

Evans and Embedded Autonomy

- What is a developmental state, according to Evans
 - What are its internal and external characteristics?
- What are the characteristics of a 'predatory' state?
- How can one transform a predatory state into a developmental state?
 - This is the key question in the institutions and governance approach to development

Embedded Autonomy:

Embedded Autonomy Peter B. Evans, 2012-01-12 In recent years debate on the state's economic role has too often devolved into diatribes against intervention. Peter Evans questions such simplistic views, offering a new vision of why state involvement works in some cases and produces disasters in others. To illustrate, he looks at how state agencies, local entrepreneurs, and transnational corporations shaped the emergence of computer industries in Brazil, India, and Korea during the seventies and eighties. Evans starts with the idea that states vary in the way they are organized and tied to society. In some nations like Zaire, the state is predatory, ruthlessly extracting and providing nothing of value in return. In others like Korea, it is developmental, promoting industrial transformation. In still others like Brazil and India, it is in between, sometimes helping, sometimes hindering. Evans's years of comparative research on the successes and failures of state involvement in the process of industrialization have here been crafted into a persuasive and entertaining work which demonstrates that successful state action requires an understanding of its own limits, a realistic relationship to the global economy, and the combination of coherent internal organization and close links to society that Evans called embedded autonomy.

Democratising Local Government, 2002 Local government is at the forefront of development. In South Africa, the ambitious policy objectives of post-apartheid reconstruction and development hinge on the successful creation of a democratic tier of government close to the people. An entirely new system of developmental local government has thus been introduced. As is the case in many developing countries, the responsibilities of municipalities in South Africa have been extended dramatically, often without adequate resources. Managing municipalities for development therefore requires political will and strategic intervention. The book provides a comprehensive introduction to developmental local government. It includes the design of the new local government system and the issues posed by decentralisation, an overview of specific challenges of urban and rural municipalities, a discussion of special issues facing local government including poverty, gender, and environment, new tools for local government including budgeting, indicators, municipal partnerships, and capacity building.

The Myth of the Powerless State Linda Weiss, 2018-05-31 Conventional wisdom argues that the integration of the world economy is making national governments less powerful, but Linda Weiss disagrees. In an era when global society and the transnational market are trendy concepts, she suggests that state capacities for domestic transformative strategies provide a competitive advantage. Some of the most successful economies rely on state-informed and state-embedded institutions for governing the economy. In fact, she contends, the strength of external economic pressures is largely determined domestically, and the effect of such pressures varies with the strength of domestic institutions. Weiss analyzes the sources and varieties of state capacity for governing industrial transformation in contemporary cases: the unraveling of Sweden's distributive model of adjustment, the evolution of developmental states in Northeast Asia, and the parallel strengths of the German and Japanese systems of industrial coordination. Her comparative perspective allows her to show how different

types of state capacity affect industrial vitality and domestic adjustment to global forces As economic integration proceeds she concludes state capabilities will matter more rather than less in fostering social well being and the creation of wealth

Developmental States Linda Low,2004 As the Asian crisis triggered or precipitated the meltdown a second objective is to explore the reasons and factors for the breakdown or redundancy of developmental states distinguishing between domestic transformative capacity and external global factors as identified A third objective is to cull experiences and lessons beyond East Asia With many transition economies in Central and Eastern Europe beside China and Indochinese states the theory and practice of developmental states may be a useful bridge These are by no means exhaustive and comprehensive aims questions and issues For individual developmental states covered in this volume country specific lessons may also be drawn for them to be reconfigured to stay relevant The most important consideration for this volume is to value add to the literature both the theory and principles of the Asian developmental state as well as empirical observations observed elsewhere This volume comprises 13 chapters in two parts

The Struggle for Development and Democracy: A General Theory Alessandro Olsaretti,2023-03-13 In The Struggle for Development and Democracy Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash namely uneven development and divisive politics heightened by the 9 11 attacks This volume proposes a general theory of development and democracy as part of a unified theory of power emphasizing that development needs markets civil society and the state and also the proper networks and interactions amongst markets civil society and the state Imperialism undermines these interactions and turns countries into providers of cheap land or labour This book begins to sketch the mechanisms at work and to answer one question how did imperialist elites build their power All royalties from sales of this volume will go to GiveWell org in honour of Alessandro Olsaretti s memory

Hong Kong's Governance Under Chinese Sovereignty Brian C. H. Fong,2014-09-04 As a hybrid regime Hong Kong has been governed by a state business alliance since the colonial era However since the handover in 1997 the transformation of Hong Kong s political and socio economic environment has eroded the conditions that supported a viable state business alliance This state business alliance which was once a solution for Hong Kong s governance has now become a political burden rather than a political asset to the post colonial Hong Kong state This book presents a critical re examination of the post 1997 governance crisis in Hong Kong under the Tung Chee hwa and Donald Tsang administrations It shows that the state business alliance has failed to function as an organizational machinery for supporting the post colonial state and has also served to generate new governance problems Drawing upon contemporary theories on hybrid regimes and state capacity this book looks beyond the existing opposition centered explanations of Hong Kong s governance crisis By establishing the causal relationship between the failure of the state business alliance and the governance crisis facing the post colonial state Brian C H Fong broadens our understanding of the governance problems and political confrontations in post colonial Hong Kong In turn he posits that

although the state business alliance worked effectively for the colonial state in the past it is now a major problem for the post colonial state and suggests that Hong Kong needs a realignment of a new governing coalition Hong Kong's Governance under Chinese Sovereignty will enrich and broaden the existing literature on Hong Kong's public governance whilst casting new light on the territory's political developments As such it will be welcomed by students and scholars interested in Chinese politics Hong Kong politics and governance

Democratization, Development, and the Patrimonial State in the Age of Globalization Eric N. Budd, 2004-01-01 Postcolonial Third World states have historically faced two major challenges the promotion of economic development and the creation of stable democracies These challenges persist today in the face of globalization While some developing former colonial countries have gotten a foothold up on globalization others are not so fortunate In Democratization Development and the Patrimonial State in the Age of Globalization author Eric Budd investigates and compares forms of patrimonialism in several developing states The traditional criticism of development countries leveled by liberal democracies and their constituents is that too much patrimonialism acts as a barrier in the face of economic development and democratization The author considers this criticism through a comparative study of the Philippines Peru Taiwan Chile Ecuador and Indonesia Each case holds a specific relationship to patrimonialism As a result these cases provide the author with a unique window into the question of patrimonialism and its effect on economic development and the development of democratic societies Democratization Development and the Patrimonial State in the Age of Globalization offers a significant contribution to disciplinary discussions in international relations economics sociology development studies and globalization studies

The Beijing Consensus? Weitseng Chen, 2017-04-27 Is there a distinctive Chinese model for law and economic

development In The Beijing Consensus scholars turn their collective attention to answer this basic but seemingly under explored question as China rises higher in its global standing Advancing debates on alternative development programs with a particular focus on social and political contexts this book demonstrates that essentially no model exists Engaging in comparative studies the contributors create a new set of benchmarks to evaluate the conventional wisdom that the Beijing Consensus challenges and that of the Beijing Consensus itself Has China demonstrated that the best model is in fact no model at all Overall this title equips the reader with an understanding of the conclusions derived from China s experience in its legal and economic development in recent decades
