Milesi-Ferretti,Nouriel Roubini,1995-07-01 The effects of income and consumption taxation are examined in the context of models in which the growth process is driven by the accumulation of human and physical capital The different channels

through which these taxes affect economic growth are discussed and it is shown that in general the taxation of factor incomes human and physical capital is growth reducing The effects of consumption taxation on growth depend crucially on the elasticity of labor supply and therefore on the specification of the leisure activity The paper also derives some implications for the optimal intertemporal choice of tax instruments **Revenue Revisions, 1947-48** United States.
