Inside the Primary Classroom: 20 Years On Chris Comber, Maurice Galton, Linda Hargreaves, Debbie Wall, 2013-01-11 In recent years primary education has been the subject of continuing debate with questions of standards and their apparent decline being raised with alarming regularity Central in informing these debates has been the ORACLE study of groupwork in primary classrooms Published during the 1980s the study described in detail the daily life of the primary classroom the teaching styles used by teachers and the responses of pupils That research has now been replicated with over two thirds of the schools originally studied being revisited using the same tests and observation instruments This book presents the findings of this second round of research and is therefore unique in being able authoritatively to document the changes or lack of them in primary education and teaching practice over the last twenty years  
*Realism and Educational Research* David Scott, 2002-01-04 Although the literature of social research covers a vast range of material there has been little on the role of social theory in educational research In this respect David Scott s book covers an important gap in the market as it focuses on the centrality of social theory in a variety of empirical projects The volume covers a range of conceptual and theoretical discussions and subsequently applies these concepts to our analysis of empirical studies As a consequence it is a volume that deserves to be read widely by students and researchers alike

**Teachers and Schooling Making A Difference** Pam Christie, Bob Lingard, 2020-08-04 Teachers Schooling Making a Difference takes seriously the question that teachers ask What do I do on Monday and does provide answers From the foreword by Professor Michael Apple University of Wisconsin Education debates are currently dominated by free market ideologists who push privatisation and competition as the answer to every problem regardless of damage to schools and pupils Teachers Schooling Making a Difference shows that we can think about education in a far more productive way Professor R W Connell University of Sydney This book is a lesson in making hope practical It makes a compelling argument for recognising supporting and enabling teachers as central to progressive school reform Professor Jenny Ozga University of Edinburgh What teachers do in the classroom really matters even though schools cannot compensate fully for difficulties children may face at home and in society Good teachers and good schools have been making a difference in children's lives for generations but what exactly is it that works Based on extensive research in 1000 primary and secondary classrooms this book examines the tough questions about teaching methods curriculum assessment and teachers professionalism The authors isolate the key elements that make the difference in the classroom and offer teachers practical approaches to working with all their students Teachers and Schools Making a Difference is essential reading for teachers and school administrators who want to improve their professional skills and offer a genuinely democratic education
