Ego, Self, Person, Context Robert Howard Roth, 1992-01-01 **Expressing the Self** Minyao Huang, Kasia M. Jaszczolt, 2018-02-24 This book addresses different linguistic and philosophical aspects of referring to the self in a wide range of languages from different language families including Amharic English French Japanese Korean Mandarin Newari Sino Tibetan Polish Tariana Arawak and Thai In the domain of speaking about oneself languages use a myriad of expressions that cut across grammatical and semantic categories as well as a wide variety of constructions Languages of Southeast and East Asia famously employ a great number of terms for first person reference to signal honorification The number and mixed properties of these terms make them debatable candidates for pronounhood with many grammar driven classifications opting to classify them with nouns Some languages make use of egophors or logophors and many exhibit an interaction between expressing the self and expressing evidentiality qua the epistemic status of information held from the ego perspective The volume's focus on expressing the self however is not directly motivated by an interest in the grammar or lexicon but instead stems from philosophical discussions on the special status of thoughts about oneself known as de se thoughts It is this interdisciplinary understanding of expressing the self that underlies this volume comprising philosophy of mind at one end of the spectrum and cross cultural pragmatics of self expression at the other This unprecedented juxtaposition results in a novel method of approaching de se and de se expressions in which research methods from linguistics and philosophy inform each other The importance of this interdisciplinary perspective on expressing the self cannot be overemphasized Crucially the volume also demonstrates that linguistic research on first person reference makes a valuable contribution to research on the self tout court by exploring the ways in which the self is expressed and thereby adding to the insights gained through philosophy psychology and cognitive science Coaching Psychology: Meta-theoretical perspectives and applications in multicultural contexts Llewellyn E. van Zyl, Marius W. Stander, Aletta Odendaal, 2016-06-03 This book offers detailed strategies methodologies approaches practice guidelines and policy implications effective for professional coaching on the individual group and organizational level It details empirical research based and theoretical perspectives on coaching psychology as well as elaborates upon the fundamentals within multi cultural contexts First delivering a general introduction to coaching psychology before going on to examine specific psychological approaches towards coaching The book also provides a conceptual framework for the use of psychometrics in multi cultural coaching psychology Next the book presents meta theoretical perspectives and applications for multi cultural contexts such as how to enhance leadership with group coaching from a system psychodynamic approach how coaching can be used to support behavioral engagement and wellbeing and how to utilize symbolic expressions art myths dreams and fantasies in coaching This book provides practical tools towards critical self reflective practice Delivering the current state of the art research by presenting psychological coaching strategies theory and practice in one viewpoint It also informs on the activity of various research approaches thus

interesting the broader student and academic reader It will help all readers evaluate their current coaching competencies and in the end become better coaches The book will also serve as an ideal resource for psychologists who want to migrate into coaching psychology Personal Construct Psychology in the Clinical Context Geoffrey H. Blowers, Kieron Philip O'Connor, 1996 Personal construct psychology PCP a unique comprehensive theory of personality and clinical practice the authors review theory and discuss its resurgence amidst the current cognitive psychotherapies illustrate the use of PCP methods in a range of clinical contexts and demonstrate how these can be adapted for both evaluation and treatment purposes This book offers a critique of current cognitive concepts and is designed for anyone seeking an informed succinct and balanced appraisal in the clinical context Back cover **Self, Person, World** Donald McIntosh, 1995 Presents a synoptic survey of human life in its personal social and mythical dimensions drawing from a variety of sources McIntosh asserts that no major aspect of human life can be adequately understood except in the context of the whole thus understanding the self others and the world requires an intermingling of conscious and unconscious levels of thought and awareness Annotation copyright by Book News Inc Portland OR **Shame in Context** Susan Miller, 2013-05-13 In this enlightening and gracefully written study Susan Miller examines shame in a variety of clinical contexts en route to a richer understanding of shame dynamics Miller attends especially to the role of shame in creating and maintaining character pathology and devotes separate sections of the book to shame in the context of obsessive compulsive narcissistic and masochistic personality organizations Within each of these clinical contexts a chapter of theoretical discussion is followed by a chapter of engaging case examples Integral to Shame in Context is Miller's informed and thoughtful critique of current theories about shame including those of Broucek Morrison Schore Wurmser Nathanson and Kinston In reviewing the contributions of these and other writers she is most concerned with achieving a balanced comprehension of shame that incorporates the insights of different theoretical perspectives without embracing the selective emphases of any one investigator or school of thought Like Freud she appreciates the defensive utility of shame but she attends equally to the painful and at times pathogenic aspects of shame experiences In line with more recent shame literature she emphasizes the pathogenicity of early shaming but she is equally sensitive to the role of shame in sustaining character defenses And she goes beyond the purview of other shame researchers in examining the ways in which individuals unconsciously seek to maintain shame experiences when these experiences sustain their personality organizations Offering a critical evaluation and synthesis of contemporary shame theories and culminating in a balanced clinical understanding of shame in its various contexts Shame in Context takes its place as in the words of Frances Broucek the most sophisticated and definitive clinical study of shame to date The Desiring Self Walter E. Conn, 1998 This volume explores the two movements in the journey to transcendence The first is the drive to be an integrated and powerful self The second is to leave that behind and move beyond the self into relationship The two movements are inextricably joined separation and attachment autonomy and

