Emergence Of The English Author:

The Emergence of the English Author Kevin Pask, 1996-08-08 The historical construction of literary authorship has long been of particular interest to literary scholars Yet an important aspect of the historical emergence of the author the literary biography or life of the poet has received scant attention In The Emergence of the English Author Kevin Pask studies the early life narratives of five now canonical English poets Geoffrey Chaucer Philip Sidney Edmund Spenser John Donne and John Milton By attending to the changing shape of the lives of these poets Pask produces a history of the developing conception of literary authorship in England from the late medieval period to the end of the eighteenth century and offers a long term sociological account of literary production His book is the first full scale history of the cultural construction of literary authority in early modern England A Brief History of English Syntax Olga Fischer, Hendrik De Smet, Wim van der Wurff, 2017-06-08 An accessible up to date account of the major changes in English syntax since its beginnings up to the Ideas of Authorship in the English and Scottish Dream Vision Laurie Atkinson, 2024 An investigation of English and Scottish dream visions written on the cusp of the Renaissance teasing out distinctive ideas of authorship which informed their design The fifteenth and sixteenth centuries have long been acknowledged as a period of profound change in ideas of authorship in which a transition from a medieval to a modern paradigm took place In England and Scotland changing approaches to Chaucer have rightly been considered as a catalyst for the elevation of English as a literary language and the birth of an English literary history There is a tendency however when moving from Chaucer's self professed poetic followers of this time to the philological approach associated with William Caxton and the 1532 Works to pass over the literary careers of the English and Scots poets belonging to the intervening half century John Skelton William Dunbar Stephen Hawes and Gavin Douglas This volume redresses that neglect Its close and comparative readings of these poets stimulating but critically neglected dream visions and related first person narratives reveal a spectrum of ideas of authorship four distinct engagements with tradition and opportunity united by their utilisation of a particular form It regards authorship as a topic of invention a discourse for appropriation which is available to but not inevitable in late medieval and early modern writing Overall it facilitates newly focussed study of an often obscured literary historical period one with a heightened interest in the authors of the past Chaucer Lydgate Petrarch Virgil but also an increasingly acute perception of the conditions of authorship in the present Cyclopædia of English Literature; a History, Critical and Biographical, of British Authors, from the Earliest to the Present Times. Edited by R. Chambers Robert Chambers, 1860 A Manual of English Literature and of the History of the English Language from the Norman Conquest George Lillie Craik, 1874 A History of Modern Colloquial English Henry Cecil Wyld, 1956 Contributions to American Educational History United States. Office of Education, 1887 A History of English Literature Robert Huntington Fletcher, 1919 Jonathan Swift another unique figure of very mixed traits is like Defoe in that he connects the reign of William III with that of his successors and that in

accordance with the spirit of his age he wrote for the most part not for literary but for practical purposes in many other respects the two are widely different Swift is one of the best representatives in English literature of sheer intellectual power but his character his aims his environment and the circumstances of his life denied to him also literary achievement of the greatest permanent significance A Catalogue of Standard English Authors, Ancient and Modern ...
