Nuclear Bodies Robert A. Jacobs,2022-03-29 The Cold War reconsidered as a limited nuclear war Inexorable clarity and

care for his fellow humans mark Robert Jacobs's guide to the Cold War as a limited nuclear war whose harms disfigure any possible future. Norma Field, author of *In the Realm of a Dying Emperor*, Japan at Century's End. In the fall of 1961, President Kennedy somberly warned Americans about deadly radioactive fallout clouds extending hundreds of miles from H-bomb detonations; yet he approved ninety-six US nuclear weapon tests for 1962. Cold War nuclear testing, production, and disasters like Chernobyl and Fukushima have exposed millions to dangerous radioactive particles; these millions are the global hibakusha. Many communities continue to be plagued with dire legacies and ongoing risks: sickness and early mortality, forced displacement, uncertainty and anxiety, dislocation from ancestors and traditional lifestyles, and contamination of food sources and ecosystems. Robert A. Jacobs re-envisioned the history of the Cold War as a slow nuclear war fought on remote battlegrounds against populations powerless to prevent the contamination of their lands and bodies. His comprehensive account necessitates a profound rethinking of the meaning, costs, and legacies of our embrace of nuclear weapons and technologies.

War and Public Health Barry S. Levy, Victor W. Sidel, 1997. This is the first full description of the public health consequences of war and of what health professionals can do to minimize these consequences and to help prevent war itself. The book covers the impact of war on public health, human rights, and the environment; the effects of specific weapons systems during war and the preparation for war; the effects of war and military activities on women, children, refugees, and other populations; the public health impacts of specific wars; and the role of health professionals and organizations during war and in preventing war. The book is well illustrated with numerous figures and photographs and is extensively referenced.
