Klapp, 1978-09-29 In this original application of information theory to social analysis Orrin Klapp examines how and why societies are producing more stress than they ever can handle He argues that the reduction of social noise the chaos from which we try to construct meaning is a major goal of individuals and groups alike Individuals groups even entire societies normally cycle rhythmically between two basic modes of adaptation to the constant communication flow opening or scanning for desired information and closing or defending against noise For example in a society functioning in the opening mode movements like ecumenicism and expansionism achieve momentum Extreme reactions in either mode lead to an opposite swing according to Professor Klapp's model His wide ranging conceptual scheme incorporates hypotheses about the variety

and redundancy of information as well as about human channel capacities and the need for homeostasis His research reveals intriguing relationships among such phenomena as the concern about industrial population and the search for ethnic roots

Cooperation and Competition Among Primitive Peoples Margaret Mead, 2018-02-06 In many respects this volume is a pioneer effort in anthropological literature It remains firmly part of the genre of cooperative research or interdisciplinary research though at the time of its original publication that phrase had yet to be coined Additionally this work is more theoretical in nature than a faithful anthropological record as all the essays were written in New York City on a low budget and without fieldwork The significance of these studies lies in the fact that Cooperation and Competition Among Primitive Peoples was the first attempt to think about the very complex problems of cultural character and social structure coupled with a meticulous execution of comparative study

Asian-american Education Meyer Weinberg, 2012-12-06 Asian American Education Historical Background and Current Realities fills a gap in the study of the social and historical experiences of Asians in U S schools It is the first historical work to provide American readers with information about highly individual ethnic groups rather than viewing distinctly different groups as one vague global entity such as Asians The people who populate each chapter are portrayed as active participants in their history rather than as passive victims of their culture Each of the twelve country specific chapters begins with a description of the kind of education received in the home country including how widely available it was how equal or unequal the society was and what were the circumstances under which the emigration of children from the country occurred The latter part of each of these chapters deals with the education these children have received in the United States Throughout the book instead of dwelling on a relatively narrow range of children who perform spectacularly well the author tries to discover the educational situation typical among average students The order of chapters is roughly chronological in terms of when the first sizable numbers of immigrants came from a specific country

Defining Status Arnold H. Leibowitz,2023-11-27 This book offers a comprehensive analysis of the territorial relations of the United States examining the historical and legal frameworks of U S territories and possessions It delves into the evolution of territorial status the impact of federal policies and the unique challenges faced by territories such as Puerto Rico Guam and American Samoa The author Arnold H Leibowitz provides an in depth exploration of issues like statehood commonwealth status and the implications of federal power on territorial governance The book is aimed at readers interested in U S law politics and history particularly those focusing on the complexities of territorial administration and the quest for political and economic equality within the broader U S framework

Early State Economics Henri Claessen,Pieter van de Velde,2017-09-08 The central theme of this volume is the political economy of early state societies the ways in which the income of the central government of such systems was collected and spent The work contains descriptive as well as narrative and commemorative essays Contributions present data on early states as diverse as the Interlacustrine states of East Africa the Sudanic states of West Africa prehistoric Cahokia in the Mississippi Valley Aztec Mexico the Classical Maya eighteenth century Nepal and Polynesian Tahitian and Mayan case studies At the theoretical end of the spectrum the book offers a general discussion of the concept of political economy modes of production in antiquity and the editors themselves offer an overview of early state organizational forms With the data of the contributions to this volume such theoretical viewpoints are evaluated The conclusion is that inherited approaches fall far short of explaining the political economies of early states The editors of this volume maintain that much thinking on this issue of the early state is off base because it is confined to the study of redistribution They hold that a prestige goods system is probably as important while in some cases the key factor to look at is tribute or taxation Likewise the system of gift giving often viewed as ancillary should be considered central to the performance of the ancient states In short political economy is rooted in the stages of social growth Nearly all contributors agree that simple evolutionary generalizations can no longer be applied to specific cases without considerable modification and in this undertaking formalist and Marxist canons alike need to be invoked for a deeper understanding of the actual operations of the state in earlier societies

Pacific Islanders Under German Rule Peter J. Humpal,2016-06-01 This is an important book It is a reprint of the first detailed study of how Pacific Islanders responded politically and economically to their rulers across the German empire of the Pacific Under one cover it captures the variety of interactions between the

various German colonial administrations with their separate approaches and the leaders and people of Samoa in Polynesia the major island centre of Pohnpei in Micronesia and the indigenes of New Guinea Drawing on anthropology new Pacific history insights and a range of theoretical works on African and Asian resistance from the 1960s and 1970s it reveals the complexities of Islander reactions and the nature of protests against German imperial rule It casts aside old assumptions that colonised peoples always resisted European colonisers Instead this book argues convincingly that Islander responses were often intelligent and subtle manipulations of their rulers agendas their societies dynamic enough to make their own adjustments to the demands of empire It does not shy away from major blunders by German colonial administrators nor from the strategic and tactical mistakes of Islander leaders At the same time it raises the profile of several large personalities on both sides of the colonial frontier including Lauaki Namulau ulu Mamoe and Wilhelm Solf in Samoa Henry Nanpei Georg Fritz and Karl Boeder in Pohnpei or Governor Albert Hahl and Po Minis from Manus Island in New Guinea Pacific Spaces A.-Chr Engels-Schwarzpaul, Lana Lopesi, Albert L. Refiti, 2022-10-14 Delving into Pacific spaces from a variety of disciplinary perspectives and interpretations this book looks at how the anthropological and architectural can be connected The contributors to this book architectural practitioners architectural and spatial design theorists anthropologists and historians show not only how new theoretical perspectives can arise out of comparing aspects specific to one discipline with their equivalents of another but also demonstrate how a space of emergence is created for something that goes beyond both enhancing both fields of potentialities *In the Country of the Old* Jon Hendricks, 2019-03-29 Aging is a universal experience and an individual one But it is also a cultural phenomenon Our ethnic and social background has a strong influence on how we deal with growing old This collection draws on research from around the world to explore how cultural context shapes and defines the aging process Studies examine differing patterns in the lives of the aged in Portugal Polynesia Sweden and Israel and among ethnic groups in the United States