relationship Humans are pulled simultaneously by the urge to be and to be for The Desiring Self is an explanation and a practical guide to the process of self transcendence Using case studies as well as insights from psychology and theology it takes readers through the steps of understanding themselves as incarnate integrated and yet transcendent beings bent on discovering their true selves as known by God It is a book to be read and relished by pastoral counselors spiritual directors readers exploring the confluence of psychology and religion and all persons on the journey of self transcendence BOOK

Confucius David L. Hall, Roger T. Ames, 1987-10-15 Thinking Through Confucius critically interprets the conceptual structure underlying Confucius philosophical reflections It also investigates thinking or philosophy from the perspective of Confucius Perhaps the philosophical question of our time is what is philosophy The authors suggest that an examination of the Chinese philosophy may provide an alternative definition of philosophy that can be used to address some of the pressing issues of the Western cultural tradition This book finds an appropriate language for the interpretation of traditional Chinese philosophical thought a language which is relatively free from the bias and presuppositions of Western philosophy The Oxford Handbook of Self-determination Theory Richard M. Ryan, 2023 Self Determination Theory SDT is a broad theory of psychological growth and wellness that has revolutionized how we think about human motivation Drawing on over four decades of evidence based research and application this handbook delivers a truly integrative volume with 57 chapters by the top researchers and experts within the field of SDT Edited by an SDT cofounder this handbook traces the theory's historical and scientific foundations and synthesizes the latest research and insights on human motivation covering topics from the social and biological underpinnings of motivation and wellness to practical applications in all aspects of life *Empathy, Embodiment, and the Person* James Jardine, 2022-02-11 This text explores how self consciousness and self understanding differ phenomenologically from the experience and comprehension of others and the extent to which such relations are constitutively interdependent Jardine argues that Husserl's analyses of selfhood and intersubjectivity are animated by the question of what's at stake in recognising an agent's engagement as the situated response of a person rather than simply as the comportment of an animal or living body Drawing centrally from the freshly excavated Ideas II drafts and manuscripts the author develops Husserl's often fragmentary investigations of attention habit emotion freedom the common world and action and considers their implications for subjectivity and the experience of others Empathy Embodiment and the Person also brings Husserlian phenomenology into dialogue with twenty first century philosophical concerns from accounts of selfhood and agency from analytic philosophy to the treatment of social experience in critical theory The book shows the reader that transcendental phenomenology can be rejuvenated by engaging with a broader philosophical landscape and will appeal to researchers students and instructors in the field **Contextual Selling** Rajan Parulekar, Thanks to internet and the ease in accessing information the competition which was across the city now is just a mouse click away Contextual

