The Way the World Is Marc J. Swartz, 2023-11-15 Marc Swartz takes us for the first time into the homes and neighborhoods of the Swahili in the East African port of Mombasa At the same time he develops a new model for the operation and transmission of culture In asking how cultural elements influence the social behavior of those who do not share them as well as of those who do Swartz points to the mediation of status The many types of status available to individuals provide guidelines that help explain for example why the broadly shared elements of Swahili culture Islamic religion or the nuclear family do not alone translate into behavior The Way the World Is demonstrates in a highly original way how culture works This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991 Medical Anthropology and the World System Hans A. Young, 2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1983 Ethnography Harry F. Wolcott, 1999 Harry Wolcott one of anthropology s leading writers on ethnographic methods here addresses the nature of the ethnographic enterprise itself Tracing its development from its disciplinary origins in sociology and anthropology he helps the reader understand what is distinctive about ethnography and what it means to conduct research in the ethnographic tradition In this engaging thought provoking book he distinguishes ethnography as more than just a set of field methods and practices separating it from many related qualitative research

traditions as a way of seeing through the lens of culture For both beginning and experienced ethnographers in a wide range of disciplines Wolcott's book will provide important ideas for improving research practice *The Straight Path of the Spirit* Richard Katz, 1999-04-01 The inspiring story of one man's exploration of indigenous healing in a culture fighting to preserve its spiritual health A firsthand account of a little known healing tradition A dramatic story of self transformation by a well respected Harvard educated anthropologist In the late 1970s Richard Katz a clinical psychologist trained in anthropology spent two years living in a remote island community in Fiji hoping to record the practices of its healers At the foundation of their healing he discovered was the concept of the straight path a journey through life whose truth is revealed only to the extent that it is searched for with honesty and faith It is a way of healing that in its very essence is a way of living a path that emphasizes the spiritual dimensions of health and the relevance of these to the community But while interviewing healers at work Katz was drawn into an increasingly suspenseful drama Unexplained deaths rumors and suspicions and the intrusion of a zealous evangelist rocked the village and soon revealed to the author the dangerous alternative to the straight path the misuse of power that some call witchcraft *The Straight Path of the Spirit* is an engrossing story of indigenous healers and a dramatic account of cultures in collision Through the story of his own self transformation Katz reveals not only those aspects of life essential for the Fijians as they struggle to hold onto their identity but also what is of importance to all of us who seek to retain our humanity **Factional Competition and Political Development in the New World** Elizabeth M.

American Anthropology, 1971-1995 Regna Darnell,2002-01-01 American anthropology in the late twentieth century interrogated and depicted the worlds of others past and present in subtle and incisive ways while increasingly questioning its own authority to do so Marxist symbolic and structuralist thought shaped the fieldwork and conclusions of many researchers around the globe Practicing anthropology blossomed and grew rapidly as a subdiscipline in its own right There emerged a keener appreciation of both the history of the discipline and the histories of those studied Archaeologists witnessed a resurgence of interest in the concept of culture The American Anthropologist also made systematic efforts to represent the field as a whole with biological anthropology and linguistics particularly adept at crossing subdiscipline boundaries Proliferation of specialized areas within sociocultural anthropology encouraged work across the subdisciplines The thirty selections in this volume reflect the notable trends and accomplishments in American anthropology during the closing decades of the millennium An introduction by Regna Darnell offers a historical background and critical context that enable

readers to better understand the changes and continuity in American anthropology during this time *Plaquemine Archaeology* Mark A. Rees, Patrick C. Livingood, 2007 First major work to deal solely with the Plaquemine societies Plaquemine Louisiana about 10 miles south of Baton Rouge on the banks of the Mississippi River seems an unassuming southern community for which to designate an entire culture Archaeological research conducted in the region between 1938 and 1941 however revealed distinctive cultural materials that provided the basis for distinguishing a unique cultural manifestation in the Lower Mississippi Valley Plaquemine was first cited in the archaeological literature by James Ford and Gordon Willey in their 1941 synthesis of eastern U S prehistory Lower Valley researchers have subsequently grappled with where to place this culture in the local chronology based on its ceramics earthen mounds and habitations Plaquemine cultural materials share some characteristics with other local cultures but differ significantly from Coles Creek and Mississippian cultures of the Southeast Plaquemine has consequently received the dubious distinction of being defined by the characteristics it lacks rather than by those it possesses The current volume brings together eleven leading scholars devoted to shedding new light on Plaquemine and providing a clearer understanding of its relationship to other Native American cultures The authors provide a thorough yet focused review of previous research recent revelations and directions for future research They present pertinent new data on cultural variability and connections in the Lower Mississippi Valley and interpret the implications for similar cultures and cultural relationships This volume finally places Plaquemine on the map incontrovertibly demonstrating the accomplishments and importance of Plaquemine peoples in the long history of native North America **Prehistoric Adaptation in the American Southwest** Rosalind L. Hunter-Anderson, 1986-10-30 This book is about post Pleistocene adaptive change among the aboriginal cultures of the mountains and deserts of Arizona and New Mexico Conceived essentially as a natural science alternative to the prevailing culture history paradigm it offers both a general theoretical framework for interpreting the archaeological record of the American South West and a persuasive evolutionary model for the shift from a hunter gatherer economy to horticulture at the Mogollon Anasazi interface Technical architectural and settlement adaptations are examined and the rise of matrilineality ethnic groupings and clans are modelled using ecological and ethnographic data and the innovative idea of anticipated cultural response In the last part of the book Dr Hunter Anderson evaluates the fit between her model and the archaeological record and argues vigorously for research into the evolution of ethnicity in the adaptive context of regional competition **Craft Production and Social Change in Northern China** Anne P. Underhill, 2012-12-06 This book offers an anthropological analysis of how craft production changed in relation to the development of complex societies in northern China It focuses on the production and use of food containers pottery and bronze vessels during the late prehistoric and early historic periods A major theme is how production and use of prestige vessels changed in relation to increase in degree of social inequality The research and writing of this book took place intermittently over a period of several years When I first outlined the book in 1994 I planned to offer a more limited

