Market Limits in Health Reform Public Success, Private Failure Daniel Drache, Terry Sullivan, 1999 **Informed Choice of Medical Services: Is the Law Just?** Marj Milburn, 2017-09-29 This title was first published in 2001 This work is a uniquely multi disciplinary contribution to the existing bioethical literature on the topic of informed choice of medical services It is also the first comprehensive bioethical text to confront the central issue of power in the clinical encounter and to argue for statutory protection of the right to informed choice While the majority of bioethicists argue for a conciliatory rather than adversarial approach to the chronic problem of uninformed consent the author of this work argues that the external regulation of medicine is essential if the right to informed choice is to be protected This argument is based upon an extensive review of the bioethical legal political medical sociological and philosophical literature as well as a wide range of empirical and anecdotal evidence evolving from a detailed exploration of power and the limits of rationality in the clinical encounter **Health Care Systems: Rethinking health care systems** Jonathan Watson, Pavel Ovseiko, 2005 This collection covers the organization financing and regulation of health care systems in four clear contexts reforming health care systems understanding health care politics financing and delivering health care rethinking health care systems

Fads, Fallacies And Foolishness In Medical Care Management And Policy Theodore R Marmor, 2007-03-28 No one misses the onslaught of claims about reforming modern medical care How doctors should be paid how hospitals should be paid or governed how much patients should pay when sick in co payments how the quality of care could be improved and how governments and other buyers could better control the costs of care all find expression in the explosion of medical care conference proceedings op eds news bulletins journal articles and books This collection of articles takes up a key set of what the author regards as particularly misleading fads and fashions developments that produce a startling degree of foolishness in contemporary discussions of how to organize deliver finance pay for and regulate medical care services in modern industrial democracies The policy fads addressed include the celebration of explicit rationing as a major cost control instrument the belief in a basic package of health insurance benefits to constrain costs the faith that contemporary cross national research can deliver a large number of transferable models and the notion that broadening the definition of what is meant by health will constitute some sort of useful advance in practice **Health Reform** Daniel Drache, Terry Sullivan, 2005-08-18 Health Reform explores the challenges facing health care provision in the advanced economies The book exposes the limitations of market led health reform and demonstrates the indispensable role of a vibrant public authority in the renewal of modern health care systems Issues covered include cost containment and privatisation strategies in an international perspective the role of business and the private sector in setting the agenda for health care reform the restructuring of Anglo Saxon health systems and the shift in state market boundaries in Canada the USA the UK and Australia the frontier of health care reform in terms of health and social cohesion the role of patient choice in health care

The Market or the Public Domain Daniel Drache,2005-07-08 Examining the powerful idea of the return reconstitution and redeployment of the public domain in a post Seattle and post Washington consensus world order this innovative book is the most forward looking and comprehensive examination of the need to rethink the tenants of global free trade In the past two decades countries have focused on broadening and guaranteeing market access and as the pendulum swings back for the market the issue of investing in the public domain becomes a priority The authors believe that devising new institutions of governance for a globalizing world requires fundamental change nationally and internationally They argue that new public spaces places and services are required to strengthen democracy and create sanctuaries in society where the market mechanism cannot reach The public domain is an incipient concept that enables states to reduce the intrusiveness of markets and at the same time develop a strong national performance to reduce the inequality and social exclusion in an increasingly volatile global economy This original volume boasts an impressive list of international contributors who have demonstrated innovation and leadership in their fields It will strongly appeal to advanced students academics and policy makers involved in

the field of global governance and international political economy **Governance in the 21st Century / Gouvernance Au 21^e Siècle** David M. Hayne, 2000-12-15 This volume continues the inquiry launched by the Royal Society of Canada's 1997 publication *Can Canada Survive Under What Terms and Conditions* and pursued in the 1998 volume *The Well Being of Canada* and the 1999 volume *Survivability in the 21st Century* all published by the University of Toronto Press The present collection examines the challenges of governance in our new century Eight papers given by experts in their respective fields call for an examination of the governance of organizations per se whether one probes the crises in the experience of large corporations in education in health care in science and technology systems or in military affairs This volume underlines the dramatic changes taking place in our time and stresses the urgent need for new thinking and the need to reform our governance mechanisms in order to keep pace with our changing world Heritage and Hope Kenneth Murray

