## Emancipation Of Labor:

**The Emancipation of Labor** Henryk Katz, 1992-05-21 Beginning in 1859 the world was engulfed by a new process of revolutionary change that was more extensive geographically more prolonged in time more powerful and more varied in its consequences than the great European revolution of 1848 1849 The same working classes participated in both movements but earlier visions were replaced by pragmatic ideas new forms of organization and new lines of action This volume chronicles the emergence and evolution of one of the new groups the International Working Men s Association which went into history under the name of the First International Unlike previous historians and writers who generally aligned themselves with either Marx or Bakunin the great rivals in the movement author Henryk Katz offers a history of the group and its scores of fascinating personalities He surveys the First International in the context of the general history of the period from 1846 to 1874 as well as in the context of the worldwide movements of liberation that included the freeing of American slaves the emancipation of Russian serfs and the unification of Italy Katz also fully describes the major role the First International played in the process of the revival and expansion of the West European labor movement Working from primary and secondary sources Katz presents a secularized history of the International that will be a valuable reference tool for both libraries and a wide variety of history political science and sociology courses

**The Emancipation of Labor Group, 1883-1893** Robert E. Drumm, 1969 *The Emancipation of Labor*, 1914 **Protokoll Der Jahres-convention Der American Federation of Labor** American Federation of Labor, 1914 Time and Revolution Stephen E. Hanson, 2000-11-09 Stephen Hanson traces the influence of the Marxist conception of time in Soviet politics from Lenin to Gorbachev He argues that the history of Marxism and Leninism reveals an unsuccessful revolutionary effort to reorder the human relationship with time and that this reorganization had a direct impact on the design of the central political socioeconomic and cultural institutions of the Soviet Union from 1917 to 1991 According to Hanson westerners tend to envision time as both rational and inexorable In a system in which time is money the clock dominates workers Marx however believed that communist workers would be freed of the artificial distinction between leisure time and work time As a result they would be able to surpass capitalist production levels and ultimately control time itself Hanson reveals the distinctive imprint of this philosophy on the formation and development of Soviet institutions arguing that the breakdown of Gorbachev s perestroika and the resulting collapse of the Soviet Union demonstrate the failure of the idea

In revolutionary China writers were regularly dispatched to the countryside or factories with the expectation that through immersion in the life of workers and peasants they would be remade as culture workers whose writing could serve the communist project. Their cultural labor would not merely reflect or represent the process of building socialism; it would actively participate in it by excavating the contradictions and challenges of the ongoing reorganization of social relations. Benjamin Kindler examines how writing transformed the Chinese Revolution even as the revolution remade what it meant to write. He argues that the revolution sought in unparalleled ways to overcome the basic division between those who write and those who work. This book combines close readings of a wide range of texts from the works of established figures to the writings of amateur workers drawn from the factory floor with analysis of Chinese socialist political economy. Far from being drab instances of state propaganda, these texts and cultural experiments were lively and inventive attempts to determine what a different, more equal society might look like. Offering new ways to understand cultural production as a material embodied process, this book reconsiders the role of art and literature in radical politics.

**Poststructuralism and the Politics of Method** Andrew M. Koch, 2007-01-01. Poststructuralism and the Politics of Method examines the political possibilities emerging with poststructuralist epistemology. Beginning with the premises for the construction of knowledge claims, Koch explores the dimensions of materialism, democracy, power, leftist politics, and other themes emerging from the this twentieth century philosophic movement.