and descriptive account of social change during the late prehistoric period In considering the human desire to display status with prestige goods my initial approach emphasized how the case of northern China was similar to other areas of the world I began to realize that in order to adequately explain how and why craft production changed in ancient China it was crucial to consider the belief systems that motivated production and use of food containers Similarly a striking characteristic of ancient China that I needed to include in the analysis was the preponderance of food containers rather than other goods that were buried with the deceased I decided to investigate the social and ritual uses of food beverages and containers during more than one period of Chinese history Some strong patterns could have emerged during the late prehistoric period

Ancient Maya Political Economies Marilyn A. Masson, David A. Freidel, 2002 Ancient Maya Political Economies examines variation in systems of economic production and exchange and how these systems supported the power networks that integrated Maya society Using models originally developed by William L. Rathje the authors explore core periphery relations the use of household analysis to reconstruct political economy and evidence for market development In doing so they challenge the conventional wisdom of decentralized Maya political authority and replace it with a more complex view of the political economic foundations of Maya civilization

The Saga of Gunnlaugr Snake's Tongue E. Paul Durrenberger, Dorothy Durrenberger, 1992 Having sworn to disgrace Gunnlaugr Hrafn returns to Iceland to ask for Helga in marriage as the three years she was to wait have passed Delayed in his travels Gunnlaugr returns the day of the wedding but can not stop it Gunnlaugr challenges Hrafn to the last duel ever fought in Iceland but kinsmen and friends of both prevent the fight The two travel to Sweden where they meet and fight Both die as foretold in Thorsteinn's dream Dreaming of Gunnlaugr Helga dies in the arms of her second husband a third poet as the dream foretold There the saga ends In addition to the translation of the saga this book contains an anthropological analysis of the saga and saga writing in medieval Iceland Beyond relating events this saga like others of its genre is an expression of the totemic system of the primitive society that produced it a stratified society without the institutions of a state

The Anthropology of Health and Healing Mari Womack, 2010 The Anthropology of Health and Healing provides the first holistic approach to the study of medical anthropology Over the past two decades medical anthropology has been the most rapidly growing subfield in anthropology and a number of medical anthropology texts have been published focusing primarily on public policy and health care delivery systems Yet while anthropologists have researched topics related to medical anthropology for more than one hundred years here Mari Womack thoroughly surveys this richly diverse field and provides an integrated approach that links together the biological psychological social communicative epidemiological philosophical historical and developmental factors that shape health and healing Book jacket

Resources, Power, and Interregional Interaction Edward M. Schortman, Patricia A. Urban, 2013-03-09 Archaeological research on interregional interaction processes has recently reasserted itself after a long hiatus following the eclipse of diffusion studies This rebirth was marked not only by a sudden increase in publications that

were focused on interaction questions but also by a diversity of perspectives on past contacts To perdurable interests in warfare were added trade studies by the late 1960s These viewpoints in turn were rapidly joined in the late 1970s by a wide range of intellectual schemes stimulated by developments in French Marxism referred to in various ways termed political ideology here and sociology Immanuel Wallerstein's world systems model Researchers ascribing to the aforementioned intellectual frameworks were united in their dissatisfaction with attempts to explain sociopolitical change that treated individual cultures or societies as isolated entities Only by reconstructing the complex intersocietal networks in which polities were integrated the natures of these ties who mediated the connections and the political economic and ideological significance of the goods and ideas that moved along them could adequate explanations of sociopolitical shifts be formulated Archaeologists seemed to be rediscovering in the late twentieth century the importance of interregional contacts in processes of sociopolitical change The diversity of perspectives that resulted seemed to be symptomatic of both an uncertainty of how best to approach this topic and the importance archaeologists attributed to it

Sociological Worlds Stephen K. Sanderson, 2013-10-31 This reissue of the now classic *Sociological Worlds* originally published in 1995 attempts to present a comprehensive picture of human social life from the perspective of the comparative historical revolution in sociology and presents some of the best theoretical and empirical work that is now being done by comparative historical sociologists as well as work by their close cousins socio cultural anthropologists From this perspective readers gain a picture of the major ways in which human societies differ For this new library edition Professor Sanderson has provided both a new preface and three contributions that did not appear in the original edition

Street-Gang and Tribal-Warrior Autobiographies H. David Brumble, 2018-04-10 *Street Gang and Tribal Warrior Autobiographies* is a study of the autobiographies of tribal warrior cultures in North America the Amazon the Orinoco Basin the highlands of Luzon the island of Alor of headhunters women Apaches New Guinea big men and a Yanomami captive The book also discusses tribal warrior autobiographies closer to home Colton Simpson's *Inside the Crips* Mona Ruiz's *Two Badges* Nathan McCall's *Makes Me Wanna Holler* and Sanyika Shakur's *Monster* autobiographies that remember gangbanging at a time when there were close to 500 gang related homicides a year in Los Angeles a time when gangbangers were so alienated from the larger society that they reinvented something very similar to the tribal warrior cultures right in the asphalt heart of American cities Grisly probing and resonant with the voices of generations of fighters *Street Gang and Tribal Warrior Autobiographies* is an unsettling work of cross disciplinary scholarship
