Heart Failure Stuart Katz MD, 2013-06-21 Clinical practice consensus guidelines for management of heart failure are available from the American Heart Association American College of Cardiology Heart Failure Society of America Canadian Cardiovascular Society and European Society of Cardiology The guidelines from these organizations based on evidence from clinical trials and expert agreement are largely concordant and provide useful information for practitioners Yet the organization of the guidelines may confound efforts by a practitioner to determine which specific intervention or combination of interventions are most appropriate for an individual patient As part of the Oxford American Cardiology Library Heart Failure utilizes the staging of heart failure proposed by the ACC AHA guidelines as a framework to develop a systematic approach for diagnosis and treatment across a broad spectrum of clinical presentations Each chapter addresses a different

stage in the progression of heart failure and provides a patient centered description of the appropriate diagnostic and treatment options for that setting Each chapter also incorporates discussion of the diagnosis and treatment options for both low ejection fraction heart failure patients and preserved ejection fraction heart failure patients of which the latter group comprises at least 50% of all heart failure cases in clinical practice Heart Failure restructures the information in the clinical guidelines to a format that is more accessible and clinically useful to practitioners Role of congestion in heart failure:
