Kuznick, 2019-09-10 The debate over scientists social responsibility is a topic of great controversy today Peter J Kuznick here traces the origin of that debate to the 1930s and places it in a context that forces a reevaluation of the relationship between science and politics in twentieth century America Kuznick reveals how an influential segment of the American scientific community during the Depression era underwent a profound transformation in its social values and political beliefs replacing a once pervasive conservatism and antipathy to political involvement with a new ethic of social reform **Agricultural** Library Notes ,1940 American Men of Science .1949 The Story of International Relations, Part One Jo-Anne Pemberton, 2019-09-09 This book is the first volume in a trilogy that traces the development of the academic subject of International Relations or what was often referred to in the interwar years as International Studies This first volume takes on the origins of International Relations beginning with the League of Nations and the International Studies Conference in Berlin in 1928 and tracing its development through the Paris Peace Conference the quest for cooperation in the Pacific the Institute of Pacific Relations and lessons from Copenhagen Shanghai and Manchuria This project is an impressive and exhaustive consideration of the evolution of IR and is aptly published in celebration of the discipline s centenary **History of Science and the New Humanism** Michael Novak, 2018-01-16 In this classic work the foremost historian of science in our time George Sarton sums up his reflections on the role of science and of the humanities in our culture Voicing his opposition to the old fashioned humanists on the one hand and to the uneducated men of science and technicians on the other Sarton points out to the former that the humanities without scientific are essentially incomplete He warns the latter that without history without philosophy without arts and letters without a living religion human life on this planet would cease to be worthwhile After outlining his Faith of a Humanist in the opening section Sarton goes on to analyze The History of Science and the History of Civilization to discuss the progress of scientific thought since ancient times in East and West and to propose the solution for the educational and cultural crisis of our time in The New Humanism and in The History of Science and the Problems of Today He concludes not only that science is a source of technological development that has

changed the face of the earth and has convulsed our lives for good and evil but that it nonetheless affords the best means of understanding the world its people and the multitude of their relationships Science is the conscience of mankind Included in this edition is Robert M Merton's address before the Sarton Centennial meeting of November 1984 It is a stunning tour de force in its own right providing insights into Sarton teaching and research at Harvard in the 1930s and the personal interaction between Sarton the mentor and Merton the pupil The essay supplements May Sarton's earlier Informal Portrait of George Sarton Money to Burn Horace Coon, Originally published in 1938 this is a classic muckraking account of the role of philanthropic foundations Horace Coon's journalistic indictment of the state of philanthropy in the 1920s and 1930s emphasizes how great wealth perpetuates itself through the mechanism of the foundation Coon looks at how foundations influence education and public thinking the extent to which they support scientific medical and social science research and their financial operations But Money to Burn is more than an example of what we today would call investigative journalism It is also one of the first serious efforts to describe the history of modern American philanthropy Coon discusses the origins of philanthropic foundations in Western history and the establishment of the Carnegie and Rockefeller foundations reviews the founders motives and launches a biting critique in the context of the economic disaster of the Great Depression He grapples with the concept of the foundation as a semi public institution that links political economic and public concerns and he questions what degree of accountability to the public is appropriate While Coon's interpretive criticism of the American philanthropic foundations reflects the political and economic concerns of the late 1930s it stays honestly close to the facts Money to Burn can be read profitably today as both a good general history of the emergence of modern American philanthropy and as an example of the public s concern with concentration of money and power at the end of the 1930s Money to Burn another volume in the Philanthropy in Society series will be of interest to social scientists philanthropists public policy analysts and decision makers interested in the role of the voluntary sector in American society **Proceedings** of the Linnean Society of New South Wales Linnean Society of New South Wales, 1939 Science John Michels (Journalist), 1919 Vols for 1911 13 contain the Proceedings of the Helminothological Society of Washington ISSN 0018 0120 1st 15th meeting North Carolina Union List of Scientific Serials ,1965 Edwin Hubble Gale E.
