Embodied Practices Kathy Davis, 1997-08-18 This book focuses on the significance of the body in contemporary feminist scholarship In recent years the body has become a hot item in both contemporary social theory and research This renewed interest has received a mixed reaction from feminists While the body may be back the new body theory often proves to be just as disembodied as it ever was The body revival seems to be less an attempt to re embody masculinist science than just another expression of the same condition which evoked the feminist critique in the first place a flight from femininity and everything that is associated with it in western culture Embodied Practices offers a critical appraisal of the recent body revival drawing upon insi

Feminism and the Biological Body Lynda Birke, 2019-06-01 Biological bodies always seem to drop out of debates about the body and its importance in western culture They are assumed to be fixed their workings irrelevant to theory This text argues that these views of biology do not serve feminist politics well *Reproductive Genetics, Gender and the Body* Elizabeth Ettorre, 2013-04-15 This book is all about reproductive genetics a sociological concept developed to define the use of DNA based technologies in the medical management and supervision of reproduction and pregnant women In a searching analysis Elizabeth Ettorre uncovers the hidden social processes involved in the development of these technologies Focussing on prenatal screening she explores how the key concepts of gender and the body are intertwined with the process of building genetic knowledge and some of the unintended consequences for women These include the injection of biology into social relationships and the development of a gendered discourse of shame and stigmatisation in which the perfect body becomes idealised and new conceptions of disability are shaped It becomes clear that the modernist tradition of scientific disinterestedness is being replaced by a new ethic the making of moral judgements by scientists Reproductive Genetics Gender and the Body draws on interviews with

European medical legal and nursing professionals and raises important issues around the gendered female body the site of genetic capital It challenges professional and scholar alike to grapple with and think through their responsibilities in this complex field where the competing issues have yet to be resolved      **Places Through the Body** Heidi Nast, Steve

Pile, 2005-08-12 This exciting collection from a leading team of international contributors interprets the symbolic and material relationships between places and bodies      *Gender and Tourism Sustainability* Claudia Eger, Ana María

Munar, Cathy H.C. Hsu, 2023-03-21 This book examines the relationship between gender and sustainability in tourism Whilst an extensive body of work exists in the areas of gender and sustainability these two fields of knowledge are seldom combined to examine tourism phenomena When we look at the evolution of tourism we see that sustainability has become an essential element in educational programmes policy making and strategic considerations for organisations and destinations Whilst the beginnings of tourism sustainability were challenging presently its relevance is seldom questioned However this situation is not the case with gender research Although gender theorising and research have existed for over a century and a rich legacy of knowledge exists on this topic meaningful and respectful engagement with this line of scholarship is thus far peripheral in tourism studies The aim of this book is to reflect on and rethink the intersection of gender and tourism sustainability through the lens of gender theory and feminist epistemology to stay with the trouble and devise pathways for sustainability gender knowledge This book will be of great interest to students researchers and academics in tourism gender and sustainability as well as tourism management The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism      **Physical Culture, Ethnography and the Body** Michael D. **De-stereotyping Indian Body and Desire** Kaustav Chakraborty, 2014-03-17  
Stereotypes result in deceptive generalizations about groups and are held in a manner that renders them as derogatory As such this volume advocates an active goal oriented effort in order to reduce prejudice through contact Deconstructing the motivated otherizing of the marginalized the book offers an alternative reading of the representations of Indian body and desire in both literature and media that are often politically inscribed as abnormal and unnatural due to their non conformity Poststructural and postcolonial theories have argued that the body is a cultural construct rather than a natural entity This argument is based on the assumption that there is no unalloyed body with any singular signification but there are bodies onto which a multiplicity of meanings are inscribed and enforced The responsibility of this inscription lies with the agencies that hold power in a culture and the infused meanings will consequently facilitate the ideologies of such agencies In other words the bodies of a certain culture are the embodiment of the ideas of those who hold power in that culture The corporality of the body in this sense is a cultural site in which the subtle political ideologies are deftly imposed and accordingly correct and sanctioned desire is expected to germinate Consequently it may be argued that apparently unified or non contradictory bodies of normal desire should be suspected of having subtle hegemonic mechanisms in their formation As a corollary to this an investigation into such abnormal bodies with unnatural desires may have the effect of subverting such a power structure Today's world believes in de stereotyped thinking and stereotyped living Language has already been declared as a means more of camouflage than of revelation As a result there is a need to deconstruct the so called radical representations and expose the undercurrent of the norm Otherization through stereotyping agencies and ideologies motivates racist sexist and other de humanizing positions and perspectives This book which is the outcome of the UGC sponsored National Seminar organised by the Department of English at Southfield College Darjeeling is an endeavour to demystify the politics behind stereotyping and to advocate the justification of de stereotyping As such it represents a significant contribution to numerous disciplines including subaltern studies women and gender studies queer studies and minority discourse The Body in Health and Social Care Julia Twigg, 2006-03-29 Focusing on health and social care this book shows how important the body

can be to a range of issues such as disability old age sexuality consumption food and public space Twigg illustrates how constructions of the body affect how we see different social groups and explores the significance of it in the provision and delivery of care

**The Body** Tiffany Atkinson, 2005-09-11 What do we mean when we talk about the body This Reader challenges the assumption that it can be invoked as a neutral or indeed natural point of reference in critical discussion or cultural practice The essays collected here foreground the historical construction of the body throughout a range of discourses from the modern to the postmodern and seek to present it not as a biological given but as a contestable signifier in the articulation of identities

Culture, Identity and Intense Performativity Tim Jordan, Brigid McClure, Kath Woodward, 2017-01-12 Being in the zone means performing in a distinctive unusual pleasurable and highly competent way at something you already regularly do dancing or playing a viola computer programming tennis and much more What makes the zone special This volume offers groundbreaking research that brings sociological and cultural studies to bear on the idea of being in the zone There is original research on musicians dancers and surfers which shows that being in the zone far from being exclusively individualised and private but must be understood as social and collective and possibly accessible to all The zone is not just for elite performers Being in the zone is not just the province of the athlete who suddenly and seemingly without extra effort swims faster or jumps higher or the musician who suddenly plays more than perfectly but also of the doctor working under intense pressure or the computer programmer staying up all night The meaning of such experiences for convincing people to work in intense conditions often with short term contracts is explored to show how being in the zone can have problematic effects and have negative and constraining as well as creative and productive implications Often being in the zone is understood from a psychological viewpoint but this can limit our understanding This volume provides the first in depth analysis of being in the zone from social and cultural viewpoints drawing on a range of theories and novel evidence Written in a stimulating and accessible style Culture Identity and Intense Performativity *Being in the Zone* will strongly appeal to students and researchers who aim to understand the experience of work creativity musicianship and sport Issues of the body are also central to being in the zone and will make this book relevant to anyone studying bodies and embodiment This collection will establish being in the zone as an important area of enquiry for social science and the humanities

Turner, Yangwen Zheng, 2009 The past few decades have seen growing interest in the study of the body However the increasing number of exciting and influential publications has primarily if not exclusively focused on the body in Western cultures The various works produced by Asian scholars remain largely unknown to Western academic debates even though Asia is home to a host of rich body cultures and religions The peoples of Asia have experienced
