

# Case Study: The Great Wall of China

The Great Wall of China is a series of walls and fortifications built by the Chinese civilization over centuries. It is one of the most famous landmarks in the world, stretching over 13,000 miles across the northern border of China. The wall was built to protect the Chinese empire from invasions by nomadic tribes from the north.

The wall was built in several stages, starting from the 7th century BC. The most famous section, the Great Wall of China, was built by the Ming Dynasty in the 14th century. The wall was built using a combination of stone, brick, and tamped earth. The wall was built in a zigzag pattern, following the mountain ridges and valleys of the northern border.