Selling A New Sales Paradigm for the 21st Century provides a simple and practical framework for the practising sales professionals Whether you are a manager or a field sales executive one needs to have the competencies of Emotional Intelligence Intelligence Quotient the Conceptual Skills to succeed in a highly competitive and globalized market The author in his humorous and witty style shows the games played by customers the sales executives and the managers and the strategies to survive and grow in a cut throat business environment **The Self-Aware Universe** Amit

Goswami,1995-03-21 In this stimulating and timely book Amit Goswami PhD shatters the widely popular belief held by Western science that matter is the primary stuff of creation and proposes instead that consciousness is the true foundation of all we know and perceive His explanation of quantum physics for lay readers called a model of clarity by Kirkus Reviews sets the stage for a voyage of discovery through the common ground of science and religion the entwined nature of mind and body and our interconnectedness with all of creation Understanding Mental Objects Meir Perlow,2003-09-02

The ways in which an individual the subject relates to and perceives other people his or her objects has always been a preoccupation of psychoanalysis and in recent years a plethora of concepts has grown up in the literature In this ground breaking study Meir Perlow sets out to clarify the changing meanings of the different concepts from context to context discussing in depth the theoretical issues underlying them The book begins with an historical survey of how mental objects have been understood in the various schools of psychoanalysis as they have developed These include Freud and his associates the object relations approaches of Klein Fairbairn and Bion orientations derived from ego psychology such as those of Schafer and Kernberg and the self orientation of Winnicott and Kohut In Part Two the author discusses the conceptual and clinical issues involved in the major differences between the concepts Finally in Part Three he delineates three basic meanings of the concepts of mental objects as they have emerged in the literature and shows how they are related to ongoing issues in contemporary psychoanalysis This long overdue clarification of a complex area with its wide ranging and imaginative grasp of the different theories about objects will be an invaluable reference for all psychoanalysts and psychologists **Textbook of**

Developmental Pediatrics Marvin I. Gottlieb,Janice E. Williams,2013-11-11 Child adolescent development and behavior have been a traditional concern of primary health care providers However it was not until the mid 1960s that attempts were made to consolidate developmental behavioral issues into an identifiably distinct fund of medical knowledge During the ensuing two decades developmental behavioral pediatrics was recognized as a clinical and research subspecialty within the framework of comprehensive health care for children The influence of public advocacy groups topic dedicated journals national professional specialty societies subject related continuing education programs and federal legislation PL94 142 has served to crystallize developmental behavioral pediatrics as a specialized field of study As a consequence during the past ten years significant modifications have restructured medical student and pediatric resident education providing an emphasis on developmental behavioral issues The focus on neurodevelopmental educational and psychosocial issues reflects changing

priorities in traditional health care for children The postgraduate training of pediatric fellows in two and three year training programs was initiated to accommodate professional manpower needs in both academic and practice settings Many of the problems in childhood development and behavior frequently span the traditional areas of child neurology child psychiatry and general pediatrics As a result there has been some confusion in demarcating professional responsibilities in diagnosis and management as well as poorly defined terminology and classification schemas With the birth of developmental pediatrics as a pediatric specialty a more cohesive fund of knowledge has been accumulated and more meaningful strategies have been designed for prevention diagnosis and management Psychiatry Allan Tasman, Jerald Kay, Jeffrey A.

Steve Odin, 1996-01-10 The thesis of this work is that in both modern Japanese philosophy and American pragmatism there has been a paradigm shift from a monological concept of self as an isolated I to a dialogical concept of the social self as an I Thou relation including a communication model of self as an individual society interaction It is also shown that for both traditions all aesthetic moral and religious values are a function of the social self arising through communicative interaction between the individual and society However at the same time this work critically examines major ideological conflicts arising between the social self theories of modern Japanese philosophy and American pragmatism with respect to such problems as individualism versus collectivism freedom versus determinism liberalism versus communitarianism and relativism versus objectivism **HUMANISTIC PERSONOLOGY: A HUMANISTIC-ONTOLOGICAL THEORY OF THE PERSON &**
