Adventures of Miss Noodles and the Not So Rotten Egg Berry Plump,2023-10-06 Hsittiks Seldoon was born in Evermore Kreechville on October 1st Enchantment Day. A child with an exceptional ability to draw but developmentally delayed speech and reading. However, she is in no pain and is very happy as a Kreechin. She is obsessed with mirrors and exhibits ritualistic behaviors where she separates her veggies by color and washes her hands three times before bed. She feels trapped in her mind and at times expresses anxiety as a goldfish needs water. Hsittiks relies on drawing, collecting mirrors, and stacking cups to gain control of her many thoughts. She gives poor eye contact when communicating face to face with others and stumbles over her words when talking in conversations. If the environment gets too noisy, she experiences unrest by beating tabletops with her flailing arms and hands. She often makes weird noises like the buzzing sound from a bee's wings flapping. She makes this noise with her tongue and teeth until she is calm. As a result, she prefers to be alone in total silence and takes walks through the neighborhood. Hsittiks has an Elcnu Eel who keeps her calm for long periods by telling her tall tales. At these times, Hsittiks exhibits behavior opposite of autistic mannerisms; she often displays Elcnu Eel often reminds her that Kreechin children born on October 1st Enchantment Day will receive a sting from Retsim Mocnin Poop's bee Poop. They will be sent to earth to become adults, work as teachers to discipline misbehaving children, and correct parents with poor parenting skills. Hsittiks Seldoon will intrigue on her adventure from Kreechville to Earth, teaching lessons to boys and girls on Earth. In Kreechville, she is a child, but when she receives a sting from Poop, she goes to earth, becomes an adult, teacher, a magical jokester with tricks. Her pranks demonstrate her masked autism for a while but not cured. This fictional book will take you through the radical intelligent world of a child with autism transitioning to an adult with masked autism.

Math Anxiety—How to Beat It! Brian Cafarella,2025-06-23 How do we conquer uncertainty, insecurity, and anxiety over college mathematics? You can do it, and this book can help. The author provides various techniques, learning options, and

pathways Students can overcome the barriers that thwart success in mathematics when they prepare for a positive start in college and lay the foundation for success Based on interviews with over 50 students the book develops approaches to address the struggles and success these students shared Then the author took these ideas and experiences and built a process for overcoming and achieving when studying not only the mathematics many colleges and universities require as a minimum for graduation but more to encourage reluctant students to look forward to their mathematics courses and even learn to embrace additional ones Success breeds interest and interest breeds success Math anxiety is based on test anxiety The book provides proven strategies for conquering test anxiety It will help find ways to interest students in succeeding in mathematics and assist instructors on pathways to promote student interest while helping them to overcome the psychological barriers they face Finally the author shares how math is employed in the real world examining how both STEM and non STEM students can employ math in their lives and careers Ultimately both students and teachers of mathematics will better understand and appreciate the difficulties and how to attack these difficulties to achieve success in college mathematics Brian Cafarella Ph D is a mathematics professor at Sinclair Community College in Dayton Ohio He has taught a variety of courses ranging from developmental math through pre calculus Brian is a past recipient of the Roueche Award for teaching excellence He is also a past recipient of the Ohio Magazine Award for excellence in education Brian has published in several peer reviewed journals His articles have focused on implementing best practices in developmental math and various math pathways for community college students Additionally Brian was the recipient of the Article of the Year Award for his article Acceleration and Compression in Developmental Mathematics Faculty Viewpoints in the Journal of Developmental Education
