Health Is A Question Of Balance:

Health Is a Question of Balance Paul Brenner, 1992-09 **A Question of Balance** National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Committee for a Study on Promoting Access to Scientific and Technical Data for the Public Interest, 2000-01-15

New legal approaches such as the European Union's 1996 Directive on the Legal Protection of Databases and other legal initiatives now being considered in the United States at the federal and state level are threatening to compromise public access to scientific and technical data available through computerized databases. Lawmakers are struggling to strike an appropriate balance between the rights of database rights holders who are concerned about possible commercial misappropriation of their products and public interest users of the data such as researchers, educators, and libraries. A Question of Balance examines this balancing act. The committee concludes that because database rights holders already enjoy significant legal, technical, and market-based protections, the need for statutory protection has not been sufficiently substantiated. Nevertheless, although the committee opposes the creation of any strong new protective measures, it recognizes that some additional limits against wholesale misappropriation of databases may be necessary. In particular, a new properly scoped and focused U.S. statute might provide a reasonable alternative to the European Union's highly protectionistic database directive. Such legislation could then serve as a legal model for an international treaty in this area. The book recommends a number of guiding principles for such possible legislation as well as related policy actions for the administration.

A Question of Balance Brenda J. Norton, 2016-01-21

Western liberal democracy has a dual foundation of limited government implementing the will of the majority and protecting individual autonomy within a sphere of fundamental rights. Under the rubric of universal human rights, Western societies take for granted that they tolerate all religions and treat all persons equally. However, through globalization and immigration, Western societies are increasingly finding non-Christian people in their midst. This pluralism is causing polities to rethink fundamental notions of the boundaries of religious freedom, equality, and state neutrality. Three countries whose systems are based on the Western liberal democratic philosophy and which are religiously pluralist—the United States, France, and the Netherlands—are reacting in different ways. The politics of the hijab and burqa lie at the intersection of the political and legal spheres. Consequently, the political and legal spheres have each attempted to enforce differing versions of the concepts of equality and neutrality. A cross-cultural and cross-national survey of judicial decisions and legislative action in these countries demonstrates how each is balancing individual rights and communal bonds and adhering to or retreating from previously accepted human rights norms for women and religious practices.
