Guns have never sold themselves rather through advertising and innovative distribution campaigns the gun industry did Through the meticulous examination of gun industry archives Haag challenges the myth of a primal bond between Americans and their firearms Over the course of its 150 year history the Winchester Repeating Arms Company sold over 8 million guns But Oliver Winchester a shirtmaker in his previous career had no apparent qualms about a life spent arming America His daughter in law Sarah Winchester was a different story Legend holds that Sarah was haunted by what she considered a vast blood fortune and became convinced that the ghosts of rifle victims were haunting her She channeled much of her inheritance and her conflicted conscience into a monstrous estate now known as the Winchester Mystery House where she sought refuge from this ever expanding army of phantoms In this provocative and deeply researched work of narrative history Haag fundamentally revises the history of arms in America and in so doing explodes the cliché that have created and sustained our lethal gun culture *From the American System to Mass Production, 1800-1932: The Development of Manufacturing Technology in the United States* David Hounshell,2023-11-25 In *From the American System to Mass Production* David A Hounshell has provided a detailed thoughtful and comprehensive examination of American industrial technology from the early 1800s through the 1930s Lavishly illustrated with 19th century prints and more recent photographs of factory interiors and industrial products this important work traces the direct and indirect routes down the

road toward modern American industrial civilization For business and labor historians and for historians of American technology and industrialization Hounshell's book will fill many gaps in the history of the technical contours of modern industrial America the book begins with an examination of the origins of the American system of manufactures in government and private arms production and then moves to the sewing machine woodworking agricultural equipment bicycle and automobile industries It touches on the important inventors and innovators and describes their fundamental contributions in these American industries Most of the principal figures and institutions are covered Simeon North Eli Whitney Thomas Blanchard John H Hall and Samuel Colt in armories Eli Terry and Seth Thomas in the clockmaking industry the Wheeler and Wilson Willcox and Gibbs and Singer sewing machine firms the Singer woodworking plant the McCormick Reaper works the Columbia Pope and Western Wheel Works bicycle companies and the Ford and General Motors automotive corporations Hounshell's work is a major contribution to the social history of technical innovators and their innovations All in all From the American System to Mass Production is an impressive work In his documentation of the history of American industrial technology Hounshell has demonstrated the slow evolution and the near failure of large scale capital intensive and work degrading industrial systems Whereas other historians of technology have tended to tread too lightly on the social dimensions of technical change Hounshell has provided an excellent social analysis of the networks of innovators and their role in the diffusion of armory practices and other industrial advances from industry to industry Technology and Culture Mr Hounshell is an enthusiastic lively writer yet very careful scholar He is cautious in his conclusions and candid about what is debatable He offers several sides of every issue he does not judge particular technologies as good or bad What stands out in this history is how slowly what appears to be a sensible productive and efficient system of manufacturing was adopted chiefly because it required a change in the mind set of managers changes in skills and work habits of workers and disciplined procedures and practices throughout the plants New York Times Book Review David Hounshell's history of the evolution of American production methods has few rivals in execution of the theme it has none Hounshell carefully documents the development transfer and modification of the technology of the manufacture of interchangeable parts from firm to firm and industry to industry A series of excellent technical photographs and Hounshell's own field trials support his argument Science A meticulous study of mass production's roots and early flowering An able researcher Hounshell follows the trail of early manufacturing ideas and shows how they were gradually perfected and diffused throughout different industries before converging in Ford's miracle at Highland Park Wall Street Journal An important study which offers a convincing reinterpretation of the development of mass production in the United States Hounshell has combined substantial new archival research with a synthesis of the mass of new work completed by others in the past three decades Journal of Economic History

From the American System to Mass Production, 1800-1932 David Hounshell, 1984

David A Hounshell s widely acclaimed history explores the American genius for mass production and traces its origins in the nineteenth century American system of manufacture Previous writers on the American system have argued that the technical problems of mass production had been solved by armsmakers before the Civil War Drawing upon the extensive business and manufacturing records of leading American firms Hounshell demonstrates that the diffusion of arms production technology was neither as fast nor as smooth as had been assumed Exploring the manufacture of sewing machines and furniture bicycles and reapers he shows that both the expression mass production and the technology that lay behind it were developments of the twentieth century attributable in large part to the Ford Motor Company Hounshell examines the importance of individuals in the diffusion and development of production technology and the central place of marketing strategy in the success of selected American manufacturers Whereas Ford was the seedbed of the assembly line revolution it was General Motors that initiated a new era with its introduction of the annual model change With the new marketing strategy the technology of the changeover became of paramount importance Hounshell chronicles how painfully Ford learned this lesson and recounts how the successful mass production of automobiles led to the establishment of an ethos of mass production to an era in which proponents of Fordism argued that mass production would solve all of America s social problems
