**Toxicological profile for polychlorinated biphenyls (PCBs)**, 2000 The Artist's Complete Health and Safety Guide Monona Rossol, 2001-11-01 In its third edition The Artist s Complete Health and Safety Guide speaks to today s artists in the clearest terms possible Through dozens of handy tables diagrams and charts this volume points out dangerous ingredients found in specific brands of paint dye and adhesives simple supplies such as goggles and ladders that keep classrooms and studios safe and steps that art educators can take to comply with OSHA regulations This volume also details helpful and potentially life saving subjects such as Questions to ask when ordering art supplies Recommendations for proper ventilation Safe work practices Precautions for individual media Art materials and projects for children and other high risk individuals Not only artists but those who work in school administration health care and risk analysis will benefit from the surprising facts revealed For example art and craft supplies labeled as biodegradable water based and natural must be handled with utmost caution because they can still contain highly toxic properties With the information contained in The Artist s Complete Health and Safety Guide artists can at last be free from fear and confusion to return to creativity in the safest healthiest environment possible **Toxicological Profile for Formaldehyde**, 1999 **Monthly Catalogue, United States Public Documents**, 1994

*Costs of Occupational Injuries and Illnesses* J. Paul Leigh, 2000 As the debate over health care reform continues costs have become a critical measure in the many plans and proposals to come before us Knowing costs is important because it allows comparisons across such disparate health conditions as AIDS Alzheimer s disease heart disease and cancer This book presents the results of a major study estimating the large and largely overlooked costs of occupational injury and illness costs as large as those for cancer and over four times the costs of AIDS The incidence and mortality of

occupational injury and illness were assessed by reviewing data from national surveys and applied an attributable risk proportion method Costs were assessed using the human capital method that decomposes costs into direct categories such as medical costs and insurance administration expenses as well as indirect categories such as lost earnings and lost fringe benefits The total is estimated to be 155 billion and is likely to be low as it does not include costs associated with pain and suffering or of home care provided by family members Invaluable as an aid in the analysis of policy issues Costs of Occupational Injury and Illness will serve as a resource and reference for economists policy analysts public health researchers insurance administrators labor unions and labor lawyers benefits managers and environmental scientists among others J Paul Leigh is Professor in the School of Medicine Department of Epidemiology and Preventive Medicine University of California Davis Stephen Markowitz M D is Professor in the Department of Community Health and Social Medicine City University of New York Medical School Marianne Fahs is Director of the Health Policy Research Center Milano Graduate School of Management and Urban Policy New School University Philip Landrigan M D is Wise Professor and Chair of the Department of Community Medicine Mount Sinai Medical Center New York