The Campbell Revolution? J. R. Lacharite, Tracy Summerville, 2017-11-07 How are we to assess Gordon Campbell's decade long premiership of British Columbia While to many he was an ideologue set on revolutionizing provincial politics he was a far more complex figure polarizing and unpopular but also a shrewd party manager and successful political operator Beginning with a detailed account of Gordon Campbell's pre Liberal Party political activities *The Campbell Revolution* then takes a broad look at the policy options open to him in the context of the neoliberal revolution that swept across Canada and elsewhere in the 1980s and 1990s Contributors discuss the Campbell administration's reforms in social environmental and economic policies focusing on tax system reform the arts and culture sector healthcare and urban development in the context of the 2010 Winter Olympics More than just a narrative of the career of an enigmatic public official this book looks at specific public policy examples and asks whether Campbell led a revolution or simply rode a wave of change that had begun years before he came to power A comprehensive examination of Gordon Campbell's leadership and governance style and the ideological underpinnings of BC's Liberal Party *The Campbell Revolution* examines how the Campbell administration attempted to transform politics in British Columbia in the twenty first century **Civic Capitalism** John O'Neill, 2004-12-15

Offering a positive formulation of the moral practices that are basic to the civic institution of childhood citizenship and social justice *Civic Capitalism* expands the economist's concept of human capital to include health education and other social transfers that enrich civic capital formation John O'Neill demonstrates how this development has become the political core of capitalist societies in North America and Europe whose welfare regimes are continuously contested yet intrinsic to ideals of citizenship and social justice *Civic Capitalism* examines the current surrender to global capitalism and market elites that exploit rich national niches of civic society education health the rule of law and social security and challenges it to refocus on the needs of children and the poor Elite ideologies of anti governance and anti taxation are indifferent to the needs of

society's most vulnerable and fail to realize that inequality, ignorance and sickness are the most present impediments to economic growth and democracy. O'Neill gives moral voice to children and the state of childhood, the site where our notions of well-being, health, education, human capital are tested. His research draws upon the classical tradition of critical political economy and social policy in Galbraith, Rawls and Tawney, to name a few. Working within this tradition, he provides a grammar of civic childhood and the wealth of nations.

Restructuring Health Services Kasturi Sen, 2003-02. Health service delivery is being restructured in both industrialised and developing countries. Public health scholars and policy makers in this volume show how this process is accelerating as a result of diverse factors including fiscal pressure, privatisation of infrastructure and the impending renegotiation of the WTO General Agreement on Trade in Services (GATS). The key policy issues that arise concern the implications of these changes for access and equity in public health provision. The volume reviews the rapidly changing context in which financing health care and its relationship to globalization and privatisation are taking place. It examines the specific mechanisms and institutional processes involved. And it explores various contrasting experiences including HMOs in the USA, Britain's NHS, social health insurance in Western Europe, developing countries and Cuba.

Defiant Publics Daniel Drache, 2013-08-23. Social activism and dissent have become global phenomena for our times. Ordinary people across the world are fighting back. This newly potent political force has defeated governments in India and Spain and has brought down the EU draft constitution. Disaffected by the triumph of markets, public goods, public interest and public spaces are regaining political ground. Daniel Drache argues that feeding off distrust and suspicion of governments and assisted by the new cultural flows of people, ideas and information, this is a political phenomenon without historical precedent. No one owns the new public; elites remain baffled by its power and impact. No one can contain its innovative, inclusive and rapidly evolving organizational style. No one can determine when the current cycle of dissent will peak. This lively and engaging book is a must read for anyone interested in the role of protesters and publics in contemporary politics.
