

THE PROGNOSTICATIONS OF PARACELSUS

In 1536, the alchemist, philosopher and doctor, Paracelsus, created a book of prognostications and predictions of events for the following thirty years. This predated the now more familiar prophecies of Nostradamus by nearly twenty years.

Paracelsus' book was illustrated with thirty-one images which relate to and amplify the obscure texts of the prognostications.

These woodcuts were hand coloured by Adam McLean in 2011.

Elucidations Of The Prognostications And Conclusion Of Dr Paracelsus:

The Prophecies of Paracelsus J. K. William Rider, **The Prophecies of Paracelsus** Paracelsus,1915 Elucidations of the Prognostications and Conclusion of Dr. Paracelsus Franz Hartmann, Theophrastus Paracelsus,2005-12 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work *The Prophecies of Paracelsus* Paracelsus,2016-08-06 Theophrastus Paracelsus doctor chemist and mystic was born in Switzerland in 1493 He is celebrated as the man who on his appointment as town physician and lecturer in the University of Basle in 1526 preceeded his lectures by a solemn burning of the books of his illustrious predecessors Galen and Avicenna In the course of a tempestuous life he helped to transform the highly abstract and theoretical view of medicine into one observation and experiment diagnosis and treatment At the same time he was a visionary who believed that the life of man was inseparable from that of the universe and that man is penetrated by the astral spirit as well as having a soul Paracelsus prophecies were first published in German in 1530 and enjoyed considerable popularity for about a century Thereafter they fell into oblivion until rescued in the nineteenth century by the Kabbalist and Magician Eliphas Levi The prophecies comprise 32 allegorical pictures each accompanied by a prognostication a preface and an elucidation Paracelsus images are usually obscure It was as if he saw the future as a series of moving pictures on a film but was only able to describe them out of chronological sequence Most of the events predicted are concerned with the church or state and the span of time involved seems to be 24 and 42 or probably multiples thereof Like other occult works of the period the course of future events is never explicitly stated It is up to the reader to use his insight and imagination to draw his own conclusions from the subtle hints that Paracelsus gives **The Prophecies of Paracelsus** Paracelse,2023-02-02 The Prophecies of Paracelsus attracted my attention at an early stage of my studies in the Occult which have now extended to over forty years but I have only recently thought of bringing them to public notice the extraordinary events of the present time acting as an incentive The famous French Kabbalist Alphonse Louis Constant in La Clef des Grands Myst res p 378 wrote The Prophecy of Paracelsus of which we here give the Preface is composed of thirty two chapters with allegorical figures It is the most astounding monument and indisputable proof of the reality and existence of the gift of natural prophecy Abb Constant born 1809 died 1875 better known by his Hebraistic pseudonym Eliphas L vi Fahed was a distinguished Adept Magus and Writer on the Occult Most of his works have been ably translated by Mr A E Waite The Preface Eliphas L vi refers to is not given here but will be found preceding the Predictions **The Prognostications of Paracelsus** Adam McLean,2017-02-11 The sixteenth Century alchemist philosopher and doctor Paracelsus created a book in 1536 of prognostications predictions of events for the following 30 years This predated the now more familiar prophecies of

Nostradamus by nearly twenty years Paracelsus book was illustrated with 31 images which relate to and amplify the obscure texts of the prognostications For this book Adam McLean has coloured the woodcut emblems The Prophecies of Paracelsus. Magic Figures and Prognostications Made by Theophrastus Paracelsus ... Translated by J.K. With Introduction Paracelsus, J. The Devil's Doctor Philip Ball, 2006 Philip Theophrastus Aureolus Bombastus von Hohenheim known to later ages as Paracelsus stands on the borderline between medieval and modern a name that is familiar but a man who has been hard to perceive or understand Contemporary of Luther enemy of established medicine scourge of the universities at all the German schools you cannot learn as much as at the Frankfurt Fair army surgeon and alchemist myths about him from his treating the plague from beyond the grave in mid nineteenth century Salzburg to his Faustian bargain with the devil to regain his youth have been far more lasting than his actual story Even during his lifetime he was rumoured to travel with a magical white horse and to store the elixir of life in the pommel of his sword But who was Paracelsus and what did he really believe and practice Although Paracelsus has been seen as both a charlatan and as a founder of modern science Philip Ball's book reveals a more richly complex man who used his eyes and ears to learn from nature how to heal and who wrote influential books on medicine surgery alchemy and theology while living a drunken combative vagabond life Above all Ball reveals a man who was a product of his time an age of great change in which the church was divided and the classics were rediscovered and whose bringing together of the seemingly diverse disciplines of alchemy and biology signalled the beginning of the age of rationalism Philip Ball's life of Paracelsus fascinatingly reveals the richness complexity and chaos of sixteenth century Europe in a stunning piece of historical and biographical writing **Paracelsus** Franz Hartmann, 2014-03-29 This Is A New Release Of The Original 1922 Edition **Paracelsus** John Stillman, 2017-12-12 Paracelsus 1493 4 24 September 1541 born Theophrastus von Hohenheim full name Philippus Aureolus Theophrastus Bombastus von Hohenheim was a Swiss physician alchemist and astrologer of the German Renaissance He was a pioneer in several aspects of the medical revolution of the Renaissance emphasizing the value of observation in combination with received wisdom He is credited as the father of toxicology He also had a substantial impact as a prophet or diviner his Prognostications being studied by Rosicrucians in the late 16th and 17th centuries Paracelsianism is the early modern medical movement inspired by the study of his works
