Eight Women Who Made A Difference:

Eight Women Philosophers Jane Duran, 2006 This work traces the themes of standard philosophical theorising and feminist thought across eight women philosophers in the Western tradition Hildegard of Bingen Anne Conway Mary Astell Mary Wollstonecraft Harriet Taylor Mill Edith Stein Simone Weil and Simone de Beauvoir *Women who Made a Difference* Martha L. Tyler, 2002 **Neurofeminism** Robyn Bluhm, Heidi Lene Maibom, Anne Jaap Jacobson, 2012-01-27 Going beyond the hype of recent fMRI findings this interdisciplinary collection examines such questions as Do women and men have significantly different brains Do women empathize while men systematize Is there a feminine ethics What does brain research on intersex conditions tell us about sex and gender *Made For More* Hannah Anderson, 2014-03-20 Who are you really In an uncertain world we crave the security of knowing exactly who we are and where we belong But too often as women we try to find this safety in our roles and relationships our professional accomplishments or our picture perfect homes And as we do our souls shrink smaller and smaller It s because these things aren t made to hold us In *Made for More* Hannah Anderson invites you to re imagine yourself not simply as a set of roles and categories but as a person destined to live in the fullness of God Himself Starting with our first identity as image bearers Hannah shows how Jesus Christ makes us people who can reflect His nature through our unique callings She also explores how these deeper truths affect the practical realities that we face as women how does being an image bearer shape our pursuit of education our work and even our desire for holistic lives Because you are made in God s image you will only ever know yourself only ever be yourself as you find your identity in Him Find it now *Women's Activism in Twentieth-Century Britain* Paula Bartley, 2022-04-01 This book serves as an introduction to the extraordinary diversity of women s activism Paula Bartley s original research is supported by a range of writing to provide a powerful impression of the actions taken by groups of women from across the social and political spectrum making the book invaluable to both students and interested readers These women set out to make a difference to their locality their country and sometimes the world The story of women s activism embodies stimulating accounts of progress and reversals of commitment and uncertainty of competing rights and challenging wrongs The story of women s activism is not tidy or well ordered It is messy and unorthodox And full of surprises **Women in Medieval Society** Susan Mosher Stuard, 2012-04-17 Early medieval women exercised public roles rights and responsibilities Women contributed through their labor to the welfare of the community Women played an important part in public affairs They practiced birth control through abortion and infanticide Women committed crimes and were indicted They owned property and administered estates The drive toward economic growth and expansion abroad rested on the capacity of women to staff and manage economic endeavors at home In the later Middle Ages the social position of women altered significantly and the reasons why the role of women in society tended to become more restrictive are examined in these essays British and Foreign Medico-chirurgical Review ,1860 **Friends' Intelligencer** ,1914 *Tourism and Cultural Change in Costa Rica*

Karen Stocker, 2013-06-20 This book examines the consequences positive negative and otherwise of tourism in Costa Rica Based on ethnographic research and interviews with tourists tour operators tourists turned settlers and locals living in tourist destinations this book brings together these varied perspectives with the aim of presenting forms of tourism beneficial to all parties To examine both pitfalls and positive outcomes of tourism it compares modes of tourism in destinations that are locally owned and foreign owned ecotourism destinations beach tourism adventure tourism sites and agrotourism projects Furthermore the author draws from two decades of research in two distinct communities to trace the ways in which the development of tourism in one community provided the springboard for changing gender roles and new opportunities for women and in the other how the promise of tourism has spurred a cultural revitalization and positive change in Indigenous identity Interviews with three generations of women in one tourist destination show generational changes in perspectives on tourism and interviews covering the same time span show how in an Indigenous reservation poised to enter the heritage tourism industry tourism offers a positive alternative to exploitative forms of labor and the stigma once associated with Indigeneity in that region Interviews with locals in all four sites reveal the ways in which tourism carried out conscientiously would benefit them These juxtaposed with interviews of tourists regarding what they seek through tourism offer a means of designing a mutually beneficial form of tourism In sum this book puts into conversation the varied views of those positioned differently within the realm of tourism in order to inform tourists and foreign land owners as to how they might glean the advantages that such an experience may bring to the traveler while also playing up the benefits of these endeavors to local communities and minimizing the potential damage these practices may cause **Messenger and Visitor**, 1908 Fifth Biennial Report of the Bureau of Labor Statistics and Factory Inspection Washington (State). observing the customary coffee break I found that the way this book is written helped me to reflect on much of the gender research that I am involved in currently because the questions raised are so searching and far reaching Once again the chapter authors combine brevity with thoroughness and depth in their examination of the themes which made this a very rewarding book because it takes you so far in your thinking in just 240 pages I feel energised by the debates that the book has opened up for me I have done research in this particular area but I now feel that I have explored different perspectives and new depths and I am grateful to the editors for that Marianne Tremaine Gender in Management An International Journal This timely collection of case studies and research from top academics around the world will be of tremendous value to all those engaged in bringing about greater gender diversity in corporate boardrooms Jacey Graham Brook Graham LLP This book provides an excellent overview of contemporary international research and practice relating to women on corporate boards of directors An important lesson learnt from this book is rather than having only one or two competent and committed women on the boards of directors an ideal number of three is not only the right thing but also the bright thing to do Why Research has documented a strong positive correlation between the share of board seats held by women and financial performance Martin Hilb University of St Gallen Switzerland There are still common barriers that women face across many countries that keep their representation on boards of directors low and relatively unchanging I commend this excellent outstanding book to both academics and business management constituencies as well as individuals interested in serving on corporate boards The authors should be congratulated for this important contribution to the literature Marilyn Davidson The University of Manchester UK This important new book addresses the growing international interest in women on corporate boards of directors The contributors explore the position of women on corporate boards and future trends in different countries including Australia Canada France Iceland Jordan New Zealand Norway Spain Tunisia the UK and the USA They go on to report the latest research on the experiences and different contributions made by women directors on corporate boards Issues discussed include How women directors champion difficult issues and debates How women influence boardroom behaviour The contribution of women directors human and social capital Gendered experiences and the glass cliff The glass ceiling or a bottleneck Networking to harness local power for national impact Women on board in best practice companies Whether critical mass makes a difference Future directions for research Women on Corporate Boards of Directors brings together the significant international research base with suggestions aimed at individuals aspiring to board membership women and men currently serving on corporate boards companies interested in attracting women to their boards and government bodies wanting to identify the challenges and opportunities facing them as they consider various options for increasing women's representation on corporate

Rewriting the Renaissance Margaret W. Ferguson, Maureen Quilligan, Nancy Vickers, 1986-09-15 Juxtaposing the insights of feminism with those of marxism psychoanalysis and deconstruction this unique collection creates new common ground for women's studies and Renaissance studies An

outstanding array of scholars literary critics art critics and historians reexamines the role of women and their relations with men during the Renaissance In the process the contributors enrich the emerging languages of and about women gender and sexual difference Throughout the essays focus on the structures of Renaissance patriarchy that organized power relations both in the state and in the family They explore the major consequences of patriarchy for women their marginalization and lack of identity and power and the ways in which individual women or groups of women broke or in some cases deliberately circumvented the rules that defined them as a secondary sex Topics covered include representations of women in literature and art the actual work done by women both inside and outside of the home and the writings of women themselves In analyzing the rhetorical strategies that marginalized historical and fictional women these essays counter scholarly and critical traditions that continue to exhibit patriarchal biases
