## **Health Outcomes Biological Social And Economic Perspectives:**

*Health Outcomes* Helen M. Macbeth, 1996 The costs of health care are much debated but any study of these costs require measurement of what has been achieved by the health care The results of health care have come to be known as health outcomes and this book discusses the multiple angles involved in defining and measuring these outcomes This book is deliberately cross disciplinary and looks at the topic thoroughly from the perspectives of different academic and practical angles

**Sex, Gender and Health** Tessa M. Pollard, Susan Brin Hyatt, 1999-08-26 Explores differences in health experiences of boys girls men and women from both biological and social perspectives

**Infertility in the Modern World** Gillian R. Bentley, C. G. Nicholas Mascie-Taylor, 2000-11-30 An interdisciplinary perspective on the ways in which human biology and culture can affect fertility

Human Population Dynamics Helen Macbeth, Paul Collinson, 2002-06-20 In human populations biological social spatial ecological and economic aspects of existence are inextricably linked demanding a holistic approach to their study Many undergraduate and postgraduate courses now emphasise the value of studying human populations using theoretical frameworks and methodologies from different traditional disciplines Human Population Dynamics introduces such frameworks and methodologies whilst demonstrating how changes in human population structure can be addressed from several different academic perspectives As such the book contains contributions from world renowned researchers in demography social and biological anthropology genetics biology sociology ecology history and human geography In particular the contributors emphasise the lability of many population structures and boundaries as viewed from their area of expertise This text is aimed at undergraduate students graduates and academic researchers from any academic discipline which considers human populations

**Hunter-Gatherers** Catherine Panter-Brick, Robert H. Layton, P. Rowley-Conwy, Peter Rowley-Conwy, 2001-03-29 This 2001 volume is an interdisciplinary text on hunter gatherer populations world wide

**Learning from HIV and AIDS** George Ellison, Melissa Parker, Catherine Campbell, 2003-10-30 Different professional and academic disciplines have addressed the HIV AIDS pandemic from a variety of perspectives using different analytical approaches By bringing these together in one volume Learning from HIV AIDS provides a more complete picture of this multi faceted disease from the biological and social factors which facilitate HIV transmission to the powerful cultural and political forces which fuel the pandemic Chapters from contributors working on the aetiology treatment and prevention of HIV AIDS identify how their work has helped predict the spread of HIV and has improved the survival of those infected Yet interventions to reduce the spread of HIV have had limited success and few HIV infected individuals have access to combination drug therapies Written for students and researchers and taking an interdisciplinary perspective this book demonstrates that progress in developing effective and acceptable interventions can only be achieved through collaboration between the biological medical and social sciences

*Methodology, Theory, and Knowledge in the Managerial and Organizational Sciences* Eliezer Geisler, 1999-06-30 Geisler argues that the over reliance on co variation techniques and

statistical methods instead of process approach and in depth analysis produces meaningless knowledge in the managerial and organizational sciences and indeed throughout all the social sciences He offers instead a new and different approach based on the notion of what he calls dynamic morphologies an architecture of slicing complex phenomena This way it is possible to explain many inconsistencies in research findings and to find a cohesive systematic outlook on research research design and knowledge creation Intellectually challenging and following in the footsteps of Kuhn Argyris and Popper Geisler s approach is frankly revolutionary in research design and contains its own notions terms and nomenclature A provocative discussion for academics and others well trained in the organizational managerial and social sciences Geisler s dynamic morphologies provide a means to research complex phenomena and gain knowledge about them They are composed of a chain of events combined logically and temporally and a method by which this process is studied Geisler also contends that knowledge in the organizational and managerial sciences is only viable when it describes and explains the complex higher order phenomena Therefore theory building and research in these fields must be linked to higher order constructs and the phenomena that they attempt to explain This is the central notion of amplitude that Geisler introduces and describes His book also criticizes the evolutionary epistemology view of knowledge creation and contends that knowledge in all of these fields of study in general is not evolutionary but instead cumulative and expansive Maea te Toi Ora: Māori Health Transformations Te Kani Kingi, Mason Durie, Hinemoa Elder, Rees Tapsell, Mark Lawrence, Simon Bennett, 2018-02-28

**Culture, Kinship and Genes** E. Parsons, A. Clarke, 2016-07-27 The first comprehensive attempt to explore the issues raised by genetic counselling across cultures It will be of interest to health professionals and to students and lecturers in the social behavioural and political sciences and in genetics medicine and nursing The meaning and relevance of kinship and ethnicity in the context of genetic disease cultural issues that have arisen in practice including the influence of the lay public s beliefs about inheritance and the wider social and political context of genetics and genetic disease are all explored in depth

**What Works?** Nutley, Sandra M., Peter C. Smith, Davies, Huw T.O., 2000-07-19 An exploration of how the knowledge gained from research is used to improve the effectiveness of public policy formation and public service delivery It covers eight areas of public service health education criminal justice social policy transport urban policy housing and social care

*Social Biology and Human Affairs*, 1995 **Encyclopedia of Epidemiology** Sarah Boslaugh, 2008 Presents information from the field of epidemiology in a less technical more accessible format Covers major topics in epidemiology from risk ratios to case control studies to mediating and moderating variables and more Relevant topics from related fields such as biostatistics and health economics are also included

**Handbook on Contemporary Issues in Health, Crime, and Punishment** Nathan W. Link, Meghan A. Novisky, Chantal Fahmy, 2024-10-30 The Handbook on Contemporary Issues in Health Crime and Punishment covers many topics on the numerous ways in which mental and physical health and criminal justice system contact influence one another and are intricately intertwined These often mutually reinforcing dynamics affect

a range of health and justice outcomes at individual familial group community and national levels Contributions detail this topic from a wide range of disciplinary theoretical and international perspectives and rely on various analytical lenses including quantitative qualitative policy analytic theoretical conceptual and lived experiences The chapters summarize what is known in each topical area but as important they identify emerging theoretical empirical and policy directions In this way the book is grounded in the current knowledge about the specific topic but also provides new synthesizing material that reflects the knowledge of the leading minds in the field Conceptually divided into 11 sections a number of contributions describe the unique experiences of women people of color juveniles older populations immigrants LGBTQ individuals and other sub populations i e people convicted of drug or sex offenses Where appropriate the authors provide both big picture and pragmatic policy directions aimed at reducing system contact health challenges and inhumane practices Given its breadth and depth the Handbook will appeal broadly to academics practitioners policymakers advocates and students seeking to understand the many ways in which health and justice system dynamics overlap

### **The Nature of Difference**

George Ellison, Alan H. Goodman, 2006-04-19 Unprecedented advances in genetics and biotechnology have brought profound new insights into human biological variation These present challenges and opportunities for understanding the origins of human nature the nature of difference and the social practices these sustain This provides an opportunity for cooperation between the biological and s
